CHAPTER 1.

Introductory.

In the introductory notes to the first three chapters of the report prepared last year by the Director General of Commercial Intelligence and Statistics attention was drawn to the difficulties in the way of drawing definite conclusions from the statistics presented. In order to provide a proper background for the materials presented here, a brief reference to the points raised in these notes may be made.

This report endeavours to exhibit the effects of the preferences resulting from the Agreements made at Ottawa on the trade and business of India. main difficulty of such an examination is to isolate the phenomena in order to study the effects of preferences as distinct from other economic causes. difficulty exists in most economic analyses but is particularly important when the new factor, the effects of which are being studied, is comparatively small in relation to the other operating causes. The time in which the preferential scheme has worked is far from normal. Important economic forces have been in operation almost throughout the period the effects of which may completely obscure if not neutralise the effects of preference. Since October 1929 the world has been passing through an industrial depression of immense magnitude. There have been phases of this depression when certain tendencies were strongly in evidence affecting both trade and industry. It is very difficult to determine the exact phase of the depression at any particular time and almost impossible to measure and allow for the changes in trade resulting from it. Apart from this major factor, there are a number of others correlated with it and mainly arising from it. These also have had a very disturbing effect on world trade. The first among these is the policy of economic nationalism which is rampant all the world over. The restrictive, almost strangling, influence of this policy on trade might easily outweigh the effects of individual bilateral trade agreements such as that concluded at Ottawa. This policy has led to a stiffening of tariff barriers in most countries and has also resulted in a vast net-work of trade restrictions by means of quotas, prohibitions, clearing agreements, etc., which have had a greater influence on international trade. The second factor which has thrown world trade out of gear and has profoundly affected its quantum as well as its direction, has been the great monetary changes leading to widespread instability in foreign exchanges. Many countries have been forced off the gold standard and some are deliberately manipulating their currencies as a policy towards the raising of prices and the improvement of trade and industry. The result has been wide fluctuations in exchanges and consequent obstacles to international trade. The price fluctuations resulting from these monetary changes have greatly influenced the trade in various commodities.* Lastly, there have been changes in the demand for, and supply of, individual commodities which have considerably influenced the trade in them. For example, variations in crops affect the trade in the commodities concerned very mate-Similarly a decline in industrial production reduces the trade in import-

^{*} See Appendix VIII for index numbers of prices in various countries. MCIDGCI&S

ant classes of raw materials. All these factors have greatly influenced world trade and prices during the period under review.

Apart from the general difficulties mentioned above there are certain practical limitations to the examination carried out in this report. As regards the material available for the discussion of India's export trade it must be remarked that the statistical data available at present are far from complete. The detailed figures of trade as published by most countries including the United Kingdom and India are not available for a considerable time after the close of the year to which they relate. In the case of the United Kingdom, certain important figures have had to be specially obtained from the Board of Trade and in the case of India the records of the Department of Commercial Intelligence and Statistics have been largely drawn upon. The statistics available from these sources at the present stage are in certain respects, necessarily, incomplete. In the case of the United Kingdom, the transit trade figures are not available and in the case of India, shipments "for orders" make the distribution of trade between the various countries difficult till information is received from exporters as regards the final destination. This has rendered the examination in the case of rice, oilseeds and a number of other articles to a large extent tentative. Further, there is the difficulty of reconciling trade figures for articles called by the same name. Each country has its own method of defining these articles and it is often difficult to have statistics prepared on a strictly comparable basis from the trade returns of the various countries. Even when such statistics are available the task of comparison may still be difficult as the trade years for which statistics are compiled differ in most countries. This difficulty is particularly felt in the chapter on exports where in each case figures of Indian exports are given in one table for financial years followed by another table giving the imports of the same article into the United Kingdom for calendar years. Differences in the two sets of figures are not infrequent and have been explained in certain cases where the discrepancy has been large. But apart from this, there is a special difficulty in examining the export position. For example, it may happen in the case of a particular commodity that exports to the United Kingdom may indicate a percentage fall as compared with the total exports or in other words, exports to other countries may have increased proportionately more than those to the United Kingdom. On the other hand. India's relative position in the United Kingdom market as disclosed by the United Kingdom import statistics in the same article may show a considerable improvement. In that case, different and almost contrary conclusions can be drawn from the two tables. It must, however, be clearly understood that the effects of the preference in such a case can be judged truly only from the position of India in the United Kingdom market. If India has improved her relative position in the United Kingdom as disclosed by her percentage share in the total United Kingdom imports then, other things being equal, the preference must prima facie be deemed to be valuable. Whether India's other customers have taken relatively more from her than the United Kingdom is not quite relevant to the issue. In cases therefore where the conclusion suggested by the Indian export table differs from that indicated by the United Kingdom import table in the same article, the latter must be considered to be more relevant to the discussion. After all, the preference is granted by the United

Kingdom and will naturally therefore affect the imports of Indian produce into that country. The relative position of India in that market will therefore supply the primary evidence necessary to judge the success or otherwise of the preference secured by India on her exports to the United Kingdom.

In the examination regarding prices there are even more serious practical difficulties. The quality of articles for which prices are taken in the various years may not be the same. The articles on which perference has been granted are manufactured articles in which standardization and grading, which are possible with bulk commodities, cannot easily be carried out. In the circumstances, the quality of the article though called by the same name may not be necessarily identical. Another practical difficulty as regards prices has been that in some cases these are controlled by "rings" and understandings among producers or dealers in those commodities. Lastly, it is difficult to get any comparative background for these price changes. It is not enough to know how prices have changed in India in order to estimate the effect of preserence. in other countries have changed in the same way the price changes in India must be presumed to be due to world movements and not to preferences. It is hardly possible, however, to obtain index numbers from other countries for the sort of articles on which preference has been granted. Index numbers in most countries are compiled from wholesale quotations of staple articles and standardized goods and cannot be usefully employed for comparison with prices of articles of the kind on which preference has been granted.

The main facts are summarised in the following tables. (For purposes of comparison three tables, Nos. VIII, IX and X, are given showing the percentage share of different countries in the total trade of British India.)

Table I.

Exports from India of articles enjoying preference.

					(Iı	In lakhs of rupees.)		
Total	value	•		1931-32.	1932-33.	1933-34.	1934-35.

CHAPTER II.

Exports from Ludia.

WHEAT.

A preference of 2 shillings a quarter (i.e., 480 lbs. or about 6 maunds) has been granted on imports into the United Kingdom from the Empire countries. The preference has been however of little value to India owing to her special wheat position. The Crop Planning Conference of 1934 came to the conclusion that India would not be in a position to export any appreciable quantity of wheat during the next few years. In the circumstances, the value of the preference was entirely problematical. The reasons for this position have been explained in last year's Report. Unless there was a failure of wheat crops in the world, India would not find it profitable to send any large quantity of wheat to the United Kingdom.

Preference on wheat imports from India has been granted in the United Kingdom and Ceylon.

The following table gives the exports of wheat from India during the last

Exports of wheat.

N.B.—Figures in brackets represent percentages of total.

The total exports from India in 1934-35 amounted to 11 thousand tons as compared with only 2 thousand tons in the preceding two years. In 1931-32, the exports were over 20 thousand tons.

four years:

The exports have been quite negligible in recent years and the consignments during the year under review were sporadic and probably due to the comparative shortness of the American crop resulting in occasional changes, during the year, in the price parity, favourable to India. The largest portion of the total exports went to the United Kingdom which purchased 8.6 thousand tons from India during 1934-35. Exports to Ceylon were negligible.

The following table gives the imports of wheat into the United Kingdom.

Imports of Wheat into the United Kingdom.

			Quantity o	wts. (000).			Value	£(000).	
Countries.		1931.	1932.	1933.	1934.	1931.	1932.	1933.	1931.

It will be seen from the table above that India occupies an insignificant place as a supplier of wheat to the United Kingdom. Out of the total imports ranging between 100 and 120 million cwts. India was responsible in two years for 482 and 166 thousand cwts. only.

The following table gives the market quotations for wheat in the United Kingdom and India:—

Prices of Karachi wheat were lowest in India in April 1934, when the quotation was $21 \, sh. \, 2\frac{1}{2} \, d$. After that month prices rose steadily till February 1935, when the quotation was $26 \, sh. \, 8\frac{3}{2} \, d$. There was a set back in March, however, which brought down the price to $23 \, sh. \, 10\frac{1}{4} \, d$. The price parity tended to become more favourable to Indian wheat from June till October 1935. After that for three months the parity was against India or November. After that for three months the parity was against India but in March 1935, it again veered round in favour of India. The favourable parity position in the middle of the year was responsible for the small exports that took place during the year.

RICE.

Preference to the extent of 1 penny a pound has been granted to cleaned rice imported into the United Kingdom. Rise is exported chiefly from Burma; India proper is a rice importing country. The difficulties of the Burma rice trade in recent years arose from the fact that China, Malaya, Burma rice trade in recent years arose from the fact that China, Malaya, Burma rice trade in recent years arose from the fact that China, Malaya, Burma and other countries in the far east which, so far as India is concerned, had been the principal importing countries, began to grow more rice themselves. The far eastern market in rice was thus contracting and this affected the three Asiatic rice exporting countries, namely, Burma, Siam and Indo-China. In view of the special position in the eastern markets, the preference on rice in the United Kingdom was considered to be of some importance. The handicaps from which Indian rice suffers were indicated in lattice and to make it suitable for consumption in the European, and chiefly the United Kingdom, market.

The following table gives the exports of rice (not in the husk) from

Exports of rice not in the husk (excepting broken cleaned rice).

N.B.—Figures in brackets represent percentages of total.

[†]This figure is provisional as there will probably be some further corrections due to consignments of 76,200 tons valued at Rs. 45,53,000 to United Kingdom " for orders " being re-distributed on later advices.

Preference has been granted in the United Kingdom and in some of the British Colonies. It is difficult to come to any conclusion from the table given above for the reason that the figure in the current year of exports to the United Kingdom includes 76 thousand tons sent for "for orders" which would be distributed later between the various countries for which the rice was really destined. How difficult the position is can be seen from the fact that last year when the Report was drafted, the exports to the United Kingdom were given as 89.7 thousand tons. After distributing the consignments "for orders" the correct figure was found to be only 43.9 thousand tons. It will be seen from the table that the total exports of rice (excluding broken cleaned rice) to all countries during 1934-35 amounted to 1,542 thousand tons as compared with 1,649 thousand tons in the preceding year. Exports to the United Kingdom including consignments "for orders" amounted to 136 thousand tons. If all the 76 thousand tons "for orders" are assumed to be destined for other countries then the exports to the United Kingdom would probably amount to about 60 thousand tons. Even then it is a considerable advance over the preceding two years' figures which were 44 and 41 thousand tons. Exports to British West Indies also record a considerable increase. On the other hand, shipments to non-preferential countries declined from 1,581 thousand tons in 1933-34 to 1,368 thousand tons in the year The decline in our trade with other countries was under review. due probably to the larger production of the eastern countries well as to the restriction on imports of rice introduced in some of the European countries. On the whole, the position from the point of view of our exports of rice to the United Kingdom appears to be favourable.

The following table gives the imports of cleaned rice, whole, into the United Kingdom:—

Imports of cleaned rice, whole, into the United Kingdom.

			Cwt	s. (000).	
		Total.	India.	Empire countries.	Foreign countries.
1931	 	 1,441	453	461	980
1932	 • •	 1,592	527	532	1,060
1933	 • •	 1,034	644	722	312
1934	 • • .	 1,358	808	953	405

Imports of rice into the United Kingdom during 1934 amounted to 1,358 thousand cwts. as compared with 1,034 thousand cwts. in the preceding year, or an increase of 31 per cent. The share of India was 644 thousand cwts. or 62 per cent. of the total imports in 1933. In the year under review India accounted for 808 thousand cwts. but her percentage share dropped to 59. The share of the foreign countries rose from 312 thousand cwts. or 30 per cent. in 1933 to 405 thousand cwts. which still constituted 30 per cent. in 1934. Other Empire countries increased their share from 8 to 11 per cent.

The Assembly Committee specially drew the attention of Government to the necessity of ensuring that the effectiveness of preference on whole rice was not diminished by the invasion of the United Kingdom market by foreign paddy. Mr. James in his supplementary note emphasized this point still further.

He pointed out that imports of paddy into the United Kingdom were increasing during 1934 and that the benefit of preference on whole rice to India would be neutralised in a short time by the heavy imports of foreign paddy. The position of imports of paddy may be examined in greater detail especially as the Assembly Committee last year laid special emphasis on this.

Early in 1934 the position was examined by the Indian Trade Commissioner in view of the increasing imports of foreign paddy into the United Kingdom. The situation which was disclosed as a result of the examination was There were three mills at that time capable of cleaning and polishing rice in the United Kingdom and one more mill was being erected. profit in husking foreign paddy was very considerable according to the trade The Indian Trade Commissioner was apprehensive that this high profit on the imports of foreign paddy might seriously affect the imports of Indian The total imports of paddy into the United Kingdom in 1933 were only 19% thousand cwts. In 1934 these had risen to 128 thousand cwts. first 3 months of 1935, imports rose to 154 thousand cwts. imports during 1935 were partly due to the expectation of a duty on foreign paddy. The Government of India, on the strength of the material before them, came to the conclusion that if our preference on rice imports into the United Kingdom was to be maintained, it would be necessary to press for a duty on paddy higher than 10 per cent. With this end in view they approached the Board of Trade and suggested a duty of two-thirds of a penny per lb., equivalent to about 75 per cent. ad val., of paddy. The suggestion was accepted by the Board of Trade and in April 1935 the duty on paddy was increased from 10 per cent. to the required level.

N.B.—Figures in brackets represent parities assuming the price of the Indian variety to be equal to 100.

Prices of Rangoon rice in India have been generally very much higher as compared with the previous year. The price parity in the United Kingdom was generally more favourable to Saigon rice as compared with the Burmese product. The parity of Saigon rice in April 1934 was 100. It dropped to 84

⁽a) End of month.

⁽b) Beginning of month.

^{*}On 2nd March 1934.

[†]On 15th February 1935.

by July of the year but rose again to 94 in September. In October it receded to 85 but in the next three months parity was on the rise, being over 100 in December and January. Towards the close of the year it was round about 95.

The following table gives the production of rice in India excluding Burma, Burma, Indo-China, Siam and Korea:—

Production of Rice.

o (In million tons.)

				India	a.			
				Excluding Burma.	Burma.	Indo- China.	Siam.	Korea.

1934-35		••	,	25.30	4.53	*	5 · 14†	*

^{*} Not available.

The crop of 1933-34 which was chiefly marketed in the year 1934-35 was larger in Burma, Indo-China and Korea but smaller in India proper and Siam. The smaller crop in India, however, considerably increased the demand in that market for Burma rice. As a result, the coastwise exports of rice, not in the husk, from Burma into India increased in 1934-35 to 2 million tons as compared with 1.6 million tons in 1933-34. The statistical position in 1934-35 is even more favourable to Burma as the Indian crop as well as the Burmese crop is slightly less than in the previous year. The crop in Siam, however, is slightly higher than in 1933-34.

VEGETABLE OILS.

This is a comprehensive group consisting of the following articles, viz., castor oil, coconut oil, linseed oil, rape oil, groundnut oil and sesamum oil. The two most important of these to India are castor oil and groundnut oil; the others are of minor significance from the point of view of Indian exports. The Indian Delegation to Ottawa held the view that the preference on this group of articles was of considerable value.

fall being from 49 to 41 per cent. At the same time, exports to countries not 743 thousand gallons as against 1,289 thousand gallons in 1933-34. The total exports to countries granting preference was 1,415 thousand gallons in 1933-34. It dropped to 886 thousand gallons in the year under review, the percentage granting preference declined from 1,500 thousand gallons in 1933-34 to 1,287 The total exports of vegetable oils from India have declined from 2.9million gallons in 1933-34 to 2.2 million gallons in the year under review. The share of the United Kingdom in the trade has also fallen off considerably being thousand gallons in 1934-35, though the percentage share rose from 51 to 59.

			U. K.	Br. Tot	i			

N.B.—Figures in brackets represent percentages of total.

The total exports of castor oil during 1934-35 amounted to 1,213 thousand gallons as compared with 1,335 thousand gallons in the preceding year and 1,125 thousand gallons in 1932-33. India has been granted preference as regards castor oil by the United Kingdom as well as by the British West India Islands. The share of the latter in the total trade is insignificant and need not be considered separately. The exports to the United Kingdom in 1934-35 were 612 thousand gallons as against 753 thousand gallons in 1933-34 and 767 thousand gallons in 1932-33. The percentage share of the United Kingdom has dropped to 50 during 1934-35 as against 56 in the previous year and 68 in 1932-33. On the other hand, exports to countries not granting presence has increased both absolutely and relatively in the last four years. The shipments amounted to 358 thousand gallons in 1932-33; they rose to 582 thousand gallons next year and to 601 thousand gallons in the year under review, the percentage increase being from 32 to 50 per cent.

The following table gives the imports of castor oil (unrefined) into the United Kingdom from various sources:—

Imports of unrefined Castor oil into the United Kingdom.

				[Tons	(000)].	
			Total.	India.	Empire countries.	Foreign countries.
1929		• •	3.7	1.6	1.6	$2 \cdot 1$
1930	••	• •	$2 \cdot 9$	1.4	1.4	1.5
1931	••	••	$3 \cdot 3$	2.1 (63.6%)	2·1 (63·6%)	1.2
1932	••	••	5.2	3.7 (71.2%)	3.7 (71.2%)	1.5
1933	••	•	3.0	3.1 (86.1%)	3.2 (88.9%)	0.4
1934	••	••	3.1	2.8 (90%)	2.8 (90%)	0.3

N.B.—Figures in brackets represent percentages of total.

The total imports of castor oil into the United Kingdom fell from 5.2 thousand tons in 1932 to 3.1 thousand tons in 1934. In 1932 India's share in the United Kingdom market was 3.7 thousand tons or 71 per cent. In 1933 though the imports from India declined to 3.1 thousand tons yet they accounted for 86 per cent. of the total imports. During the year under review imports from India were 2.8 thousand tons but even this small figure represented 90 per cent. of the total imports into the United Kingdom. Thus, it appears that the United Kingdom is meeting most of its castor oil requirements from Indian sources. It is true that the actual quantity bought is considerably reduced but India has been the chief supplier for the reduced purchases.

The following table gives the market quotations for castor oil in Calcutta and London and Hull:—

N.B.—Figures in brackets represent parities assuming the price of the Indian variety to be equal to 100.

Prices of Indian castor oil in the United Kingdom registered an upward tendency during 1934-35. The opening quotation in April 1934 was 21 sh. 9d. It remained round about 23 to 24 shs. in the middle of the year but in January 1935 it rose to 31 sh. 6d. Since then it dropped to 26 shs. The price of "Firsts" rose even more than in the case of the Madras variety.

The production figures of castor oil are not available as far as India is concerned. Figures of production in the United States of America and the European countries are given below:—

Production of Castor Oil.

Grand Total	•	•	38.0	38.0 44.1	67.1	63-7	63	7.1	1,10	1,04

N. B.-Figures in brackets represent percentages of total.

There are no exports of linseed oil from India to the United Kingdom and only a very small quantity is sent to Mauritius. India's chief markets therefore lie outside the countries granting preference. The total exports during 1934-35 amounted to 64 thousand gallons as compared with 67 thousand gallons in the preceding year and 44 thousand gallons in 1932-33. Thus, the trade was only slightly less than in the preceding year and much higher than in 1932-33. The share of Mauritius which was only 2 thousand gallons in 1933-34 rose to 5 thousand gallons in the year under review. The exports to Mauritius have shown considerable increase in the last three years but the figure is small and much stress cannot be laid on this improvement.

The following table gives the imports of linseed oil into the United Kingdom:—

Imports of Linsecd Oil in the United Kingdom.

								Tons (00)	0).
						Total.	India.	Empire countries.	Foreign. countries.
1929	••	• •	• •	• •		31	• •	0.007	31
1930	••	• •	• •	••	• •	43	• •	• •	43
1931		• •	• •	• •		37	• •	0.007	37
1932	• •	• •	• •			26		0.025	26
1933	• •	• •	• •			$7 \cdot 3$	• •	0.011	7.3
1934	••	• •	• •	••		33	••	0.003	33

Imports of linseed oil into the United Kingdom rose in 1934 to 33 thousand tons as against 7 thousand tons in the preceding year and 26 thousand tons in 1932. The figure of 1933 appears to be abnormal and the imports of the year under review are more in keeping with the earlier figures. There have been no imports from India in any of the years. The preference therefore on this item has little direct value though it is complementary to the preferences on other oils and on linseed.

The following table gives the market quotations for linseed oil in India and the United Kingdom:—

N. B.—Figures in brackets represent percentages of total.

Shipments from India during 1934-35 amounted to 39 thousand gallons as against 32 thousand gallons in the preceding year. The item is not of much importance from the point of view of the Indian trade. The share of the United Kingdom in the year under review was 16 thousand gallons or 41 per cent. This was slightly larger than in the preceding year.

The following table gives the imports of coconut oil (refined and unrefined) into the United Kingdom:—

Imports of Coconut Oil (Refined and Unrefined) into the United Kingdom.

						Total.	India.	Tons (0 Empire countries.	00). Foreign countries.

1931	**	**	••	••	••	43-5	0-27	9,0	34.5
1932	**	••	**	••	••	25-3	0-27	8-3	17.0
1933	••	••	••	••	**	13-4	0.14	8.7	4.7
1934	**	••	••	••	••	20-8	6.22	16.7	4-1

Imports during 1934 rose to 21 thousand tons as against 13 thousand tons in the preceding year and 25 thousand tons in 1932. India's share in the trade, however, was insignificant.

Production figures for India and other countries are not available.

GROUNDNUT OIL.

Of the Empire countries which offer preference in groundaut oil India has trade with the United Kingdom, the Federated Malaya States and Mauritius. The following table gives the exports of groundaut oil from India in the last four years:—

Exports of Goundant Oil.

Exports of groundnut oil have fallen off sharply during 1934-35 amounting only to 275 thousand gallons as compared with 716 thousand gallons and 917 thousand gallons in the preceding two years. The largest fall in the exports has been in the case of the United Kingdom which purchased only 89 thousand gallons during the year under review as compared with 507 thousand gallons in 1933-34 and 664 thousand gallons in 1932-33. On the other hand, the share of Mauritius in 1934-35 was more than double of that in the previous year. Exports to foreign countries declined appreciably though not to the same extent as in the case of the United Kingdom. What this great fall in the demand is due to is not yet clear. As will be seen from the table of prices, the fall cannot altogether be explained on the ground of changes in price parity. Nor do the figures of crop production in India in the season ending September 1934 throw any light on it.

The imports of groundnut oil (unrefined) into the United Kingdom amounted to 3.5 thousand tons in 1934 as compared with 4.0 thousand tons in 1933 and 3.7 thousand tons in 1932. Thus, the reduction in the total imports is not very pronounced amounting only to about 12 per cent. On the other hand, imports from India declined very sharply from 3.8 thousand tons in 1933 to less than 1 thousand tons during 1934. Thus, India's percentage share in the trade dwindled from 95 per cent. to 28 per cent. On the other hand, the share of foreign countries which was 200 tons in 1933 rose to 2.5 thousand tons in 1934, the increase in the percentage share being from 5 per cent. to 72 per cent.

Prices of groundnut oil rose generally in 1934-35, the increase being slightly greater in the case of Indian oil. The parity figure has varied between 100 to 108 for most of the months except in February 1935 when it was 115. During 1933-34 the parity varied generally between 104 and 113 except for one month when it was 95. The parity position therefore does not explain the unfavourable position of groundnut oil in the United Kingdom.

Figures of production of groundnut oil in India are not available. Figures of production in France and Germany are given below:—

RAPESEED OIL.

India has been granted preference by the United Kingdom, the British West Indies and Fiji. By far the most important customer for India in the British Empire is Fiji. The following table gives the total exports of rapeseed oil from India.

Exports of rapeseed oil.

N.B.—Figures in brackets represent percentages of total (a) Rate refers to Jamaica.

The total exports during 1934-35 amounted to 295 thousand gallons as compared with 263 thousand and 226 thousand gallons in the two preceding years. The share of the countries granting preference, registered a decline both relatively and absolutely in 1934-35 being 62 thousand gallons or 21 per cent. of the total export trade as compared with 73 thousand gallons or 28 per cent. in 1933-34 and 101 thousand gallons or 45 per cent. in 1932-33. Purchases by countries not granting preference rose during the last three years from 125

thousand or 55 per cent. in 1932-33 to 190 thousand gallons or 72 per cent. in 1933-34 and 233 thousand gallons or 79 per cent. in the year under review. The share of the United Kingdom was almost the same as in the preceding year, whereas that of Fiji was less by 7 thousand gallons.

The following table gives the imports of rapeseed oil into the United Kingdom.

Imports of Rapeseed oil into the United Kingdom.

					Tons (Tons (000)

Imports of rapeseed oil rose from 270 tons in 1933 to 630 tons in 1934. The imports before 1931 were much greater. Figures of India's share before 1933 are not available. In that year, India sent about 70 tons of rapeseed oil to the United Kingdom; the figure remained unchanged in 1934. On the other hand, the share of foreign countries rose from 190 tons in 1933 to 560 tons in 1934.

SESAMUM OIL

India has been granted preference in the United Kingdom and the Federated Malay States. The following table gives the exports of sesamum oil from India in the last four years.

Exports of Sesamum Oil.

India had exported very little sesamum oil to the United Kingdom in the earlier years. In the year under review, however, she sent 8,600 gallons to that country as compared with 10, 20 and 40 gallons in the previous years. The total exports also registered an advance from 104 thousand gallons in 1933-34 to 126 thousand gallons in 1934-35.

Production figures for India are not available. Those for Japan, Italy and Denmark are given below:

(a) Not available.

MAGNESIUM CHLORIDE.

The manufacture of magnesium chloride is a comparatively new industry in India and is carried on in one of the salt areas in Kathiawar. From the information supplied by the producers it seemed probable to the Indian Delegation that a preference of 1s. per cwt. would enable the Indian makers to supply part of the requirements of the British market which, till recently, was regarded as a German monopoly.

The production of magnesium chloride in India is mainly confined to a single factory whose products find a market not only in India but also in the United Kingdom, the Netherlands and even in Germany. The annual output during the three years ending 1932-33 was 4,200, 7,600 and 7,650 tons respectively. Later figures of production are not available. The export of this article has been separately recorded in the Indian trade returns only since 1933-34. The exports from India since 1933-34 are shown in the table below:—

Exports from India (in tons).

			,		To	United Kingdom.	Total.
1933-34	• •	••	••	••	• •	643	1,080
1934-35	• •					967	1.332

It will be noticed that the total Indian export trade in this article has increased by 23 per cent, entirely as the result of a greater off-take by the United Kingdom which has much more than off-set a lesser demand from other markets.

Statistics of imports of magnesium chloride are not separately recorded in the United Kingdom trade returns. The price in the United Kingdom of the German variety of this chemical rose as soon as the scheme of preference was given effect to, and has remained steady ever since. It is understood that the price of the Indian variety is lower by £1 per ton.

LINSEED.

The preference on the imports of linseed into the United Kingdom from India was considered by the Indian Delegation to Ottawa, of great value to this country. The Departmental Report on the working of the preference scheme during 1933-34 showed that Indian trade in linseed had benefited to MC1DGCI&S

some extent by this preference. The position of the linseed trade during 1934-35 is shown in the table below:—

Exports of Linsevd from India.

						(In thousand tons.)				
	Yes	ır.		Total exports.	United Kingdom.	All Empire countries.	All foreign countries.

1932-33		••	• •	$72 \cdot 2$	14.3	$23 \cdot 7$	48.5			
1933-34		• •	• •	378.9	176-4	188.4	190.5			
1934-35				238 · 4	103.8	132.5	105.9			

Preference has been granted to Indian linseed by the United Kingdom and Fiji; the share of the latter, however, in the total trade is very small-India's exports to the United Kingdom amounted to 14 thousand tons only in 1931-32 and in 1932-33. In 1953-34 they reached the large figure of 176 thousand tons but during the year under review shipments to the United Kingdom amount to only 104 thousand tons. It has to be noted, however, that the total exports have also greatly shrunk during 1934-35. In the preceding year they had amounted to 379 thousand tons; during the year under review they were only 238 thousand tons, a drop of 141 thousand tons. share of the United Kingdom in the total exports during 1934-35 declined to 44 per cent. as against 47 per cent. in the previous year. Other Empire countries, however, increased their takings from about 12 thousand tons to nearly 29 thousand tons. The percentage share of the exports to the Empire countries showed some increase during 1934-35 as against the preceding year. On the other hand, shipments to foreign countries showed a large absolute as well as percentage decrease as compared with the earlier year. Exports to foreign countries during 1933-34 amounted to 190 thousand tons or nearly 50 per cent. of the total exports. During 1934-35 they shrank to 106 thousand tons or a little over 44 per cent. Thus, India's exports to the United Kingdom. did not fall off to the same extent as those to other foreign countries.

free 12 h

The total imports of linseed into the United Kingdom during 1934 amounted to 184 thousand tons as compared with 249 thousand tons in the previous year and 362 thousand tons in 1932. Imports during these two years have therefore been considerably on the decline, the decline during the latter year being 26 per cent. as compared with 1933. Inspite of this decrease in the total imports the share of India showed an actual increase. India sent 131 thousand tons to the United Kingdom market during 1933. In the latest year she sent 140 thousand tons. Her share during 1933 was 53 per cent.; in 1934 it amounted to 76 per cent. The share of Argentina, on the other hand, dropped off greatly during 1934 as compared with the previous two years. In 1933 shipments from the Argentina amounted to 113 thousand tons or 45 per cent. of the total imports into the United Kingdom. During the year under review they amounted to only 44 thousand tons or 24 per cent. to be borne in mind, however, that the two crops in Argentina during 1932-33 and 1933-34 were comparatively short, being 1.4 and 1.3 million tons, respectively, as compared with about 2 million tons in the earlier two years. price factor also throughout the larger portion of the year has been in favour of India as will be seen from the following table:-

N. B.—Figures in brackets represent parities assuming the price of the Indian variety to be equal to 100.

The parity figure of La Plata seed was 83 in March 1934. It rose to 85 at the beginning of the year 1934-35 and was 89 in October 1934, and this in spite of the fact that the Argentine peso was considerably depreciated during this period. The news about the good La Plata crop at the end of 1934 brought down the parity against India, the percentage figure in February 1935 being 76 or a drop of 13 points as compared with the preceding October. Thus,

⁽a) End of month.

⁽b) Beginning of month.

^{*}Quotation on March 23rd.

for the larger part of 1934-35 the parity was in favour of Indian linseed taking into consideration its better quality. The price of linseed in Bombay reached a very high level in May 1934, being Rs. 7-2-0 per cwt. In the next five months it dropped steadily, the quotation in October being Rs. 6-1-0. Prices were again on the rise from November and the quotation in January stood at Rs. 7-3-0. Next month, however, prices fell off to Rs. 6-5-0 and the year closed with Rs. 6-4-0.

The following table gives the production of linseed in the chief producing countries:

Production of Linseed.

	•	I	Acres (000).			Tons (000).			
		India.	Argentina.	U. S. A.	India.	Argentina.	U. S. A.		
1928-29		3,109	6,936	2,674	322	1,955	497		
1929-30		2,802	5,229	3,046	380	1,247	397		
1930-31		3,009	6,746	3,734	377	1,954	531		
1931-32		3,309	8,260	2,415	416	2,222	294		
1932-33	• •	3,299	7,401	1,975	406	1,432	292		
1933-34		3,257	6,852	1,283	377	1,316	170		
1934-35		3,381	6,919	974	418	1,927	131		

The area under linseed in 1934-35 is the largest in the last seven years. The outturn has also increased moderately in India and very largely in Argentina. The United States of America crop on the other hand is the lowest for many years.

COFFEE.

India and other Empire countries were granted preference of 9 shillings 4d. a cwt. or 1d. a pound in the United Kingdom by the Ottawa Agreement in place of the old Empire preference of 2/4 a cwt., the increased preference coming into force on 17th November 1932 so far as India was concerned. Committee appointed by the Legislative Assembly to examine the Departmental Report on the Working of the Scheme of Preferences during 1933-34 were of opinion that though the coffee preference had been of advantage to the Empire countries it had not enabled India to do more than maintain her position in the United Kingdom market. The Committee recommended to Government to consider the possibility of securing an increased preference for Dr. DeSouza who wrote a supplementary note to the Report of the Committee was even more emphatic than this. He remarked that the preference had been of no benefit to the Indian producer but on the other hand Indian trade had received a set-back in the United Kingdom market. thought that neither the absence of propaganda in the United Kingdom nor the alleged deterioration of quality could fully account for the fall in trade with the United Kingdom. In his opinion the most serious rival to Indian coffee was the coffee from Costa Rica which normally commanded a higher price and was therefore in a better position to stand price-cutting. fore pressed the demand of the United Planters' Association of Southern India that the preference should be raised to 2d. a lb. Without this India's chances of successfully competing against Costa Rica coffee were considered by the Association to be remote. In order to see the position clearly it is desirable to set out in detail the statistics of trade. The following table analyses the position as regards the exports of coffee from India:

101011 445 = -0		Tomo	rts of Col	Tee from	India.		,	
		Ехро	ris of Ool	joo jiram		[Cwt. (000).]		
			Total exports.	U. K.	All Empire countires.	France.	All Foreign countries.	
			197.6	40.8	$62 \cdot 8$	$56 \cdot 2$	134.8	
1928-29	• •	• •	$184 \cdot 2$	68.5	$86 \cdot 3$	43.8	$97 \cdot 9$	
1929-30	• •	• •	292.9	78.5	97 · 1	$107 \cdot 7$	195.8	
1930-31	• •	• •		44.1	50.8	43.1	104.8	
1931-32	. •	••	155.6	51.9	59.5	54.4	113.7	
1932-33	• •	• •	$173 \cdot 2$	50.4	57.9	60.2	$128 \cdot 1$	
1933-34		• •	186.0	36.0	44.0	53.0	$97 \cdot 0$	
1934-35		• •	141.0	30.0	77 0	50 0		

The total exports of coffee from India during 1934-35 amounted to 141 thousands cwts. as against 186 thousand cwts. in the preceding year and 173 thousand cwts. in 1932-33. Thus, the exports during the year under review have fallen by nearly a quarter as compared with 1933-34. The total exports from India to the United Kingdom during 1934-35 were only 36 thousand cwts. In 1933-34 the exports amounted to 50 thousand cwts.; in 1932-33 they were 52 thousand cwts. Thus, there has been a drop in the exports of Indian coffee to the United Kingdom during the year under review. The percentage share of the United Kingdom in the total exports in 1933-34 was 27. In 1934-35 it dropped to a little under 26 per cent. On the other hand, the share of France which is one of our best foreign customers increased from 32 per cent. to nearly 38 per cent., the total share of foreign countries in the same period, however, remaining unchanged.

The position may be studied from the point of view of the imports into the United Kingdom from the figures shown in the following table:—

Imports of Coffee into the United Kingdom.

	Imports	טון טטווטט	, almo on	,,,	U		
•	1	J U		•		[Cwt.	(000).
	Total imports.	India.	B. E. Africa.	All Empire countries.	Costa Rica.	Nica- ragua.	All Foreign countries.
	558	24	178	204	259	12	354
1929	• •	89	324	418	305	15	397
1930	815	46	290	339	291	30	412
1931	751		276	329	227	26	413
1932	742	50	280	329	238	10	330
1933	659	45	133	186	243	19	356
1934	542	49	199	100	- ' 1	7	• 7 177

The total imports of coffee into the United Kingdom showed considerable decline in the last five years. In 1930 the United Kingdom imported 815 thousand cwts. of coffee. By 1933 the figure had fallen to 659 thousand cwts. and in the year under review there has been a further decline to 542 thousand cwts. In 1933 India shipped 45 thousand cwts. to the United Kingdom accounting for 7 per cent. of the total imports. In 1934 consignments from

India were 49 thousand cwts. and accounted for 9 per cent. of the total imports into the United Kingdom. Thus, the position of Indian coffee in the United Kingdom imports has registered a slight improvement. It has to be noted, however, that Costa Rican coffee has also improved its position during 1934 as compared with the preceding year. Imports from that country into the United Kingdom were responsible for 36 per cent. in 1933. In 1934 they were 45 per cent. of the total imports. On the other hand, imports from British East Africa went down very considerably during the year 1934 amounting to 133 thousand cwts. or 25 per cent. as compared with 280 thousand cwts. or 42 per cent. of the total imports in 1933. This considerable fall in the imports from British East Africa has been partly due to the shorter crop in Kenya during 1933-34, amounting to 26.3 million lbs. as compared with 35.5 million lbs. in the preceding year, a drop of over 25 per cent.

The following table shows the production of coffee in the various countries which are important producers:

Prod ction of Coffee.

					<i>V W</i>			
							(Million	lbs.)
					India.	Costa Rica (a).	Uganda and Nyasaland	Kenya. d.

Production of coffee in India increased in 1933-34 as compared with the previous year. Production in Kenya, on the other hand, fell off by nearly 25 per cent. in the year 1933-34 as compared with 1932-33. The outturn of Costa Rican coffee in 1933-34 was also two-thirds of that in 1932-33.

The following table gives the market quotations for coffee in London for the three principal competing varieties, namely, Costa Rica, Mysore and Kenya.

Figure	es in br	ackets	rep	resci	ıt p	arities	assu	ıming t	he pri	ce of	the Indi	ian va	riety	to be

Figures in brackets represent parities assuming the price of the Indian variety to be equal to 100.

Prices of coffee in the United Kingdom have remained remarkably steady during the year 1934-35. In fact, there have no been no variations either in respect of the maximum or the minimum. Indian prices at Bangalore showed a considerable decline during the year under review. In April 1934 the quotation was Rs. 17 per 28 lbs. of Nilgiris Parchment coffee. It declined consistently during the next 12 months, the quotation in March being Rs. 14-8-0 or a drop of Rs. 2-8-0.

TEA.

The preference on tea was considered of great importance by the Indian Delegation and by the majority in the Special Committee of the Legislative Assembly in 1932. The effects of the preference, however, have been completely obscured by the introduction of the Tea Export Restriction Scheme which came into force during 1933. The object of the preference was clearly to increase or at least to maintain the United Kingdom market for Indian tea by making competition from non-Empire producers more difficult. The object of the restriction scheme, as its name suggests, however, was to restrict the exports of tea. By the agreement arrived at by the chief producing countries both the exports and the extension of production of tea were regulated. tea industry therefore is now working almost entirely under regulation. result has been that the benefit of the preference in extending the export markets as well as in increasing production could not operate. It is of little use therefore to try to isolate the effects of the preference on the tea trade while the restriction scheme is in operation. A brief examination of the trade statistics however is given below.

India has received preference in the United Kingdom, Ceylon and a number of British Colonies. The following table shows the exports of tea during the last three years:—

MCIDGC1&S

		į								

Norm.—Figures in brackets represent percentages of total.

* Rate refers to Jamaica.

† Tea consigned from British India to Ceylon is almost entirely transhipped at Colombo to other countries and does not, therefore, appear in the Ceylon Custom returns as import into Ceylon.

The total exports during 1934-35 amounted to 325 million lbs. as compared with 318 million lbs. in the previous year. The figure was within the quota fixed for the year. The share of the United Kingdom was 289 million lbs. in the year under review as compared with 276 million lbs. in 1933-34. The share of all the countries granting preference advanced from 88 per cent. in 1933-34 to 90 per cent. in the year under report.

The following table gives the imports of tea into the United Kingdom:—

Imports of tea into the United Kingdom.

			,	,				Lbs. (0	00).

1934		• •	• •	• •	• •	,	(54%)	(86%)	(14%)
							4	-C+-4-1	

N.B.—Figures in brackets represent percentages of total.

The total imports of tea during 1934 amounted to a little under 508 million lbs. as compared with 505 million lbs. in 1933. India's share in the trade in 1934 was 275 million lbs. as against 280 million lbs. in the preceding year or a fall of 5 million lbs. As a result of this, her percentage share receded by 1 point to 54. The share of other Empire countries excluding India showed a slight increase. Shipments from foreign countries, though maintaining the same percentage share, were nearly 3 million lbs. less in 1934 as compared with the preceding year. The position is almost the same as in the previous year as far as the relative position of the various countries is concerned.

(a) Middle of month; with export rights from June, 1933.

(b) Week ending 13th December. 1934.

* Week ending December 20th, 1932.

Prices in India moved generally downwards, during 1934-35. The opening quotation in June was 10 as. 1 pie per lb. By January 1935 it had dropped to 8 as. or a fall of more than 20 per cent. In February the quotation declined still further to 6 as. 7 pies. India's price position in comparison with Ceylon was unfavourable in the first half of the year but improved greatly from October till the end of the year. The parity figure of Ceylon tea expressed as a percentage of Indian price was 112 in April. By August it had dropped to 91 and in September it was 98. It rose rapidly after that and in March 1935 it amounted to 142. The parity of Java tea was, on the whole, more favourable to India than in the preceding year.

The following table gives the production of tea in India, Ceylon and the Dutch East Indies. In the case of the two latter countries, figures of actual production are not available and the exports figures only are given.

Production of Tea.

			•			Lbs. ((000).

•	•		(a)	Export:	figures only.		•

Production during 1933-34 which was chiefly exported in 1934-35 was 383 million lbs. as compared with 434 million lbs. in the preceding year. Production of Ceylon and Dutch Indies also recorded decreases. This is mainly the result of the Tea Restriction Scheme.

COIR YARN AND COIR MATS AND MATTINGS.

The Indian Delegation emphasized the insurance value of preference under this item in as much as it ensured the maintenance of the position which India had already acquired in the United Kingdom market. There is a considerable trade in these articles from Travancore and the figures for that State have been included in arriving at the total exports from India. The Travancore figures are partly given in weight and partly in yardage. The portion, however, given in yardage is comparatively a small one. Coir yarn and coir mats and mattings have been separately specified in the Indian trade accounts only since 1933-34. In earlier years these items were combined under one head "coir manufactures". Comparison with these years is therefore possible only on the basis of the total 'coir manufactures' exported.

The following table gives the exports of coir manufactures from India including Travancore:—

. Exports of Coir manufactures from India (including Travancore).

Norm.-Figures in brackets represent percentages of total exports.

The total exports of coir manufactures in 1934-35 amounted to 806 thousand cwts. as compared with 961 thousand cwts. in the preceding year and 779 thousand cwts. in 1932-33. Exports have thus declined very considerably during the year under review. The share of the United Kingdom in 1934-35 amounted to 194 thousand cwts. or 24 per cent. of the total exports as compared with 270 thousand cwts. or 28 per cent. in the preceding year. Thus, the shipments to the United Kingdom have declined both absolutely and relatively during 1934-35. Exports of coir yarn only have dropped from 762 thousand cwts. in 1933-34 to 730 thousand cwts. in 1934-35, but the share of the United Kingdom rose in the same period from 128 thousand to 138 thousand cwts. Exports of coir mats and mattings have contracted very greatly amounting to 76 thousand cwts. in 1934-35 as compared with 184 thousand cwts. in the previous year. Consignments to the United Kingdom have also dropped from 129 thousand cwts. in 1933-34 to 56 thousand cwts. in 1934-35 which is approximately the same proportion as the fall in total exports.

Figures of imports into the United Kingdom are separately available for coir yarn and coir mats and mattings. These figures cannot be combined, as coir yarn is given in cwts. whereas mats and mattings are recorded in square yards. The two have to be treated separately therefore when considering the imports into the United Kingdom.

The following table gives the imports of coir yarn into the United Kingdom:—

			Im	ports of	coir yarn	into the	United K	ingdom.

The total imports of coir yarn in 1934 amounted to 153 thousand cwts. which meant an increase of 5 thousand cwts. as compared with the preceding year. The imports during the year under report, however, are considerably below those in 1932 and earlier years. India's share in 1934 amounted to 124 thousand cwts. which is 1 thousand cwts. less than in the previous year. The percentage share of India has dropped by 3 points. The share of Ceylon in the

trade rose from 23 thousand cwts. in 1933 to 28 thousand cwts. in 1934, the percentage share increasing by 2 points. There are practically no imports from foreign countries and as Ceylon is also an Empire country it is difficult to measure the effect of the preferential duties on the imports under this article.

The following table gives the imports of coir mats and mattings into the United Kingdom.

Imports of coir mats and mattings into the United Kingdom.

				(a) Not avail	able.							

The total imports into the United Kingdom in 1934 amounted to 7.9 million square yards as compared with 8.5 million square yards in the previous year and 7 million square yards in 1932. India's share in the trade was 7.8 million square yards as compared with 8.4 million square yards in the previous year. During the last three years, India has, more or less, mopolised the market, her share being between 98 and 99 per cent. of the total imports. Before 1932, however, foreign countries, especially Belgium, used to send considerable quantities of coir mats and mattings to the United Kingdom.

The following table gives the market quotations for coir yarn in the United Kingdom:—

Prices for the Cochin variety in London dropped slightly in May 1934 and remained at that level till July. In August there was a further fall followed by another in December. The quotation remained unchanged in the first 3 months of 1935. The quotation for the Ceylon variety dropped in May 1934 and remained steady at that level almost throughout the rest of the year. Prices of the Indian variety have thus fallen in larger measure as compared with the Ceylonese product. The parity consequently was in favour of India for a considerable portion of the year.

COTTON YARN.

Preference has been granted in the United Kingdom and in Ceylon on all counts of cotton yarn. The total export trade under this item is very small in relation to the production for consumption at home. India has been producing more than 900 million lbs. in the last three years. Her total exports in the same period has been round about 15 million lbs. or less than 2 per cent. Apart from this, exports to the countries granting preference are still smaller, amounting to a little over one-third of a million lbs. in 1934-35.

The following table gives the exports of cotton twist and yarn from India:—

Exports of Cotton Twist and Yarn.

* The exports to the United Kingdom consist almost entirely of counts upto 40's grey, unbleached,

The total exports to countries not granting preference during 1934-35 amounted to 12·4 million lbs. as compared with 15·8 million lbs. in the preceding year and 14·8 million lbs. in 1932-33. Despatches to the United Kingdom decreased from 440 thousand lbs. in 1933-34 to 236 thousand lbs. in the year under review and those to Ceylon from 172 thousand lbs. to 148 thousand lbs. in the same period.

The following table gives the imports of cotton yarn, grey (unbleached), up to 40's into the United Kingdom:—

Imports of cotton yarn (Grey, unbleached) upto 40's into the United Kingdom.

Lbs. (000).

					Total.	India.	Empire countries.	Foreign countries.

1934		••	••	••	1,217	380	380	837

There was some increase in the imports of cotton yarn into the United Kingdom in 1934, but the figure was still much less than in 1931 an earlier years. The total imports in 1934 amounted to $1\cdot 2$ million lbs. as against 810 thousand lbs. during the preceding year. Imports in 1931 were over 8 million lbs. India's share in 1934 has more than doubled as compared with the preceding year amounting to 380 thousand lbs. The share of foreign countries also shows an increase though not to the same extent as in the case of India.

The following table gives the imports of cotton yarn and twist into Ceylon:—

Imports of cotton twist and yarn into Ceylon.

Total imports into Ceylon in 1934 amounted to 205 thousand lbs. as against 202 thousand lbs. in 1933. India's share in the year under review was 127 thousand lbs. or 62 per cent. of the total imports as compared with 142 thousand lbs. or 70 per cent. in 1933. On the other hand, the share of the United Kingdom has grown in the same period. Ceylon purchased 39 thousand lbs. or 14 per cent. of her requirements from that country in 1932. Next year, the purchases went up to 54 thousand lbs. or 27 per cent. In the latest year, imports from the United Kingdom amounted to 69 thousand lbs. or 34 per cent. The share of foreign countries is negligible.

COTTON MANUFACTURE. :

Preference to Indian cotton manufactures has been granted in the United Kingdom and some of the British Colonies. As far as the United Kingdom is concerned, the preference is of little value in the case of mill-made goods, but Indian handloom products have a small market in the United Kingdom. Most of the important colonies have not granted preference to India in the case of cotton manufactures. Nearly 50 per cent. of her total exports of cotton manufactures are absorbed by the Colonies, yet the value of the trade with the Colonies granting preference amounts to less than Rs. 14 lakhs out of a total of Rs. 141.34 lakhs which is the value of exports to Empire countries excluding the United Kingdom.

The following table gives the exports of cotton manufactures excluding twist and yarn:-Exports of Cotton manufactures (excluding Iwist and Yarn).

						-				

Note:—No preference has been given by Ceylon in cotton piecegoods.
* Includes figures for made-up cotton goods.
† The margin of preference in respect of carpets, etc., and lace and lace net is somewhat different.

Preference has been granted on cotton manufactures in the United Kingdom, Federated Malaya States, Mauritius and in several other small colonies. The total value of the exports of cotton manufactures in 1934-35 amounted to Rs. 203 lakhs as compared with Rs. 192 lakhs in 1933-34. The value of exports in earlier years was much larger. The share of the United Kingdom was worth Rs. 6 lakhs only as compared with Rs. 13 lakhs, the value in the preceding year. Shares of all the colonies except Sierra Leone show increases; in the case of Sierra Leone the value of exports is exactly the same as in the preceding year. The total value of the trade with countries granting preference in 1934-35 was Rs. 19 lakhs which was approximately the same as in the preceding year.

The following table gives the imports of cotton manufactures (excluding twist and yarn) into the United Kingdom.

Imports of cotton manufactures (excluding twist and yarn) into the United Kingdom.

Figures in brackets represent percentages of total

The total imports into the United Kingdom during 1934 were worth £2·14 million as compared with £2·01 million in 1933. Imports were valued at a much higher figure in 1931 and earlier years. Imports from India and other countries are not separately available for 1934 at this stage.

HIDES AND SKINS.

Preference was granted by the United Kingdom on leather, undressed. India's exports to the United Kingdom consist predominantly of tanned hides and skins. India sends more than 90 per cent. of her exports under tanned hides and skins to the United Kingdom and supplies about three-fourths of the total imports into the United Kingdom of undressed leather. From these figures it will be seen that there is not much scope for the substitution of Indian for foreign produce.

HIDES, TANNED.

The following table gives the exports of tanned hides from India :-

Exports of Hides Tanned or Dressed from India.

The total exports from India during 1934-35 registered a shrinkage of 36 thousand cwts. as compared with the preceding year amounting to 227 thousand cwts. In 1932-33 exports were however much smaller being 181 thousand cwts. The share of the United Kingdom which generally takes most of our tanned hides has also naturally declined being 223 thousand cwts. in the year under review as compared with 260 thousand cwts. in the preceding year. The share of foreign countries is negligible.

The following table gives the imports of hides, undressed (other than for soles), into the United Kingdom.

Imports of Hides Undressed (other than for soles) into the United Kingdom.

		•			(In tho	usand Cwts.)	
				Total.	India.	Empire countries.	Foreign countries.
1931	• •	• •	• •	$297 \cdot 5$	188.6	$195 \cdot 6$	$101 \cdot 9$

1934	• •	• •	• •	$271\cdot 7$	$239 \cdot 6$	(a)	(a)
			(a) No	t available.			

The total imports of hides into the United Kingdom in 1934 amounted to 272 thousand cwts. which meant a small increase of 4 thousand cwts. as compared with the preceding year. India's share in the trade in 1934 amounted to 240 thousand cwts. which is 4 thousand cwts. more than in 1933. The shares of other Empire countries and forcign countries are not separately available for 1934, but the combined share in 1934 appears to be the same as in 1933.

The following table gives the market quotations for hides in India and the United Kingdom.

The total exports of tanned skins during 1934-35 were the same as in the preceding year being 131 thousand cwts. Under this head also, the United Kingdom generally absorbs about 90 per cent. of our total exports. Shipments to that country in the year under review amounted to 114 thousand cwts. as against 116 thousand cwts. in the previous year. Exports to countries not granting preference showed a small increase of 2 thousand cwts.

The following table gives the imports of skins, undressed, into the United Kingdom.

Imports of Leather, Undressed-Skins into the United Kingdom.

						Quantity (Cwts. (000).	
			•		Total imports.	From British India.	From Empire Countries.	From Foreign Countries.
1929	• •	• •	• •		$173 \cdot 5$	$115 \cdot 5$	$125 \cdot 9$	47.6
1930	••	4.	• •	••	159 • 4	101.6	$117 \cdot 3$	42.1
1931	••	• •	• •		147 · 8	$98 \cdot 5$	115.8	31.9
1932	••	••	• •	. •	141.7	102.1	119.5	$22 \cdot 3$
1933	• •	• •	• •	. •	158.4	111.7	$134 \cdot 2$	$24 \cdot 2$
1934	• •	• •		. •	$165\!\cdot\!0$	$123 \cdot 5$	143.5	$21 \cdot 5$

The total imports into the United Kingdom in 1934 amounted to 165 thousand cwts. which meant an increase of 7 thousand cwts. over the preceding year. India's share in the year under review amounted to 124 thousand cwts. as against 112 thousand cwts. in 1933. The share of the other Empire countries has dropped by about 3 thousand cwts. and that of foreign countries by about the same amount. Thus, India has gained ground in the United Kingdom market at the cost of the other Empire countries and foreign countries.

The following table gives the market quotations for skins in India and the United Kingdom.

Prices of superior goat skins in Bombay appreciated from Rs. 0-14-6 per lb. in April 1934 to Re. 1 a lb. in September. In the next four months the price remained steady at 15 annas but again rose to Re. 1 in February 1935. In March, however, the price again receded to 14 annas. On the whole, prices were generally steady with a slightly upward tendency. On the other hand, the price of inferior goat skins declined almost consistently during the year, the quotation in April being Re. 0-12-6 and that in March 1935 being only 8 annas. In the United Kingdom, prices of the heavier variety fluctuated widely during the year. The general tendency, however, was towards lower prices. On the other hand, quotations for the lighter variety registered some increase during the year under review.

JUTE MANUFACTURES.

It was pointed out in last year's report that the preference on jute manufactures in the United Kingdom had a great insurance value in as much as it offered the United Kingdom market to the Indian jute industry on equal terms with the British industry. It was admitted that the scope for expansion of Indian exports was very moderate but the retention of the existing market was considered as valuable as capturing new ones.

The following table gives the value of exports of jute manufactures from India:-

		United Kingdom	Sierra Leone (Jute bags)	British Guiana	baya). Fiji (Juto bags)	Total of trade with countries—	Granting preference Not granting preference	GRAND TOTAL

India has received preference of 20 per cent. on all manufactures in the United Kingdom and for bags only, at 1 sh. per 100 lbs. in Sierra Leone, 3 per cent. in British Guiana and 15 per cent. in Fiji. By far the most important of these markets is the United Kingdom; the share of the Colonies is comparatively insignificant and need not therefore be considered separately. The total value of exports in 1934-35 amounted to Rs. 21,47 lakhs as compared with Rs. 21,37 lakhs in the preceding year, showing a small increase of Rs. 10 lakhs. It will be seen that in the last four years the value of the trade has varied between Rs. 21 and 22 crores. From Rs. 186 lakhs in 1931-32 the value of the exports to the United Kingdom fell to Rs. 160 lakhs in 1933-34. In the year under review almost the same figure is maintained.

The following table gives the imports of jute piecegoods into the United

Kingdom:—

Imports of jute piecegoods into the United Kingdom.

						$\{\ln \mathbf{s}q.\ \mathrm{yds.}\}$	(000)].
	r ~			Total.	India.	Empire	Foreign

1932		 		 68,666	67,332	67,887	779
1933		 		 56,250	55,076	55,334	916
1934		 • •		 60,820	60.644	60,700	120

Imports during 1934 amounted to 61 million sq. yards as compared with 56 million sq. yards in the preceding year and 69 and 72 million sq. yards in 1932 and 1931, respectively. Except in 1931, India has supplied most of these imports to the United Kingdom. The share of other Empire countries and foreign countries is round about a million sq. yards only. Foreign supplies have fallen from 14 million sq. yards in 1931 to 120,000 in 1934.

The following table gives the production of jute manufactures in India in 1932-33 and 1933-34:—

*Margin of preference is 10 per cent. ad valorem.

The total exports of oilseed cake of all sorts during 1934-35 amounted to 348 thousand tons which meant an advance of 61 thousand tons over the preceding two years. Shipments to the United Kingdom increased from 157 thousand tons in 1933-34 to 211 thousand tons in the year under review, the rise in percentage share being from 55 to 61. The share of countries not granting preference rose by 7 thousand tons to 137 tons in 1934-35 but the percentage share dropped from 45 to 39.

The total imports into the United Kingdom in 1934 were 558 thousand tons which was a great advance over last year's figure of 387 thousand tons. Imports during 1934 were the largest in the last six years. Figures of imports from India and other countries are incomplete at present. As at present reported the share of India was 238 thousand tons or 79 thousand tons more than in the preceding year.

PARAFFIN WAX.

This preference was considered of some importance by the Special Committee of the Legislative Assembly in 1932 on the ground that there was a great potential additional market in the United Kingdom for Indian paraffin wax.

The following table gives the exports of paraffin wax from India:—

Exports of Paraffin Wax.

•		Expor	is of Pa		wax.		Val	ue

Grand Total	, ,,				(100)				

Preference has been granted to India in the United Kingdom and the Federated Malay States. Exports to the latter country, however, are insignificant. The total exports from India in 1934-35 amounted to 46 thousand tons as compared with 54 and 45 thousand tons in the preceding two years. The share of the United Kingdom which was 12,600 tons in 1933-34 dropped to 10,900 tons in the year under review. The percentage share, however, rose slightly from 23 to 24. There was almost no change in the percentage share of the trade going to other countries though the actual amount of exports dropped from 41 thousand tons in 1933-34 to 35 thousand tons in the year under report. The position appears to be exactly the same as in the previous year.

The following table gives the imports of paraffin wax into the United Kingdom: —

Imports of Paraffin Wax into the United Kingdom.

						(In thousa	nd cwts.)	• •
				•	Total.	India.	Empire. countries.	Foreign countries.
1931	•••	• •		• •	1,312	491	491	. 821
1932	• •	••	••	• •	1,192	337	337	855
1933	• •		• •	• •	1,046	213	214	832
1931				• •	1,016	235	239	777

The total imports into the United Kingdom in 1934 decreased by 30 thousand cwts, as compared with the previous year amounting to 1,016 thousand cwts. Imports in 1932 and 1931 were considerably higher. Consignments from India rose from 213 thousand cwts, or 20 per cent, of the total trade in 1933 to 235 thousand cwts, or 23 per cent, of the total imports in 1934. Thus, India gained both relatively and absolutely in this market. It will be seen from these figures, however, that they are larger than the exports recorded in Indian accounts. The reason for this is that there is a large transit trade in this item in the United Kingdom. This transit trade is recorded under imports in the United Kingdom accounts, whereas in our accounts, only the country to which the article is finally consigned is recorded.

The following table gives the production of paraffin wax (including candles) in India:--

The production in India in 1934 amounted to 49 thousand long tons as compared with 53 thousand long tons in 1933 and 49 thousand long tons in 1932.

SPICES.

Preference has been granted in the United Kingdom, Seychelles and Fiji. The share of the two colonies is insignificant. The following table gives the exports of spices from India. There are considerable exports of spices from the State of Travancore and these have to be added to the British India figures in order to arrive at the total exports from India.

	Gran	nd Total	,,	377	341	310	289	1,05,19	81,28	82,28	82,92

The total export of spices in 1934-35 amounted to 289 thousand cwts. which meant a reduction of 21 thousand cwts. as compared with 1933-34. Exports of spices have been declining consistently in the last four years. India's market for spices lies mainly outside the British Empire. The amount going to countries granting preference is therefore comparatively very small. The share of the United Kingdom in the year under review amounted to only 13 thousand cwts. as against 18 thousand cwts. in the preceding year. The amount of spices going to countries not granting preference has also registered a decline from 292 thousand cwts. in 1933-34 to 275 thousand cwts. on 1934-35.

The following table gives the imports of spices into the United Kingdom:—

Imports of Spices into the United Kingdom.

				Total.	India.	Empire countries.	Foreign countries.
				Cwts. (000).	Cwts. (000).	Cwts. (000).	Cwts. (000).

1933			••	 252	25	189	63
1934	••	••	••	 504	18	380	124

The total imports of spices into the United Kingdom exactly doubled in the year under review as compared with the preceding year being 504 thousand ewts. Complete and accurate figures of the distribution of this trade between the various countries are not at present available. The somewhat astonishing increase in imports is most probably a reflection of the great pepper gamble in Mincing Lane.

The following tables give the market quotations in the United Kingdom for pepper and ginger:---

Pepper.—Prices of Indian pepper advanced very considerably from April 1934 to January 1935, the quotation in the former month being 54d. and in the latter 7d. In the last two months of the year, 1934-35, however, there was a decline which brought down the quotation to 52d. In March. In the case of Singapore pepper the quotation in April was 5d. It rose to 52d next month, but decreased in the next two months, the price in July being 4-7/8d. The price rallied again to 52d in September. Since then there has been no quotations for Singapore pepper.

Ginger.—Prices of Cochin ginger in London rose sharply during the year under review. In April the quotation was 30sh. per cwt. By October it had risen to 40sh. and in January 1935, to 60 shillings. There was no change in price in the next two months. Thus prices nearly doubled in less than 12 months. The prices of the other competing varieties, Japanese and African, did not register such a sharp advance. The Japanese variety was quoted at 30 shillings in April 1934. It rose to 0/32/6d. in June of that year and remained steady at that level for the rest of the year. The price of the African variety was 24 shillings at the beginning of the year. With slight ups and downs it rose to -/37/6d. by January 1935. This meant an increase of over 50 per cent. as compared with the beginning of the year. In February and March, prices declined, the quotation at the end being -/32/6 or an increase of about 35 per cent. The parity was consequently against Indian ginger almost throughout the year.

The following table gives the area under spices in India. Figures for 1934-35 are not yet available and even those for 1932-33 are yet provisional. As regards the Indian States, no figures are available after 1932-33.

TEAK AND OTHER HARDWOODS.

Preference has been granted in the United Kingdom on all sorts of hardwoods from India. As far as India is concerned, however, teak is by far the most important type of hardwood exported, the exports of other hardwoods being quite insignificant. Figures for the latter have been recorded only from 1933-34. As far as India is concerned therefore the preference amounts to a preference mainly on teak. Under this item, India supplies a very large proportion of the imports into the United Kingdom.

The following table gives the exports of teak and other hardwoods from

Exports of teak and other hardwoods.

(a) Figures for teak wood only.

Norn.-Figures in brackets represent percentages of total.

e Is m to

Preference has been granted to India in the United Kingdom and Ceylon. The share of the latter country is comparatively small. The total exports to all countries in 1934-35 amounted to 45 thousand cubic tons as compared with 27 thousand cubic tons in the preceding year and 17 thousand cubic tons Thus the trade has increased very considerably in the last three years. The share of the United Kingdom in the year under review was 32 thousand cubic tons or nearly 71 per cent. of the total exports. The share of that country in 1933-34 was 17 thousand cubic tons or 63 per cent. It will thus be seen that the absolute as well as the relative share of the United Kingdom has risen considerably during the year under review. The share of countries not granting preference rose from 9 thousand cubic tons in 1933-34 to 12 thousand cubic tons in 1934-35. The percentage share, however, of these countries registered a decline. India therefore has improved her position in the United Kingdom market.

The following table gives the imports of teakwood into the United Kingdom:-

Import of Teakwood into the United Kingdom.

1,440

[Cubic feet (000)]. British Foreign Total. India. Empire. countries. 1931 1.187 869 915 272 1932 826 66 731 760 1933 863 60 782 803 1934* 1,555 1,372 115

* Figures for Teak, sawn only.

The total imports of teakwood into the United Kingdom rose very considerably in 1934, amounting to 1,555 thousand cubic feet as compared with 863 and 826 thousand cubic feet in the preceding two years. share in 1934 amounted to 1,372 thousand cubic feet as against 782 and 731 thousand cubic feet in the two previous years. Thus, nearly 90. per cent. of the imports of teakwood into the United Kingdom are supplied by India. Imports from foreign countries and other British Empirecountries also showed some increase in the year under review but the combined share of these two groups is only 12 per cent.

The following table gives the imports into the United Kingdom of hardwood, other sorts:-

Imports of other sorts of Hardwood into the United Kingdom.

						•,	: [Cu	bic feet (000)].
						Total.	India.	Empire countries.	Foreign countries.
1931		• •	••	• •	• •	15,288	109	5,149	10,139

Prices of teakwood were on a slighty higher level in the first 3 months of 1934-35. From July a decline set in which brought down the quotation by Rs. 30 in November. Prices remained unchanged in the next three months but there was a slight revival in March which increased the quotation by Rs. 10 in that month. On the whole, prices were generally on the decline for the greater portion of the year.

March

WOOLLEN CARPETS AND RUGS.

Preference of 20 per cent. has been granted in the United Kingdom and 10 per cent. in Ceylon and the Federated Malaya States. The largest portion of our exports goes to the United Kingdom.

The following table shows the exports of woollen carpets and rugs in the last three years:—

Exports of Woollen Carpets and rugs.

The total exports of carpets and rugs in 1934-35 showed a considerable increase over the preceding year, amounting to 10·1 million lbs. as compared with 8·5 million lbs. in 1933-34 and 6 million lbs. in 1932-33. Thus, our total exports under this item have shown a progressive increase in the last four years. The share of the United Kingdom has also increased greatly in the same period. Shipments to that country in 1932-33 amounted to 4·3 million lbs.; in 1933-34 they increased to 6·7 million lbs.; in the year under review they rose to 8·2 million lbs. The percentage share of countries granting preference went up from 86 in 1933-34 to 87 in 1934-35. The share of the other countries receded from 14 to 13 per cent. in the same period.

The following table gives the imports of woollen carpets and rugs into the United Kingdom:—

Imports of Woollen Carpets and Rugs into the United Kingdom.

(In thousand sq. yards).

					Total.	India.	Empire Countries.	Foreign Countries.
1931		••			3,554	760	802	2,752
1932	• •	• •	• •		2.572	1,073	1,107	1,465
1933	••	• •	• •	• •	2,505	1,277	1,311	1,194
1934				• •	2,706	1,761	1,810	896

The totali mports have increased from 2,505 thousand sq. yds. in 1933 to 2,706 thousand sq. yds. in the year under report. India's share in the total trade has been consistently increasing in the last three years. In 1932 India sent 1,073 thousand sq. yds. to the United Kingdom accounting for 42 per cent. of the total trade. In 1933, shipments from India rose to 1,277 thousand sq. yards which meant 51 per cent. of the total imports. This year a further high watermark has been reached. India has accounted for 1,761 thousand square yards or 65 per cent. of the total imports into the United Kingdom. On the other hand, the share of foreign countries has been declining both absolutely and relatively. From about 57 per cent. in 1932 the share has dwindled to 33 per cent. in 1934.

Reports received from the local authorities also support the view that India has benefited from the preference.

BRAN AND POLLARD AND RICE MEAL AND DUST.

It has been found convenient to deal with the above items together as it is somewhat difficult to draw a clear-cut line of demarcation between the two, especially in view of the fact that there is a divergence of classification between the Indian and the United Kingdom trade returns for these articles.

The chief importance of the preference, as envisaged by the Indian Delegation, is that it secures the trade in these commodities against actual or potential competition and ensures the maintenance of the position which India has already acquired in the United Kingdom markets. The present position of Indian exports in this line, is shown in the table below:—

BRAN AND POLLARD AND RICE MEAL AND DUST.

Exports from British India.

^{*}Inclusive af tons 25,000 shipped to the U. K. "for orders".

Total Indian exports of this article have increased from 254 thousand tons in 1933-34 to 281 thousand tons in the year under review. The share of the United Kingdom has risen by 27 thousand tons to 247 thousand tons in 1934-35 as compared with the preceding year. The total exports to the United Kingdom include however 25 thousand tons shipped 'for orders'. Exports to the foreign countries were only 5 thousand tons in the year under report as against 4 thousand tons in 1933-34.

Figures of imports of this article into the United Kingdom are shown in the table below:—

BRAN AND POLLARD.

Imports into United Kingdom.

							[To	ns (000)].
					Total.	From India.	From Empire Countries.	From Foreign Countries.

1934	* •	••	••		$657 \cdot 6$	$245 \cdot 3$	307.5	350 · 1

Total imports of this article into the United Kingdom amounted to 658 thousand tons in 1934 as compared with 545 thousand tons in the previous year. India supplied 245 thousand tons to the United Kingdom market in 1934 or 37 per cent. of its total requirements as compared with 197 thousand tons or 36 per cent. in 1933. Shipments from foreign countries increased in the same period from 294 thousand tons to 350 thousand tons but the percentage share dropped by one point to 53. On the whole the relative position appears to be the same as in 1933.

TOBACCO.

The position of Indian tobacco in the United Kingdom market was fully discussed in last year's report in the light of the earlier examination by the Imperial Economic Committee. The conclusion reached last year was that India does not stand to gain much from this preference on tobacco, chiefly because her exportable surplus of tobacco, especially of cigarette tobacco, is negligible and likely to be so for some years to come. Even of pipe tobacco, India has not much to export. As regards cigars, India cannot hope to capture the United Kingdom market from Cuba as the taste for the latter is specialised and cannot be affected by the small difference in price resulting from the preference.

TOBACCO, UNMANUFACTURED.

The following table gives the exports from India of tobacco unmanufactured:—

Exports of Tobacco, unmanufactured.

) 	ļ.		* The rat	e of duty ref	* The rate of duty refers to Jamaica.	ica.					

India has been granted preference in the United Kingdom, Ceylon and the British West Indies. The total exports from India in 1934-35 amounted to 26 million lbs. as compared with 29 million lbs. in the preceding year and 21 million lbs. in 1932-33. The share of the United Kingdom has dropped from 13 million lbs. in 1933-34 to 9 million lbs. in the year under review and is almost the same as in 1932-33. The United Kingdom took only 35 per cent. of the total exports from India in 1934-35 as against 46 and 43 per cent. in the preceding two years. On the other hand, the share of countries not granting preference has increased very considerably during the year under review amounting to 17 million lbs. or 64 per cent. of the total exports. In 1933-34 these countries took 16 million lbs. or 53 per cent. From these figures it appears that India's trade with countries not granting preference has increased, both absolutely and relatively, whereas that with the United Kingdom has registered a considerable decline.

The following table gives the imports of tobacco unmanufactured into the United Kingdom:—

Imports of Tolacco, unmanufactured into the United Kingdom.

					•	(In thous	and lbs.)	
					Total.	India.	Empire countries.	Foreign countries.
1931	••		••	••	194,046	9,347	34,328	159,718
1932	••	••	••	• •	174,912	9,208	47,708	127,204
1933	••	••	• •	••	211,108	12,978	49,192	161,916
1934	••	••	••	••	239,259	9,802	47,625	191,634

The total imports in 1934 amounted to 239 million lbs. as compared with 211 million lbs. in the preceding year and 175 million lbs. in 1932. India's share has declined to 10 million lbs. as compared with 13 million lbs. in 1933. As a result, India's percentage share has dropped from 6 to 4. The share of other Empire countries excluding India was slightly more in the year under review than in 1933. The shipments from foreign countries, chiefly America, have risen very greatly being 192 million lbs. in 1934 as against 162 million lbs. in 1933 or a rise from 77 to 80 per cent. of the total imports.

TOBACCO MANUFACTURED.

The following table gives the exports of tobacco, manufactued from India.

Exports of Tobacco, manufactured.

835	730 753	1,028	4,81 3,	3,70 3,67	4,35

Preference has been granted in the United Kingdom, Ceylon and British Malaya. The market in the United Kingdom is not so important as that in Ceylon and British Malaya. The total exports from India during 1934-35 amounted to 1,028 thousand lbs. as compared with 753 thousand lbs. in the preceding year. This is the largest figure in the last four years. The share of the countries granting preference amounted to 389 thousand lbs. in the year under review as compared with 342 thousand lbs. in 1933-34 and is again the highest in the last four years. The percentage share of countries granting preference has dropped from 45 in 1933-34 to 38 in 1934-35. The amount of exports to countries not granting preference was 411 thousand lbs. in 1933-34. It rose to 639 thousand lbs. in the year under review, the increase in the percentage share in the same period being from 55 to 62.

The following table gives the imports of tobacco, manufactured, into the United Kingdom. Detailed figures of shares of countries for 1934 are not available.

Imports of Tobacco, manufactured, into the United Kingdom.

						(In thous	sand lbs.)	
					Total.	India.	Empire countries.	Foreign countries.
1931			• •	٠,٠	1,202	46*	78	1,124
1932	• •	• •	• •		909	29	59	850
1933	• •	••	• •		1,102	31	59	1,043
1934	• •	• •	• •		1,403	(a)	53.5*	(a)
*]	igures relate	e to ci	gars only.					

The total imports into the United Kingdom amounted to 1,403 thousand lbs. in the year under review as compared with 1,102 thousand lbs. in the previous year or an increase of 400 thousand lbs. India's share in 1933 was 31 thousand lbs. or less than 3 per cent. Figures of imports from India in 1934 are not available.

The following table gives the imports of tobacco, manufactured, into Ceylon:—

Imports of Tcbacco, manufactured, into Ceylon.

						(In thou	sand lbs.)	
					Total.	India.	Empire countries.	Foreign countries.
1931	• •	• •	• •		183	46	179	4
1932	• •	• • •			116	22	113	3
1933	• •	••	• •		143	30	141	2
1934		• •	• •	• •	120	52	117	3

The total imports in 1934 amounted to 120 thousand lbs. as against 143 thousand lbs. in 1933 or a drop of 23 thousand lbs. India's share in 1934 was 52 thousand lbs. or 43 per cent. of the total imports as against 30 thousand lbs. or 21 per cent. in 1933. Thus, India's participation in the trade is considerably larger in 1934 as compared with the previous year. The share of other Empire

countries declined in 1934 as compared with 1933. As most of the tobacco received in Ceylon is from Empire sources, no conclusion as regards the effect of preference can be legitimately drawn from the available figures.

The following table gives the reported production of tobacco in India:—

Production of tobacco in India.

1928-29		••	• •	••	••	Area. Acres (000). 1,308	Yield. Tons (000). 599
1929-30	••	• •	• •	• •	• •	1,317	629
1930-31	• •	• • •	• •		••	1,257	573
1931-32	• •	• •	• •	• •		1,279	623
1932-33	••	• •	• •	• •		1,251	616
1933-34			• •			1,227	561
1934-35	• •	••	• •	• •	• •	(a)	(a)

(a) Not available.

The decline of the acreage under tobacco noticed in the last Report continued in 1933-34 when it amounted to 1,227 thousand as against 1,251 thousand in 1932-33. The estimated yield of tobacco also dropped from 616 thousand tons in 1932-33 to 561 thousand tons in 1933-34.

CASTOR SEED.

The following table gives the exports of castor seed from India:—

Statement showing the course of Indian export trade in castor seed enjoying preference.

				Quantity	tons (000).	
	••	1930-31.	1931-32.	1932-33. 4	1933-34.	1934-35.
To U. K.	• •	19.6	$23 \cdot 2$	22.7 (+2.0)	27.1 (+3.1)	26.4 (+1.1)
Total	• •	91.0	104.0	85.9 (+5.2)	81.6 (+5.9)	68.7 (+5.3)

Note.—Figures in brackets represent exports from Kathiawar.

The total exports of castor seed in 1934-35 amounted to 74 thousand tons as compared with 87 thousand tons in the preceding year and 91 thousand tons in 1932-33. The figures given above are inclusive of exports from Kathiawar ports. The share of the United Kingdom in this trade was 27 thousand tons in 1934-35 as against 30 thousand tons in the previous year. It may be remarked, however, that the export figure for this year is likely to be considerably revised. The extent of the possible revision can be seen from the fact that in March accounts of 1934 the total exports from India were recorded as 16 thousand tons; the correct figure which was published in the Annual Seaborne Trade Account was 27 thousand tons. There appears to be considerable "for orders" business in this article and this cannot be properly distributed till late in the year. It is difficult therefore to draw any conclusion at this stage from the available export figures of castor-seed for 1934-35 and the examination has to be confined to the statistics of imports as recorded in the United Kingdom accounts.

The following table gives the imports of castor seed into the United Kingdom:—

Imports of Castor Seed into the United Kingdom.

						In to	ns (000).	
					Total.	India	Empire countries.	Foreign countries.
1929	••		• •		35	30	30	5
1930		• •			36	21	21	15
1931		• •	• •		31	25	25	6
1932	• •	• •	• •	• •	25	20	20	5
1933	• •	• •	• •		33	30	31	2,
1934	• •		• •		35	32	32	3

The total imports of castor seed into the United Kingdom amounted to 35 thousand tons in 1934 as compared with 33 thousand tons in 1933. Imports from India have also increased from 30 thousand tons in 1933 to 32 thousand tons in the year under report. The share of other Empire countries as well as foreign countries is negligible in most years. Except in 1930 the share of foreign countries has been rarely more than 6 thousand tons. India therefore monopolises a large portion of the import trade in this article in the United Kingdom.

The following table gives the market quotations for castor seed in India and the United Kingdom:—

United Kingdom (London).

Market quotations for Castor Seed.

	the price of the Drice of the price of the p

N.B.—Figures in brackets represent parities assuming the price of the Indian variety to be equal to 100.

Prices of castor seed in India have appreciated considerably during 1934-35 as compared with the preceding year. The quotation in April was Rs. 5 per cwt.; by the end of 1934 it had risen to Rs. 6/4/0. In January there was a precipitous rise to Rs. 8/1/0 but the price fell off again to Rs. 6/7/0 in February and Rs. 6/4/0 in March 1935. The parity was more favourable for Brazilian seed for the greater portion of the year 1934-35. In spite of this, imports from India into the United Kingdom increased. This shows the predominant position which Indian castor seed holds in the United Kingdom market.

The following table gives the area and yield of castor seed in India:—

Production of Castor Seed in India.

					Acreage (million acres).	Yield (thousand tons).
1929-30					$1 \cdot 29$	116.0
1930-31	• •	• •	• •	• •	$1 \cdot 46$	120.0
1931-32			• •		1.58	146:(
1932-33	• •	• •			$1 \cdot 62$	151.0
1933-34	• •				1.53	143.0
1934-35	• •	• •	• •		1.46	109.0

The acreage under castor seed declined only slightly in 1934-35 but the decline in yield was much larger.

MAGNESITE.

Magnesite is one of the three commodities which were specially brought to the notice of the Indian Delegation by producers in the Indian States for the purpose of obtaining preference in the United Kingdom.

The following table shows the production of magnesite in India:-

Production in India.

						Tons.
1928	• •	• •	• •	• •	• •	24,406
1929	• •	••	• •	• •		23,497
1930	••	• •	• •	• •	• •	16,523
1931			• •	• •		5,333
1932	• •	• •	• •	1 ••		13,864
1933	• •	• •		•••		15,206
1934	••	• •		• •	• •	14,975

Production of magnesite in India, after a continuous decline between 1928 and 1931, has been on the rise since the latter year. The recovery in production nearly synchronizes with the grant of preference. Production in 1934 has remained almost at the level of the previous year.

Figures of Indian exports of magnesite are available only since 1933-34, which are shown in the table below:—

				In cwt. (000).		
				1933-34.	1934-35.	
Total exports	• •	• •	• •	73.4	$69 \cdot 3$	
Exports to U. K.	• •	• •		$47 \cdot 9$	58.3	
Exports to other cou	ntries	• •	• •	$25 \cdot 5$	11.0	

The total exports from India declined from 73 thousand cwts. in 1933-34 to 69 thousand cwts. in the year under review. On the other hand the share of the United Kingdom in the trade rose from 48 thousand cwts. to 58 thousand cwts. in the same period, the increase in the percentage share being from 65 to 84. Trade with other countries declined from 25 thousand cwts. or 35 per cent. in 1933-34 to 11 thousand cwts. or 16 per cent. in the year under report.

The following table shows the imports of magnesite (dead-burnt and lightly calcined) into the United Kingdom:—

Imports of magnesite, dead-burnt and lightly calcined into the United Kingdom.

\mathbf{Tons}	(000)	•
-----------------	-------	---

· ,		I	Total mports.	From British Tndia.	From Empire countries.	From Foreign countries.
1929	• •	• •	27.3	0.6	5.1	$22 \cdot 2$
1930		• •	18.9	0.4	1.8	17.1
1931	• •		$12 \cdot 2$	0.2	1.5	10.7
1932			10.1	1.1	2.1	8.0
1933	• •		$9 \cdot 5$	1.4	3.3	$6 \cdot 2$
1934*	••	• •	27.8	$2 \cdot 9$	4.5	23.3

^{*} Includes figures for crude magnesite.

Figures of total imports into the United Kingdom in 1934 are not strictly comparable with those in the preceding years, as the figures of crude magnesite are also included in the total imports in the latest year. In the absence of comparable figures no conclusions can be drawn from the table.

SANDALWOOD OIL.

MCIDGCI&S

This is another of the three commodities which were specially brought to the notice of the Indian Delegation to the Imperial Conference at Ottawa by producers in the Indian States and the Delegation hoped that the preference would be of benefit to the States concerned.

The following table gives the exports of sandalwood oil from India:-

			To	То	$\mathbf{T_0}$
		Total Export. Gals.	United Kingdom. Gals.	Empire countries. Gals.	Foreign countries. Gals.
1928-29		 18,670	5,492	6,196	12,474
1929-30		 14,988	5,065	5,489	9,499
1930-31	• •	 8,724	1,084	1,564	7,160
1931-32		 12,679	4,542	4,899	7,780
1932-33		 6,267	3,046	3,557	2,710
1933-34	• •	 8,192	5,236	5,694	2,498
1934-35	• •	 9,376	5,222	6,166	3,210

Total exports of sandalwood oil from India increased in the year under review by one thousand gallons to 9 thousand gallons as compared with 1933-34. The share of the United Kingdom practically remained unchanged at 5 thousand gallons but that of the other Empire countries increased by about 500 gallons. The percentage of exports to United Kingdom declined from 64 to 56 in the same period. On the other hand the share of foreign countries rose from 2.5 thousand or 30 per cent. in 1933-34 to 3.2 thousand or 34 per cent. in the year under review.

GRANITE SETTS AND KERBS.

This is another item which was specially brought to the notice of the Indian Delegation by the producers in Indian States as being an article for which a preference might lead to the development of a new trade.

The position in 1934-35 would be seen from the figures of export given below. Separate figures of export of these articles are available only from 1933-34.

Granite setts and kerbs were not separately specified in the export trade returns of British India until 1933-34. The shipments during that year were as follows:—

			T	ons (000).	Rs. (000).
Total Exports	• •			10.1	3,08
To United Kingdom	• •	• •		10.1	3,05
To Other Empire Com	ntries .	• •	• •		3
,		<i>1934</i> .	<i>-35</i> .		
Total Exports	• •			5.5	91.2
To U. K.	• •	• •	• •	5.5	$90 \cdot 3$
To Other Countries	• •				•9

The United Kingdom has absorbed again the entire export of granite setts from India in 1934-35.

The following table shows the imports of granite setts and kerbs into the United Kingdom:—

Imports of Granite Setts and Kerbs into the United Kingdom.

	Imports of	Grander				Tons (0	00).
		Total	From British	From Channel Islands.	From Empire countries.	From Norway.	From Foreign countries.
		Imports.	India.	7.9	8.8	80	108

1934	• •	82.4	3.4		hich for this	year includ	le India.

* Figures relate to "Other British Countries" which for this year include India.

Total imports of granite setts into the United Kingdom in 1934 amounted to 82 thousand tons as against 68 thousand in the preceding year. The share of India declined from 11 thousand tons or 17 per cent. in 1933 to 3 thousand tons or 4 per cent. in the year under report. Shipments from foreign countries on the other hand rose from 47 thousand tons or 69 per cent. in 1933 to 69 thousand tons or 84 per cent. in 1934.

GROUNDNUT.

Preference has been granted in the United Kingdom, the Federated Malay States and the British West Indies. The amount of preference in the United Kingdom is 10 per cent.

The following table gives the exports of groundnut from India:—

Statement showing the course of Indian export trade in groundnut enjoying preference.

		preje	,, οποσι ς	uantity	Tons (000).	
To U. K	1930-31. 47·2	77.9	31.6 + (4.3)	546.5+(3	$\begin{array}{ccc} (5 \cdot 2) & 134 \cdot 2 + & (4 \cdot 1) \\ 0 \cdot 0) & 511 \cdot 2 + (36 \cdot 6) \end{array}$	•
Total all countries Note.	601·2 —Figures in		mort	s from Kar	thiawar. I to 548 thousand	1

The total exports of groundnuts in 1934-35 amounted to 548 thousand tons as compared with 576 thousand tons in the preceding year and 443 thousand tons in 1932-33. The figures given above are inclusive of exports from Kathiawar ports since 1932-33. The share of the United Kingdom in this trade was 138 thousand tons in 1934-35 as against 58 thousand tons in the previous year. This figure includes a considerable number of 'for order' consignments but on the other hand the import statistics of the United Kingdom are generally larger than those recorded in the Indian accounts. This is probably due to the fact that consignments which are recorded in the Indian accounts in favour of other countries ultimately find their way to the United Kingdom and are registered there against India. It is difficult therefore to draw any correct conclusions from the export figures of groundnut and the examination has to be confined to the statistics of imports as recorded in the United Kingdom accounts.

The following table gives imports of groundnut into the United Kingdom:—

Imports of groundnut into the United Kingdom.

		_				\mathbf{T}	ons (000).
				\$	From	\mathbf{From}	From
				Total.	India.	Empire countries.	Foreign countries.
1929		• •		 134.3	$75 \cdot 4$	$96 \cdot 1$	$38 \cdot 2$
1930	• •		• •	 $115 \cdot 2$	45.0	82.8	$32 \cdot 4$
1931		••		 $138 \cdot 7$	$81 \cdot 3$	99.8	$38 \cdot 9$
1932	• •	• •	• •	 96.8	$57 \cdot 6$	$85 \cdot 6$	$11 \cdot 2$
1933	• •	• •		 131.6	69.8	$129 \cdot 4$	$2 \cdot 2$
1934				 $112 \cdot 7$	$72 \cdot 5$	112.5	$0 \cdot 2$

The total imports of groundnut into the United Kingdom in 1934 amounted to 113 thousand tons as compared with 132 thousand tons in 1933 or a decrease of 19 thousand tons. Imports from India amounted to 72½ thousand tons accounting for nearly 64 per cent. of the total imports. In 1933 the imports from India were 70 thousand tons or 53 per cent. Though other Empire countries still retain a large share of the import trade, supplies from foreign sources have been reduced to vanishing point. That greater progress has not been made by Indian groundnut in the United Kingdom market is due mainly to the competition which groundnut has to meet in the United Kingdom market from soyabean and cotton-seed. It will be seen from the table below that the imports of soyabean into the United Kingdom are of very considerable dimensions.

Soyabeans of non-Empire origin have since April 1935 been subject to a duty of 10 per cent. ad valorem.

Imports into the United Kingdom of soyabean and soyabean oil.

							Tons (000).

Prices of groundnut in India have considerably increased during 1934-35 as compared with the preceding year. The quotation in April 1934 was Rs. 19-8-0. It rose steadily to Rs. 41-8-0 in January 1935. Prices receded in the next two months, the quotation in March being Rs. 38-4-0. Prices in the United Kingdom of both varieties of groundnut were also on the increase almost throughout the year. A decline, however, set in in the case of Coromandel (Indian) groundnut in March 1935. The parity was in favour of India in the first four months of 1934-35. In September and October it became slightly unfavourable but the position was remedied in the next two months. There was a set-back again for India in January 1935. Parity figures are not available for the last two months of the year. For a considerable portion of the year, therefore, it appears that parity was generally favourable to Indian groundnut as compared with that from Nigeria.

The following table gives the production of ground nut in shell in India and Senegal:— $\,$

Production of Groundnuts in shell.

					Area [acres India.	(000)] Senegal.	Yield [tons India.	(000)]. Senegal.
	1929-30	••	••	••	5,748	1,590	2,370	486

,	1934-35	***	••	••	5,760	(a)	1,869	(a)

(a) Not available.

Production during 1933-34 was higher than in the preceding year both in the case of India and Senegal. In 1934-35 the crop in India was considerably less than in 1933-34 amounting only to 1,869 thousand tons as compared with 3,330 thousand tons or a drop of 44 per cent. A large portion of the 1934-35 crop will be exported during 1935-36.

LEAD.

Preference has been granted on the exports of lead to the United Kingdom and of pig lead to Ceylon.

The following table gives the exports of pig lead from India:—

Exports of Lead, Pig.

Value Rs. (000).	1934-35		1,17,60 1,27,66 88,04*	3,98 3,58 3,22			1,21,58 1,51,24	26,01 20,50 44,69		1.35.95

			,	United Kingdom	Ceylon	Total of trade with countries—		Granting preference	Not granting preference		

N.B.—Figures in brackets represent percentages of total.

^{*}Inclusive of 40,000 cwts. valued at Rs. 4,42,000 shipped to the U. K. " for orders ".

The share of Ceylon is comparatively insignificant. The total exports of pig lead from India in 1934-35 amounted to 1,229 thousand cwts. as compared with 1,302 thousand cwts. in 1933-34. The share of the United Kingdom dropped from 1,090 thousand cwts. in 1933-34 to 786 thousand cwts. in the year under report. As a result of this, the percentage share of the countries granting preference contracted from 86 in 1933-34 to 66 in 1934-35. Shipments to countries not granting preference increased from 181 thousand cwts. in 1933-34 to 413 thousand cwts. in 1934-35, the increase in the percentage share being from 14 to 34. India has thus exported less to the United Kingdom market, foreign countries absorbing a much larger proportion of her exports.

The following table gives the imports of pig lead into the United Kingdom:—

Imports of pig lead into the United Kingdom.

					Total imports.	From British India.	Tons (000). From Empire countries.	From Foreign countries.
1929		• •	••	• •	292	53	190	102
1930		• •	• •		327	62	209	118
1931		• •	• •	••	299	49	198	100
1932	• •	• •	• •	• •	262	44	229	33
1933		• •	• •		282	55	271	11
1934		• •	• •	••	313	42	282	31

Note.—The United Kingdom imports include figures of transit trade which is considerable in the case of pig lead.

Total imports into the United Kingdom in 1934 amounted to 313 thousand tons as compared with 282 thousand tons in 1933. India's share, however, declined from 55 thousand tons or 20 per cent. of the total imports to 42 thousand tons or 13 per cent. of the total trade. The share of Empire countries excluding India increased in the same period by 24 thousand tons. Consignments from foreign countries also rose considerably from 11 thousand tons in 1933 to 31 thousand tons in the year under report.

N.B.—Figures in brackets represent parities assuming the price of the U. K. variety to be equal to 100.

Prices of the Spanish variety were generally on the decline from April 1934 to January 1935. In the last two months of the year, however, prices rose rapidly, the quotation in March 1935 being higher than in April 1934. The quotation for the other variety fluctuated between £12-5-0 and £12-15-0 in the first eleven months of the year. In March 1935, however, the quotation rose to £14.

The following table gives the production of lead in the chief supplying, countries:—

Production of Lead.

						Metric tons (000).			
Year.		al Produc- ion of the world.	India,	Australia.	Spain.	Germany.	Caribbean (Mexico).	United States.	
1928		1,762	79 · 6	157.6	131.0	87.0	$215 \cdot 5$	708·6·	
1929		1,823	81.5	180.4	142.8	$97 \cdot 9$	$229 \cdot 8$	702.7	
1930	• •	1,609	81.0	$171 \cdot 2$	$123 \cdot 3$	110.8	$231 \cdot 2$	$583 \cdot 4$

				* Estima	ited.				

(a) Including the lead content of the lead, silver and gold bullion exported.

A 10 per cent. preference is admissible in the United Kingdom on other sorts of lead also. Indian exports under this category during the last four years were as follows:—

			C,	1931-32. wt. (000).	1932-33. Cwt. (000).	1933-34. Cwt. (000).	1934-35. Cwt. (000).
To U. K.	• •	• •	••	8.2	15.1	22.2	7.4
To other countries	••	• •	• •	18.5	17.4	19-1	19.4
Total exports				$26 \cdot 7$	$32 \cdot 5$	41.3	26.8

The total exports from India under this item declined from 41 thousand cwts. in 1933-34 to 27 thousand cwts. in the year under report. The share of the United Kingdom contracted much more in proportion from 22 thousand cwts. in 1933-34 to 7 thousand cwts. in 1934-35. The share of other countries remained steady at 19 thousand cwts.

LAĊ.

There is no preference on this item which is allowed free entry in the United Kingdom; but the synthetic substitutes for lac are subject to duty. Preference is thus granted to natural lac as against the competing substitutes.

The following table gives the exports of shellac, seedlac and sticklac.

Exports of shell, stick and seed lac.

			2			C	wt. (000).
			Total Exports.	U. K.	All Empire countries.	U.S.A.	All foreign countries.
1928-29	••	••	650	146	156	322	494
1929-30 1930-31	• •	;	574	129	140	280	434
			477	106	117	193	360
1931-32	• •		414	93	100	178	315
1932-33			387	93	103	150	284
1933-34	• •		688	321	331	212	357
1034-35	• •	••	526	224	236	149	200

The total experts of lac from India in 1934-35 amounted to 526 thousand ewts. a decline of 162 thousand ewts. or 24 per cent. as compared with the previous year. The figure, however, is higher than in 1932-33 and the two earlier years. The share of the United Kingdom in the year under review was 224 thousand cwts. or 43 per cent. of the total exports. The share of that country in 1933-34 was 321 thousand cwts. or 47 per cent. The value of these figures is vitiated by the fact that Lac has been in recent times the subject of a large scale gamble on the London commodity market.

The following table gives the imports of shellac, seedlac and sticklac into the United Kingdom:—

Imports of shellac, seedlac and sticklae in to the United Kingdom.

	•					Cwts	(000)	
		Total Imports.	India,	Straits Settlements and depen- dencies in Labuan,	All Empire Coun- tries.	Germany.	Nether- lands,	All Foreign Countries,
1929		157	146	0.91	147	$3 \cdot 2$	1.0	10.0
1930		142	133	0.60	134	1 · 4	0.0	$7 \cdot 9$
1931	• •	120	117	0.07	137	1.3	0.6	2.9
1932		108	105	0.05	106	1.4	0.1	2.2
1933	• •	171	167	• •	167	1.8	0.5	2.7
1934		440	436	• •	436	• •	••	4.0

It will be seen that the import figures, as recorded in the United Kingdom accounts against India, are consistently larger than the Indian export figures except in the year 1933. This is probably due to some extent to the re-export and transit trade in lac carried on in the United Kingdom. Further, as was noted in last year's report there were very heavy exports of lac from India amounting to 167,000 cwts, which were included in the Indian returns in 1933-34 but appeared in the United Kingdom returns for 1934. The total imports into the United Kingdom rose very considerably in 1934 amounting to 440 thousand cwts, as against 171 thousand cwts, in 1933. India's share of this trade was 436 thousand cwts, as against 167 thousand cwts, in 1933. The large increase in the imports into the United Kingdom was due mainly to the speculation in shellac and the alleged "corner" in that article in the London market.

The following table gives the market quotations for lac in India and the United Kingdom:—

	The m	rice of sl	nellac in	Calcutt	a was I	(s. 39]	host figure	of the year. Prices otation to Rs. 41 in
	Little pa	ogo to T	3 53-8	-0 whic	h was t	me mg	TOPO TOPOLE	otation to Rs. 41 in

month it rose to Rs. 53-8-0 which was the highest figure of the year. Prices declined in the next three months bringing down the quotation to Rs. 41 in August. There was a revival in the next month which took the quotation to

Rs. 46. But from October onwards prices declined at first slowly but at the end of the year in a precipitous manner, the quotation in March being Rs. 23. Prices in the United Kingdom were on a high level from April to about June. In the next three months they were steady round about 95 shillings to 100 shillings. From October prices were consistently on the downward grade the quotation reached in March 1935 being 50 to 55 shillings. Thus, speculation seems to have maintained the prices in the first nine months of 1934 but in the last three months of 1934, and especially, in the first three months of 1935 prices fell to a large extent. The speculative bubble burst towards the end of 1934.

MYROBALANS.

There is no direct preference on this article which is admitted free into the United Kingdom irrespective of origin; but there is a duty on other tanning materials imported from non-Empire sources. India has a practical monopoly of myrobalan imports, more than 99 per cent. of the United Kingdom requirements being supplied by her. The four main tanning substances, imports of which are considerable in the United Kingdom, are chestnut extract, quebracho extract, myrobalans and wattle-bark. It is very difficult to determine to what extent these extracts and substances are in competition with each other. Each has its special characteristics and the demand is apt to vary with the variations in demand for the different kinds of leather. Substitution of one kind of material for another is however possible to some extent. Chestnuts and quebracho extracts come from non-Empire sources, whereas wattle-bark comes mainly from South Africa and to a much smaller degree from Kenya.

Myrobalans come almost wholly from India. The United Kingdom tanners have been agitating for the removal of the duty on certain tanning materials on the ground that they were not in competition with Indian myrobalans. The duty on sumach was removed in May 1934 and quebracho extract was put on the free list in April 1935 with the consent of the Government of India who were satisfied that the indirect preference to myrobalans was not thereby affected.

The following table gives the exports of myrobalans from India:—

Exports of myrobalans from British India.

					-		Cvrt	. (000).
					Total Exports.	To United 'Kingdom.	To Empire Countries.	To Foreign Countries.
1928:29	••	••	• •	••	1,231	535	551	680

1931-32	• •	• •	• •	• •	1,271	691	711	560·
1932-33	••	• •	**	••	1,062	. 494	- 518	544
1933-34	• •	• •	••		1,237	598	629	608
1934-35	••	••	• •		1,356	670	701	655

The total exports of myrobalans during 1934-35 amounted to 1,356 thousand cwts. as compared with 1,237 thousand cwts. in 1933-34. The shipments during the year under review are the largest in the series. The United Kingdom took 598 thousand cwts. in 1933-34 or 48 per cent. of the total

exports. In the year under review shipments to the United Kingdom amounted to 670 thousand cwts, or about 49 per cent. Exports to foreign countries also showed an increase from 608 thousand cwts, in 1933-34 to 655 thousand cwts, in 1934-35. The percentage, however, dropped from 49 to 48. The relative position of the United Kingdom and foreign countries remained practically the same as in the previous year though the trade has been at a larger figure in both cases.

The following table gives the imports of myrobalans into the United King.

Cwts. (000).

Imports of myrobalans into the United Kingdom.

ŧ	s				Total Imports.	From British India.	From Empire countries.	From Foreign countries.
1929	33	11	3.	**	407	496	496	1
1930	•	••		3.	603	. 602	602	1
1931	• •	• 3	3.	1.	577	574	574	3
1932	••	• •	• •	••	614	614	614	_• •
1933		• •	4.4	•	598	595	597	1

As has been remarked above, nearly all the imports into the United Kingdom come from India. There has been a considerable increase in the shipments from India to the United Kingdom amounting to 672 thousand cwts. as against 595 thousand cwts. in 1933. It would be more interesting, however, to compare the imports of tanning substances of all sorts (excluding tanning extracts, liquid or solid) into the United Kingdom with the imports of myrobalans:—

673

672

672

1934

Imports of lanning substances (excluding tanning extracts, solid or liquid) into the United Kingdom.

							All sorts.	Myrobalans.
					•		Cwts. (000)	Cwts, (000)
1931	**	**	**	* *	**		1,293 • 0	877 · 3 (45)
1932		1.1	4.4	4.4	4.4	4.4	1,277.1	613 .7 (48)
1933	**	• •	• •		2.4		1,271 : 4	598 • 1 (47)
1934	4.4		**	4.4	4.4	4.4	1,197.0	672.9 (56)

N.B.-Figures in brackets represent percentage of total.

Imports of myrobalans were 47 per cent. of the total quantity of tanning substances imported into the United Kingdom in 1933. In 1934, they rose to 56 per cent, which was a considerable advance over the previous year. It is clear therefore that myrobalans improved their position in the tanning material group in the year under review.

The following table gives the market quotations for myrobalans in the United Kingdom:—

Prices of myrobalans in April 1934 were the same as in the preceding few months. There were no quotations from May to November. In December

the price of both varieties sharply declined. From 7sh. 3d. and 6sh. 9d. in April 1934 they receded to 5sh. $4\frac{1}{2}d$. and 5sh. $1\frac{1}{2}d$. in December 1934. Prices remained at this level in the next three months. On the whole, prices were much lower in the last four months of the year.

BROKEN RICE.

No preference has been granted by the United Kingdom on broken rice but exemption from duty, irrespective of origin, was secured for this commodity. The reasons for this step have been explained in last year's report.

The following table gives the exports of broken rice from India:—

Exports of broken rice from British India.

		Expe	orts of b	roker	i rice jioi	n Dittor 2	Cwt.	(000).
					Total	To United Kingdom.	To Empire countries.	To Foreign countries.

^{*} Inclusive of 100 cwts. shipped to the U. K. " For orders".

The total exports from India in 1934-35 amounted to 1,020 thousand cwts. as compared with 1,672 thousand cwts. in 1933-34. Exports during the year under review have thus greatly contracted. The share of the United Kingdom amounted to 523 thousand cwts. in 1934-35 as compared with 551 thousand cwts. in the previous year. The percentage share of the United Kingdom, however, showed an increase of 18 points to 51. On the other hand, the shipments to foreign countries contracted from 842 thousand cwts. in 1933-34 to 374 thousand cwts. in the year under report.

The following table gives the imports of broken rice into the United Kingdom:

Imports of broken rice into the United Kingdom.

1934	• •	• •	••		1,196	A.V.		Q
MCID	GCI&S							

The total imports of broken rice into the United Kingdom in 1934, amounted to 1,196 thousand cwts. as compared with 1,067 thousand cwts. in the previous year and 860 thousand cwts. in 1932. India's share in the year under review amounted to 492 thousand cwts. as against 705 thousand cwts. and 616 thousand cwts. in the preceding two years. India's percentage share has been declining in the last three years being 72 in 1932, 66 in 1933 and only 41 in 1934. On the other hand, the share of foreign countries has gone up consistently in the same period from 236 thousand cwts. or 27 per cent. in 1932 to 682 thousand cwts. or 57 per cent. in 1934.

MICA.

No preference has been secured on this item. India supplies about 80 per cent. of the United Kingdom requirements and other Empire countrie about 10 per cent. The imports of mica of foreign origin into the United Kingdom must be less than the remaining 10 per cent., since imports of India mica from Continental stocks would be classified in the British trade return as imports from the country from which the stocks were drawn.

The following table gives the exports of mica from India:

Exports of mica from British India.

				Tons	(000).			Rs. (000).

a										

Consignments from India during 1934-35 increased very considerably amounting to 5·2 thousand tons as against 3·2 thousand tons in the preceding year. The trade has greatly revived in the year under review and has almost reached the pre-depression level. The exports to the United Kingdom amounted to 1·6 thousand tons in 1934-35 as compared with 1·2 thousand tons in the previous year. The percentage share, however, has dropped to 31 as against 37 in 1933-34. In other words, consignments to foreign-countries from India increased in a larger proportion than those to the United Kingdom. Shipments to foreign countries in 1932-33 were 1·1 thousand tons. In 1933-34, they rose to 2 thousand tons and in the year under review they went up still further to 3·6 thousand tons. The percentage share of exports to foreign countries in the same period increased from 55 to 69.

The following table gives the imports of mica'slabs and splittings, into the United Kingdom:

Imports of mica slabs and splittings into the U. K.

				Ton	s (000).			£(00	00).

1934	••	• •	$1 \cdot 7$	1.4	1.5	$0 \cdot 2$	290	230	245	45

The United Kingdom purchases in 1934 were considerably larger than the previous year amounting to 1,700 tons as compared with 1,240 tons in 1933. India supplied 1,400 tons out of this as compared with 1,020 tons in the previous year. India's percentage share, however, remained unchanged at 82. The share of other Empire countries has gone up from 20 tons in 1933 to 100 tons in 1934. The share of foreign countries has remained at 200 tons as in the previous year.

INDIAN HEMP.

According to the Indian Delegation Indian hemp is sold in the United Kingdom market in competition mainly with "Cannab is sativa" (European or true hemp). There are two varieties of the latter, namely, a Russian type used for rope manufacture and the other an Italian type used for spinning for production of fabrics. It is the former type which is in competition with the Indian variety, but as it was not found possible to distinguish between the two types of European hemp one of them competitive and the other not, the Delegation thought it desirable to secure the removal of duty on Indian hemp, "Cannabis sativa" being already on the free list. They were led to the decision also by a desire to assist the important entrepot trade with the United Kingdom in this article which had grown up in some of the Continental centres.

The extent of this entrepot trade is not known but the trade in Indian hemp may be studied from the following statistics.

The following table gives the exports of hemp raw from India:

Exports of Hemp, raw from India.

							Tons (000).	,
						Total.	United Kingdom.	Empire countries.	Foreign countries.
1930-31	9/10	••		• •		14.6	1.7	1.7	12.9
1931-32	••	• •		• •		11.2	1.6	1.6	9.6
1932-33			• •	• •	• • •	14.0	4.0	4.0	10.0
1933-34	••	4 -	• •			19.4	4.2	4.3	15-1
1934-35	• •	• •	••	••	• •	21.9	5.7	6.1	15.8

The total exports of Indian hemp amounted to 21.9 thousand tons in 1934-35 as compared with 19.4 thousand tons in the preceding year and 14 thousand tons in 1932-33. Thus, there has been a considerable increase in the total exports in the last three years. Exports to the United Kingdom have also shown considerable improvement being 5.7 thousand tons in the year under review or 26 per cent. as against 4.2 thousand tons or 22 per cent. in 1933-34. Exports to foreign countries have remained, more or less, at the same figure in 1934-35 as compared with the previous year. The percentage share, however, has dropped from 78 to 72 per cent. Thus, there has been an increase of India's trade with the United Kingdom and this has not been at the cost of India's exports to foreign countries.

The following table gives the imports into the United Kingdom of hempnot dressed, dressed and tow or codilla.

Imports of hemp, not dressed, dressed and tow or codilla into the United Kingdom.

							Tor	ıs (000).	1
						Total.	India.	Empire countries.	Foreign countries.
1930	,	• •	• •	• •		83	3.9	15	68
1931		• •	• •	• •		85	1.8	, 14	71
1932	• •	• •	• •	• •		65	$3 \cdot 4$	24	41
1933	• •	• •	• •	•	••	$74 \cdot 5$	4.0	$27 \cdot 5$	47.0
1934	• •	• •	• •	• •		$90 \cdot 7$	4.7	$33 \cdot 9$	$56 \cdot 8$

The total imports of hemp into the United Kingdom during the year under review amounted to 90.7 thousand tons as compared with 74.5 thousand tons in the preceding year or an increase of 16 thousand tons. India's share in 1934 amounted to 4.7 thousand tons as against 4 thousand tons in 1933. The percentage share, however, remained unchanged at 5 per cent. in both years. Similarly imports from Empire countries and foreign countries increased during 1934, but the percentage share remained unaffected in each case. In fact, there has been no change in the relative shares of any of the groups during 1934 as compared with the previous year. It will thus be seen that India has maintained her position in the United Kingdom market as a result of the new arrangement.

Prices of hemp in London have, on the whole, remained steady throughout 1934-35. The maximum quotation of New Zeland hemp has undergone a slight decline. It is not possible, however, from these data to draw any definite conclusion regarding the relative position of India in the United Kingdom market in respect of prices.

FRUITS AND VEGETABLES.

(a) Fresh.

Ceylon and Seychelles among the Empire countries have granted preference on fresh fruits and vegetables exported from India. The trade with Seychelles is very small in total value.

Indian exports to Ceylon consist mainly of onions which are admitted duty-free into that country along with currants and potatoes. Separate figures of exports of the last two items are not available as they are recorded undistinguished under other sorts of fresh fruits and vegetables. The share of Ceylon in Indian exports of this article is shown in the following table:

						R	s. (000).
1931-32	••	••	••	• •	••	••	4,41
1932-33	••	• •	• •	••	• •	•• ,	4,54

: 1934-35	· · · · · · · · · · · · · · · · · · ·	:	••	•••	••	••	4,45

Share of Seychelles in 1934-35 is Rs. 8,000.

(b) Dried, Salted or Preserved.

The principal Empire customers which allow preference to Indian goods in this class, are Ceylon and Fiji. Figures of Indian exports in this class are shown in the following table:

Exports of Fruits and Vegetables, Dried, etc.

	1932-33. 1933-34. 1934-35. Rs. (000). Rs. (000). Rs. (000).	2,26	ന		2,29	76,79

		Ceylon	Eiji	Total of trad	Granting preference	Not grantir	

*The margin of preference is 20 per cent, in the case of dried fruits and 15 per cent. in others.

Total Indian exports in this class has increased by 18% from about 13 thousand tons in 1933-34 to 15 thousand tons in 1934-35. Exports to countries granting preference rose from 2,670 tons or 21 per cent. in 1933-34 to 3,300 tons or 22 per cent. in the year under report. The relative position of the trade with foreign countries also showed very little change in 1934-35 as compared with the previous year. These countries accounted for nearly 79 per cent. of the total trade, the actual shipments however increasing from 10·1 thousand cwts. to 11·8 thousand cwts.

Imports of articles in this class into Ceylon are shown in the table below: Imports of dried, salted and preserved fruits and vegetables into Ceylon.

							Tons (000).
Year.					Total Imports.	From British India.	From Empire countries.	From Foreign countries.
1930	• •	• •	••	••	1.0	0.75	0.98	0.02
1931	• •	••	• •	• •	1.1	0.75	1.00	0.1
1932	• •	••	••	• •	1.1	0.95	1.08	0.02
1933		••	• •		0.95	0.43	0.6	0.35
1934	• •	• •	••	• •	1.2	0.33	0.6	$0 \cdot 6$

The total imports into Ceylon during 1934 amounted to 1,200 tons as compared with 950 tons in 1933. India's share in the trade however declined from 430 tons or 45 per cent. in 1933 to 330 tons or 27 per cent. in 1934. The share of the other Empire countries excluding India increased from 170 tons to 270 tons in the same period. Consignments from foreign countries which accounted for 350 tons or 37 per cent. in 1933 rose to 600 tons or 50 per cent. in 1934. India has therefore lost ground in this market in comparison both with other Empire countries and foreign countries.

IRON AND STEEL.

Ten per cent. ad valorem preferences has been granted on certain kinds of iron and steel in Ceylon, the most notable exceptions being pig iron and scrap iron for remanufacture. A similar preference is obtainable in Seychelles also. The share of the latter country in this trade, however, is so small as to be practically negligible.

The following table gives the exports from India of iron and steel excluding ores, pig iron and old iron for remanufacture:

Molpagnes

						11	L 4 :

				Ceylon	Seyohelles · ·	Total of trade with countries	Granting preference	Not granting preference	Grand Total
				වී	So.	To	•	m	

Total Indian exports of these articles declined from 47 thousand tons in 1933-34 to only 1 thousand tons in 1934-35. This drop is explained by the fact that there were no exports in 1934-35 of bars and channels and steel bars, which are the only important items in this class. It is unnecessary to consider the relative position of the Empire countries in this insignificant amount of total exports.

PERFUMERY.

Preference to imports of Indian origin has been granted in Ceylon, Britis Malaya and Mauritius. Figures of Indian exports are shown in the table below:—

Exports of Perfumery.

	Margin			Value.						
	preferei	10e.		1931-32. R. (000)	1932-33. R. (000)	1933-34. R. (000)	1934-8 R. (0

Not granting	g preference	••	••	1,03	1,03	1,07	1,64			
Grand	Total	••	••	1,43	1,41	2,07	2,13			

Total exports of perfumery from India slightly increased in value from Rs. 207 thousand in 1933-34 to Rs. 213 thousand in 1934-35. The value of exports to the Empire countries decreased in the same period from Rs. 100 thousand to Rs. 49 thousand. The share of Ceylon which is our chief customer among the countries granting preference dwindled from Rs. 94 thousand to Rs. 38 thousand. On the other hand there was a considerable increase in the value of our exports to countries not granting preference from Rs. 107 thousand or 52 per cent. of the value of total Indian exports in 1933-34 to Rs. 164 thousand or 77 per cent.

BEANS.

India has secured a preference of 50 cents per cwt. on beans in Ceylon. A similar unscheduled preference of 10 per cent. is also admissible in the United Kingdom under Article 1 of the Agreement.

Exports of beans from India in the four years ending 1934-35 were as follows:---

					118			
		1934-35.	2,57	19		3,18	10,96	14,14
	÷	1933-34.	2,18	74		2,02	9,38	12,30

	Margin of	preference.	••10% ad val	50c per cwt.	les—		:	:
			United Kingdom	Ceylon	Total of trade with countries—	Granting preference	Not granting preference	Grand Total

The total exports of beans from India have been declining in recent years the amount exported in 1934-35 being 22 thousand tons as compared with 26 thousand tons in the preceding year. The share of the United Kingdom remained unchanged at 5 thousand tons in the same period, while that of Ceylon receded from 800 tons to 600 tons. Consignments to countries not granting preference contracted from 20 thousand tons in 1933-34 to 17 thousand tons in 1934-35, the percentage share dropping from 78 to 75.

APPAREL.

As apparel is not separately specified in the Ceylon Customs Tariff it is presumed that the 10% preference asked for has not been conceded except in the case of apparel of silk and artificial silk in which there is an Empire preference of 5%. Further the share of Ceylon in the total exports of this article from India is comparatively small. Exports of apparel from India are shown in the table below.

								Total Exports.	To Ceylon.
								Rs. (000)	Rs. (000)
1	.931-32	• •	••	• •	••	•	••	10,33	55
3	.932-33	••	••	••	••	••	••	8,93	60

1	.934-35	• •	••	• •	••	• •	••	11,33	63

Total exports from India rose slightly in value from Rs. 11,14 thousand in 1933-34 to Rs. 11,33 thousand in 1934-35. Exports to Ceylon were valued at Rs. 63 thousand in the year under review as against Rs. 56 thousand in 1933-34.

BOOTS AND SHOES.

Boots and shoes of Indian origin enjoy Empire preference of 10 per cent. ad valorem on importation into Ceylon. An unscheduled preference of 20 per cent. is also admissible in the United Kingdom under Article 1 of the Ottawa Agreement.

.hom in the table below:-

			•		120				`

Figures relating to Indian exports of this article are shown in the table below.		,	Margin of preference.	Ceylon 10% ad val Pairs (603).	Kingdom 20% ad val.	Total of trade with countries—	Granting preference	Not granting preference	Grand Total

Total exports of boots and shoes from India increased by 161 per cent. from 255 thousand pairs in 1933-34 to 666 thousand pairs in 1934-35. Exports to countries granting preference nearly doubled in the same period, from 67 thousand pairs to 121 thousand pairs the percentage share however contracting from 26 to 18. The share of the countries not granting preference rose from 188 thousand pairs or 74 per cent. of the total exports to 545 thousand pairs or 82 per cent.

Imports of boots and shoes into Ceylon are shown in the table below:-

Boots and Shoes.

[Dozen pairs (000).]

•				Total imports.	From British India.	From U. K.	From Empire countries.	From Foreign countries.
1930	**	**	••	19	0.3	8-0	8.7	10.3
1931	**	••	••	25	0.7	4.9	6.4	18.6
1932	**	••	••	37	1-1	5.7	7.8	29.2
1933	••	•	••	17	1.8	5.6	7.8	9.2
1934	**	••	**	22	3.2	5`4	10-4	11.6

(N.B.—The figures of imports of Indian 'boots and shoes' into Ceylon prior to 1932 differ from those of exports from India to Ceylon as published in the Indian Trade Accounts. This may, perhaps, be accounted for by the revised classification of goods introduced into the Ceylon trade returns from April 1932.)

Total imports of this article into Ceylon increased from 17 thousand dozen pairs in 1933 to 22 thousand dozen pairs in 1934. India's share in the trade though comparatively small rose in the same period from 1,800 dozen pairs to 3,200 dozen pairs or from 11 to 15 per cent. Consignments from the United Kingdom dropped from 5,600 dozen pairs in 1933 to 5,400 dozen pairs in 1934. Shipments from foreign countries amounted to 11,600 dozen pairs or 53 per cent. of the total imports in 1934 as against 9,200 dozen pairs or 54 per cent. The relative position of the Empire and the non-Empire countries remained almost unchanged in 1934 as compared with the previous year.

BRASS, BRONZE, BRASSWARE AND BRONZEWARE.

The Federated and Unfederated Malaya States have granted a 10 per cent preference on this item. Unscheduled preferences at varying rates are also admissible to Indian products in British Guiana, British West India Islands and Fiji. The following table shows the volume of Indian exports in this class of articles:—

122 1931-35. is is 5,38 Ę 30 ೧ 1932-33. 1933-34. 3,76 1,07 10 7 9 Ra. Grand Total

Compared to the total trade, the shares of the Federated Malaya States (in which is included the export, if any, to the Unfederated Malay) as also of the other countries which grant preference are small. Total Indian exports increased from 6,000 cwts. in 1933-34 to 10,000 cwts. in the year under review. Trade with countries granting preference increased by 400 cwts. to 800 cwts. in 1934-35 while that with foreign countries increased from 5,700 cwts. in 1933-34 to 9,300 cwts. in 1934-35.

COPPER AND COPPERWARE.

India has been granted a preference of 10 per cent. in British Malaya (excluding the Straits Settlements). She is entitled to unscheduled Empire preference at varying rates in certain other countries as well, the most important of which is the United Kingdom. The exports to the countries granting preference are insignificant, compared to the total trade. The exports from India are shown in the following table:—

Copper and copperware.

1					
			Cwts. (000).		•

	-		:	·	
Total	exports	250	229	254	204

^{*} A preference of 20 per cent. ad valorem is admissible on copper manufactures other than plates, sheets, etc.

Total exports from India in 1934-35 were 204 thousand cwts. as compared with 254 thousand cwts. in the previous year. There were no exports to the United Kingdom in the last two years and the Federated Malay States took only 1 thousand cwts. in the year under review.

FISHMAWS AND SHARKFINS.

India enjoys a 10 per cent. preference in this article in British Malay (excluding the Straits Settlements). A similar unscheduled preference is also admissible to her in the United Kingdom under Article 1 of the Agreement, Figures of Indian export are shown in the table below.

The following table shows the exports of fishmaws and sharkfins from British India during the last four years:—	llowing tab ia during t	ole shows he last for	the expor 11 years:-	ts of fish	maws and	sharkfins fi	com

Grand Total

Total Indian exports under this head increased from 7,300 cwts. in 1933-1934 to 7,400 cwts. in the year under report. The purchases by the United Kingdom declined in the same period from 1,400 cwts. to 1,000 cwts. the reduction in percentage being from 19 to 14. On the other hand the share of the countries not granting preference rose from 5,900 cwts. or 81 per cent. of the total exports to 6,400 cwts. or 86 per cent.

UNSCHEDULED ARTICLES.

By Article 1 of the Agreement, goods which would otherwise be liable to duty under the Import Duties Act have been guaranteed free entry into the United Kingdom when such goods are Indian. So long as such duties are retained Indian goods, not included in any of the Schedules to the Agreement, will therefore, be entitled to preference on importation into that country. Among the articles which come under this category the Indian Delegation considered the following items the most important:—

- (a) Barley.
- (b) Pulses.
- (c) Miscellaneous foodgrains.
- (d) Manure and bones.
- (e) Raw goat skins, and
- (f) Asbestos.

India's export trade in these commodities, except asbestos which is not separately specified in the Indian export returns, may be considered.

BARLEY.

The following table gives the exports of barley from India.

Exports of Barley from British India.

,		•	v	·	•		Tons ((000).
					Total	To	To	То
•					Exports.	U. K.	Empire countries.	Foreign countries.

1934-35	• •	••	••	• •	14-1	13.9	14.0	0.1

Indian exports in 1934-35 rose again to an appreciable figure amounting to 14,100 tons as compared with 100 tons in the preceding year. In 1932-33 the exports were 16,600 tons. Practically the entire amount exported was consigned to the United Kingdom, the share of other Empire and foreign countries being barely 200 tons.

The table below shows the acreage and yield of barley in India and some of the other principal producing countries of the world:—

Production of barley.

			A	eres (000).		Tons (000)				
		India.	U.S.A.	Canada.	Germany.	India.	U.S.A.	Canada. 1	Germany	
1929-30		7,049	13,517	5,926	3,834	2,293	5,992	2,188	3,124

	(a) Inc implete.				(b) N	ot yet available.				

Figures of Indian production for 1934-35 are not yet available. The acreage and outturn in India in 1933-34 were somewhat larger than in the preceding year. The production in United States of America in 1933-34, was a little over half of that in 1932-33. Canadian production also declined in the same period though not to the same extent as United States of America. The German crop of 1933-34 was, however, bigger than in the previous year.

PULSES.

The following table shows the exports of pulses from India:— Exports of pulses (total) from India.

						Tong (000).		
	ı				Total.	U. K.	Empire countries.	Foreign countries.
1929-30	• •	• •	• •	• •	$97 \cdot 0$	$21 \cdot 7$	65.9	$31 \cdot 1$
1930-31	••	• •	• •	• •	$82 \cdot 2$	18.9 · ·	59.4	$22 \cdot 8$
1931-32	• •	• •	• •	• •	$92 \cdot 7$	16.9 (18%)	57.6 (62%)	35.1
1932-33	• •		• •	• •	111-1		72.9 (66%)	$38 \cdot 2$
1933-34	• •	• •	• •	• •	$104 \cdot 4$	21.3 (20%)		$42 \cdot 7$
1934-35	••	• •	• •	••	112.0		86.1 (77%)	$25 \cdot 9$

Total exports of pulses from India have advanced by about 7 per cent. to 112 thousand tons in 1934-35 as compared with the previous year. Shipments to the United Kingdom rose in the same period from 21 thousand tons to 39 thousand tons, the percentage figures increasing from 20 to 35. Consignments to Empire countries other than United Kingdom, also registered an advance, being 47 thousand tons or 42 per cent. in 1934-35, as against 40 thousand tons or 39 per cent. in the previous year. On the other hand the share of foreign countries greatly contracted to 26 thousand tons or 23 per cent. in the year under report as compared with 43 thousand tons or 41 per cent. in 1933-34.

MISCELLANEOUS FOODGRAINS.

India enjoys a 10 per cent. preference in this group of articles which consists of all foodgrains other than wheat, rice, barley, pulses and maize. The

class of grains included under this category forms a comparatively unimportant part in the total volume of India's exports in foodgrains. The share of the United Kingdom in Indian exports of these articles has been consistently very small. The figures of export are given below:—

Exports of foodgrains other than rice, wheat, pulse, barley and maize from India.

								Tons (000).		
	•	` '		•		Total.	U. K.	Empire countries.	Foreign	
1929-30						17.6	0.1	6.0	11.6	
1930-31		• •	• •	• •		$7 \cdot 7$	0.1	3.2	4.5	
1931-32		••			• •	59.8	1.1	8.6	$51 \cdot 2$	
1932-33	• •	••		••		17.8	0.7	5.0	12.8	
1933-34	• •	• •	• •	• •		$7 \cdot 0$	0.1	$2 \cdot 8$	4.2	
1934-35	• •	••		••	• •	32.8	1.0	11.5	21.3	

The course of Indian exports has been generally erratic in the case of this group. Total shipment from India increased from 7 thousand tons in 1933-34 to about 33 thousand tons in 1934-35. The share of United Kingdom increased from 100 to 1,000 tons but the total amount of her offtake is still very small. Exports to other Empire countries excluding United Kingdom rose from 2.8 thousand tons in 1933-34 to about 11.5 thousand tons in 1934-35. The share of foreign countries has gone up from 4 thousand tons to 21 thousand tons in the same period.

MANURES AND BONES.

Manures as recorded in the Indian trade returns consists of such item as bones (for manuria' purposes), bonemeal, fish manures, guano, sulphate of ammonia, etc. The amount of preference admissible in the United Kingdom to the Indian products varies according to the nature of the manure, e.g., it is 20 per cent. in the case of sulphate of ammonia and 10 per cent. in the case of bonemeal. The following table shows the volume of Indian exports in this line.

Exports of manures (total) from India.

			•	•				Tons (000).

1934-35	••	••		• •	• •	51.5	21.4 (42%)	42.0 (82%)	9.5 (18%)	

*Figures prior to 1931-32 includes crushed bones which are now recorded separately as "Bones for manufacturing purposes".

The rising tendency of total Indian exports, which started in 1932-33 has been well maintained in 1934-35, when they amounted to 52 thousand tons as against 41 thousand tons in the preceding year. Consignments for United Kingdom which were 15 thousand tons or 37 per cent. of the total exports in 1933-34 increased to 21 thousand tons or 42 per cent. in 1934-35. The

share of Empire countries other than United Kingdom rose in the same period from 18 thousand tons to 21 thousand tons but the percentage share was reduced from 44 to 40. Purchases by foreign countries advanced from 7.5 thousand tons in 1933-34 to 9.5 thousand tons in the year under review but this meant the same percentage of the total exports, about 18 per cent.

GOAT SKINS, RAW.

The following table shows the exports of raw goat skins from India:—

* *Vide* footnote under the next table.

The total exports declined from 25.8 million in 1933-34 to 19.5 million in the year under review. The consignments going to United Kingdom contracted from 6.8 million or 26 per cent. of the total exports to 4.2 million or 22 per cent. in the same period. The share of the other countries also decreased from 19 million to 15.3 million but their percentage registered an advance from 74 to 78.

The following table gives the imports of undressed goat skins, dry and wet, into the United Kingdom:—

*The figures for 1929 and 1930 are not comparable with the corresponding figures of exports from India. This may be due to a difference in classification.

Total imports of goat skins into the United Kingdom diminished from 9.3 million in 1933 to 7.5 million in 1934. It would be noticed that the share of India has declined both absolutely and relatively from 6.6 million pieces or 71 per cent. of the trade in 1933 to 4.8 million pieces or 64 per cent. in 1934. The shipments from other Empire countries excluding India have remained almost steady at round about 2 million pieces, the percentage share of these countries, however, increasing from 21 to 30 as a result of the smaller

total imports. The share of foreign countries decreased from 704 thousand pieces or 8 per cent. in 1933-34 to 435 thousand pieces or 6 per cent. in the year under report. Other Empire countries have fared better than India in this trade in 1934-35.

RAW COTTON.

The steps taken by His Majesty's Government to implement Article 8 of the Ottawa Agreement concerning raw cotton were discussed in last year's report. In order to encourage the greater use of Indian cotton in the United Kingdom the British Government set up a Committee known as the "Lancashire Indian Cotton Committee" and the problem of increasing the consumption of Indian cotton in the United Kingdom is being tackled by this Committee from various aspects. Mention was made in last year's report regarding the appointment by this Committee of a Lancashire Cotton Commissioner to reside for the greater part of the year in India and to act as a liaison officer between cotton interests in India and Lancashire. This post was held during the year under report first by the late Mr. R. Fleming, and then by Mr. H. C. Short. both of whom, before they took up this appointment, had spent several years in India and gained considerable experience and intimate knowledge of the Indian cotton trade. Further, the Committee made considerable progress, during the year, in its campaign for the extended use of Indian cotton in the United Kingdom. The first task of the Committee was that of creating a voluntary preference for Indian cotton in Lancashire by co-ordinating the activities of the different trades and the second task was that of overcoming the technical difficulties encountered by spinners in using Indian cotton. In furtherance of the first object, the Committee published, from time to time, lists of spinners making yarn from Indian cotton and of manufacturers weaving cloth containing such yarn. Wide publicity was also given to the finished products made 'wholly or partly' of Indian cotton by organising displays at exhibitions, and at specially convened meetings of the mercantile community. In pursuance of its second task, the Committee appointed an Advisory Panel to advise spinners on technical matters. Certain investigations were carried out at the Shirley Institute on problems connected with the processing of Indian cottons. As a result of these investigations, it has been possible to communicate to spinners the modifications necessary for adapting Lancashire machinery to spin short-staple Indian cottons, the best twist to be used in spinning, and the drafts to be employed at various stages of processing these cottons, as well as the methods to be employed for obtaining the best results in sizing and weaving. Demonstrations of these processes were also given. In addition to these particular growths of Indian cotton were tested and their results made known These growths included both medium-staple and short-staple to spinners. Indian cottons. The increased use of Indian cotton in the woollen industry, as in the manufacture of felt, belting, gun cotton, etc., also engaged the attention of the Lancashire Indian Cotton Committee. The position may also be studied from the statistical side.

The following table shows the exports of cotton raw from India to the United Kingdom and to other countries:—

1001 00						and of t	he tutal exports	

Note.—Figures within brackets represent percentages of the total exports.

Exports of raw cotton during 1934-35 amounted to 626 thousand tons as compared with 512 thousand tons and 371 thousand tons in the two preceding years. The exports have thus revived very considerably during the year under review though they are still to some extent short of those in 1929-30 and 1930-31. The increase in exports during the year under review was 22 per cent. over that in 1933-34. Exports to the United Kingdom amounted to 63 thousand tons or 10 per cent. of the total exports as compared with 63 thousand tons or 12 per cent. of the total exports in the preceding year.

The following table gives the imports of cotton raw into the United Kingdom:—

Imports of cotton raw into the United Kingdom.

	L	тероне в	n couc	no raw on	to the Ontica	11thywom.

1934	• •	• •		564	68* (12%)		457 (81·1%)		
1007				*Incom _]	olete.				

The total imports of raw cotton into the United Kingdom declined from 627 thousand tons in 1933 to 564 thousand tons in the year under report. The figure relating to India's share is incomplete at present. Even then, it would be seen that imports from India have risen from 49 thousand tons in 1933 to 68 thousand tons in 1934, the percentage share increasing from 8 to 12. The share of other Empire countries excluding India is almost the same as in the preceding year but that of foreign countries contracted from 539 thousand tons in 1933 or 86 per cent. to 457 thousand tons or 81 per cent. in 1934. India's relative and absolute shares have both, therefore, increased considerably during 1934. As has been remarked by the Lancashire Cotton Committee, however, it is impossible to say to what extent this striking increase can be ascribed to parities obtaining throughout the season and to what extent to the activity of the Committee. The parity was favourable to Indian cotton for most of the months in 1934.

The following table gives the price parity of raw cotton for the cotton season (September to August) from 1927-28:—

Price Parity of cotton, raw.

1934-35 (Se			••	••	• • •	$6 \cdot 94$	$5 \cdot 44$	78.4

[*Figures for 1934-35 are estimated.

The parity from September 1933 to August 1934 was 75·1 as compared with 86·1 and 89·6 in the two earlier seasons. The parity was on a lower level till December 1934, but in the first 3 months of 1935 there was a slight increase. The average parity from September 1934 to March 1935 was 78·4 due mainly to the rise in the last three months. Even then, the parity is considerably more favourable to India than in 1932-33 and 1931-32.

IRON AND STEEL.

The reasons for concluding the Supplementary Agreement regarding iron and steel were fully explained in last year's report. Since then the position has undergone a considerable change. The Report of the Tariff Board Enquiry into the steel industry was published and the new steel tariff came into force last year. The Tariff Board examined fully the arrangements for the sale of pig iron and galvanised sheets which resulted from the Ottawa The Board's conclusion was that the Agreement had been succesful and beneficial as regards pig iron, but that regarding galvanised sheets had served its purpose and owing to the practical difficulties of working it, the The steel interests concerned both Board did not recommend its continuance. in India and in England were also not anxious to renew the Agreement about galvanised sheets which therefore ceased to be in operation in 1934-35. Supplementary Agreement regarding pig iron, however, stood and its working during 1934-35 is examined below.

The following table gives the exports of pig iron from India:—

Exports of pig iron from India. Rs. (000). Tons (000). Empire Foreign Empire Foreign . coun-Total. U.K. coun-Total. U.K. councountrics. tries, tries. tries. 33,21 38,48 24,11 1929-30 2,59,40 34,97 2,24,43 $75 \cdot 2$ 568.8 71.2 $493 \cdot 6$ 1930-31 1,70,40 39,96 1,30,44 $439 \cdot 1$ 99.0102.8 336.3 1931-32 25,19 1,22,70 97,51 350.9 69.1 $72 \cdot 2$ $278 \cdot 7$ (20%) $(21\%) \\ 79.8$ (79%)1932.33 74,32 26,06 27,46 46,86 218.4 75.8138.6 (35%) (37%) (63%)1933-34 21,55 22,56 85,03 62,47 280.8377.593.1 $96 \cdot 7$ (26%) 102·3 (74%)(25%)1934:35 92,68 21,33 22,39 314.870,29 417.1 98.5 (25%)(75%)(24%)

The total exports of pig iron from India in 1934-35 amounted to 417 thousand tons as compared with 377 and 218 thousand tons in the two previous years. Thus, the trade has increased considerably in the year under report. Shipments to the United Kingdom during 1934-35 amounted to 98 thousand tons as compared with 93 and 76 thousand tons in the preceding two years. India's exports to the United Kingdom have grown considerably in the last two years and in the year under report the figure is almost the same as in 1930-31. The percentage share, however, in the year under review is 1 point less than in the previous year and about 11 points less than in 1932-33. The share of foreign countries has also risen in the last three years. In 1932-33 exports to these countries amounted to 139 thousand tons or 63 per cent. Next year, they rose to 281 thousand tons or 74 per cent. and in the year under review there was a still further increase to 315 thousand tons or 75 per cent.

The following table gives the imports of pig iron into the United Kingdom:—

Imports of pig iron into the United Kingdom.

					Total Imports.	From British India.	Tons From Empire countries.	(000). From Foreign countries.
1929	••		••	• •	122.0	28.0	28.1	93.9
1930		• •	• •	••	290.5	126.0	126.1	164.4
1931	••	••	••	••	284.0	46·8 (16·5%)	47.3	236.7
1932	• •	• •	• •	••	135.0	83·4 (61·8%)	83•4	51.6
1933	••	••	• •	••	93 • 1	80·6 (86·6%)	80.6	12.5
1934	••	••	••	••	$125 \cdot 7$	110·1 (87·6%)	110.1	15.6

The total imports of pig iron in the United Kingdom in 1934 were 12 thousand tons as compared with 93 thousand tons in 1933 and 135 thousand tons in 1932. India's share has been increasing in the last three or fou years. In 1931, India supplied only 47 thousand tons of pig iron to the United Kingdom or 16 per cent. of its total requirements. In 1932, shipments from India rose to 83 thousand tons, accounting for 62 per cent. of the total imports into the United Kingdom. In 1933, there was a slight fall in the actual quantity imported from India which amounted to 81 thousand tons but the percentage share rose in that year to 87. In the year under review, the United Kingdom purchased 110 thousand tons from India or nearly 88 per cent. of her total requirements for the year. Thus, there has been a considerable increase in the relative as well as absolute share of India in the United Kingdom market.

CHAPTER III.

Imports into India.

APPAREL.

The items included under this head are apparel (including drapery, uniforms, accourtements), caps, bonnets and hatters' ware and second-hand clothing, all of which enjoy a preference of 10 per cent. The total trade rose from Rs. 69 lakhs in 1933-34 to Rs. 72 lakhs in 1934-35. There was a progressive decline in the value of imports from the United Kingdom which amounted to Rs. 18 lakhs in 1934-35 as compared with Rs. 20 lakhs in 1933-34 and Rs. 21½ Rs. 18 lakhs in 1932-33. The percentage share of the United Kingdom also fell from lakhs in 1932-33 to 29 per cent. in 1933-34 and further to 25 per cent. 33 per cent. in 1932-33 to 29 per cent. in 1933-34 and further to 25 per cent.

The position of the United Kingdom in this line of trade is illustrated in the following table:—

the following table:-			Valu	e in rupces ((000).

ARMS AND AMMUNITION.

Total imports under this head have been on the decline in recent years. In cartridge cases imports fell from 16.6 millions in 1933-34 to 15.7 millions in 1934-35 of which the United Kingdom supplied 13 millions or 83 per cent. in 1933-34. The drop in the as compared with 14.2 millions or 86 per cent. in 1933-34. The drop in the share of the United Kingdom was largely due to the revival of competition share of the United Kingdom was largely due to the revival of rom 1.4 from the United States of America which increased her contribution from 1.4 millions to 1.8 millions in the year under review.

As regards firearms, total imports fell from Rs. 10 lakhs to Rs. $8\frac{1}{2}$ lakhs The United Kingdom contribution also fell from Rs. 7 lakhs to Rs. $6\frac{1}{2}$ lakhs but

Proposition where of other

her percentage share advanced from 74 to 78 per cent. The table given below exhibits the relative movements in the trade under the two sub-heads:—

ASBESTOS MANUFACTURES.

Imports of asbestos packings are comparatively small, being valued at Rs. 2 lakhs, while those of other asbestos manufactures were valued at nearly Rs. 15 lakhs in 1934-35. The corresponding imports in 1933-34 were valued at Rs. 2½ lakhs and Rs. 14 lakhs. In asbestos packings the United Kingdom holds a practical monopoly, her share in 1934-35 being 91 per cent. as against '90 per cent. in the preceding year. As regards other asbestos manufactures the United Kingdom could not maintain her position against German and

Belgian competition and her contribution fell from 67 per cent. to 59 per cent. The figures are as follows:-

The trade in leather footwear showed a small increase in quantity with a decrease in value compared with 1933-34, imports totalling 352,000 pairs valued at Rs. 12 lakhs in 1934-35. There was an increase in the consignments from the United Kingdom which amounted to 111,000 pairs valued at Rs. 5.4 lakhs and her relative share in the trade advanced from 29 per cent. in 1933-34 to 32 per cent. in 1934-35 in quantity and from 43 to 45 per cent. in value. of the supplies was drawn from Czecho-Slovakia and Italy (transit goods from Czecho-Slovakia and Italy (transit goods from Czecho-Slovakia) Czecho-Slovakia) which together accounted for 62 per cent. in 1934-35 as compared with the slightly pared with 55 per cent. in 1933-34. The United Kingdom has thus slightly advanced her share, although the aggregate trade showed hardly any expansion.

BRUSHES.

The position of the United Kingdom in the imports of brushes is set out in the following table:—

the following table:			Quantity in doz. (600).								
	•	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33,	1933-34.	1934-35,

Percentage of U. K. total	io ••	39	33	35	31	43	48				

Total imports of brushes rose from 525,000 dozens valued at Rs. 11 lakhs in 1933-34 to 748,000 dozens valued at Rs. 14 lakhs in 1934-35. Imports from the United Kingdom also increased from 95,000 dozens to 136,000 dozens in quantity and from Rs. 4.72 lakhs to Rs. 6.66 lakhs in value. There was practically no variation on the basis of quantity in the percentage share of the United Kingdom which remained steady at 18 per cent., but judged by value her share rose from 43 to 48 per cent. This disparity is due to the receipts of a larger number of cheap Japanese brushes, chiefly toilet, at abnormally low prices which very much swelled the quantity figures without corresponding gains in value. Paint and varnish brushes were imported to the value of Rs. 22 lakhs as compared with Rs. 2 lakhs in 1933-34. The United Kingdom contributed Rs. 1.68 lakhs or 69 per cent. as against Rs. 1.21 lakhs or 61 per cent. The United Kingdom also increased her sales of toilet brushes from 27,000 dozens valued at Rs. 1½ lakhs to 57,000 dozens valued at Rs. 2½ lakhs, total imports rising from 221,000 dozens valued at Rs. 41 lakhs to 382,000 dozens valued at Rs. 6 lakhs. Thus, on the basis of quantity the United Kingdom advanced her share from 12 per cent. to 15 per cent., the corresponding increase in value being from 32 to 40 per cent. As regards other brushes the United Kingdom supplied to the value of Rs. 2½ lakhs or 48 per cent. out of a total of Rs. 5-1/3 lakhs as compared with Rs. 2 lakhs or 46 per cent. of the total value of Rs. $4\frac{1}{2}$ lakhs in 1933-34.

BUILDING AND ENGINEERING MATERIALS OTHER THAN IRON STEEL OR WOOD.

In 1934-35 imports of articles under this head enjoying a preferential duty of 10 per cent. under the Ottawa Trade Agreement showed a small variation and were valued at Rs. 41·2 lakhs as compared with Rs. 40·9 lakhs in 1933-34.

But the United Kingdom appreciably improved her position in the Indian market in the year under review. Total imports from that country increased from Rs. 20.9 lakhs in 1933-34 to Rs. 24.7 lakhs in 1934-35 and this improvement is noticeable in each class of these articles. The value of her consignments of fire bricks amounted to Rs. 1.02 lakhs out of a total of Rs. 1.07 lakhs as compared with Rs. 1.30 lakhs out of the total importations of Rs. 1.40 lakhs in 1933-34, her relative share in the total trade showing a rise from 93 per cent. to 95 per cent. In cement the total imports advanced from Rs. 22 lakhs to Rs. 24 lakhs or by 9 per cent. while the share of the United Kingdom increased from Rs. 14 lakhs in 1933-34 to Rs. 18 lakhs in 1934-35, a rise of about 29 per cent. In tiles the total imports declined from 13.6 millions in 1933-34 to 13.3 millions in 1934-35, but the United Kingdom increased her share from 1.8 millions to 2.3 millions.

BUTTONS-METAL.

The United Kingdom enjoys a limited trade in this line. Total imports of metal buttons advanced from Rs. $9\frac{1}{2}$ lakhs in 1933-34 to Rs. $10\frac{1}{4}$ lakhs in 1934-35 to which the United Kingdom contributed only Rs. 1 lakh (or 10 per cent.) almost the same as in the preceding year. The supplies were mostly drawn from continental countries. The following table shows the position of the United Kingdom in this trade:—

	Value in thousand rupees.									
Buttons-	e	years' verage nding 929-30.	1930-31,	1931-32.	1932-33.	1983-34,	1934-35,

CHEMICALS AND CHEMICAL PREPARATIONS (EXCLUDING CHEMICAL MANURES AND MEDICINES).

The following figures relating to the imports of all classes of chemicals throw some light on the position of the United Kingdom in the trade:—

Value in lakels of rupees.

						•
	3 years' average ending 1929-30.	1930-31.	1031-32.	1932-33.	1933-34.	1934-35.
Chemicals and chemical preparations:-						
Imports from the United Kingdom .	1 21	141	141	140	149	164
Total all countries		261	257	271	. 270	292
Percentage of the United Kingdom to	57	54	55	52	55	56

The total imports of chemicals which had remained fairly steady at Rs. 2,70 lakhs in 1932-33 and 1933-34, advanced to Rs. 2,92 lakhs in 1934-35. Imports from the United Kingdom also rose from Rs. 1,49 lakhs to Rs. 1,64 lakhs and the percentage share from 55 to 56. Preferences granted

to the United Kingdom do not extend over the whole range of chemicals, but it should be noted that the United Kindgom maintained her predominant position in the imports of sodium carbonate and caustic soda, both of which are liable to preferential duties. In the former, the consignments from the United Kingdom rose from 893,000 cwts. out of a total of 1,131,000 cwts. in 1933-34 to 971,000 cwts. out of a total of 1,236,000 cwts. in 1934-35 and her relative share remained fairly steady at 79 per cent. In the latter, the United Kingdom also increased her supplies from 260,000 cwts. to 294,000 cwts. although there was a decrease in her percentage share from 84 to 78 per cent., the total imports rising from 308,000 to 378,000 cwts. Among other preferential items the United Kingdom enjoys a practical monopoly in sodium cyanide, while in disinfectants other than napthalene and bichromate of potas sium the share of the United Kingdom both actual and relative showed dec reases. In ammonia and salts thereof and bichromate of soda the imports from the United Kingdom showed increases but her percentage share recorded a decrease.

CORDAGE AND ROPE OF VEGETABLE FIBRE.

While the aggregate trade under this head which excludes cordage and rope of jute and cotton showed an advance, there was a set-back in the participation of the United Kingdom in this trade. Total imports amounted to 22,000 cwts. in 1934-35 as compared with 18,000 cwts. in 1933-34, but those from the United Kingdom receded from 6,500 cwts. to 4,800 cwts. or a drop of 26 per cent. As a consequence the percentage share of the United Kingdom in this trade fell from 36 to 22. The figures are shown in the following table:

		Quantity in cwts. (000).				Value in Rs. (000).						
,	3 years' average ending. 1929-30.	1930- 31.	1931- 32.	1932- 33.	1933- 34.	1931- 35,	3 years' average ending 1929-30.	31.	1931- 32.	1932- 33.	1933- l 34.	193 1 - 35.

Notwithstanding the preference granted by India, the United Kingdom could not effectively displace foreign competition chiefly from the Philippine in this line.

CORK MANUFACTURES.

Total imports amounted to 7,600 cwts. valued at Rs. 6 lakhs in 1934-30 as compared with 7,900 cwts. valued at Rs. 5 lakhs in the preceding year. The supplies were drawn chiefly from Portugal. Consignments from the United Kingdom which are comparatively small remained fairly steady at 1,000 cwts. valued at Rs. ½ lakh. The percentage share of the United Kingdom showed a small increase in quantity from 13 to 14. but dropped in value from 11 to 9 per cent.

CUTLERY (OTHER THAN PRUNING KNIVES).

Total imports of cutlery excluding prunning knives were valued at Rs. 26 lakhs as compared with Rs. 24 lakhs in 1933-34. Imports from the United Kingdom which generally consist of high quality products showed a small increase from Rs. 6.4 lakhs to Rs. 6.8 lakhs and accounted for 26 per cent. in 1934-35 as compared with 27 per cent. in the preceding year. The bulk of the supplies came as usual from Germany. Imports from that country increased in value from Rs. 13.7 lakhs to Rs. 14.8 lakhs but her share in the total trade remained stationary at 57 pcr cent. There is evidence of an increasing participation of Japan in the cheaper grades of imports.

DRUGS AND MEDICINES.

The preferences granted to the United Kingdom are limited to proprietary and patent medicines and unenumerated classes (excluding aloes, asafoetida, camphor, cocaine, morphia, opium, sarsaparilla and storax). The total value of proprietary and patent medicines rose from Rs. 31 lakhs in 1933-34 to Rs. 39 lakhs in 1934-35 and the share of the United Kingdom advanced from Rs. 16 lakhs to Rs. 20 lakhs with a decrease in her percentage share from 53 to 50 per cent. The share of the United States of America and France rose from 12 and 6 per cent. to 17 and 9 per cent. respectively, while that of Germany showed a decline from 19 to 18 per cent. In other kinds of drugs the share of the United Kingdom remained fairly steady.

EARTHENWARE AND PORCELAIN.

Total imports of earthenware (excluding pipes of earthenware and sanitary ware which are not liable to preferential duty) were valued at Rs. 11 lakhs in 1934-35 as compared with nearly Rs. 13 lakhs in the preceding year and Rs. $14\frac{1}{2}$ lakhs in 1932-33. To the imports in 1934-35 the United Kingdom contributed 62 per cent., Japan 20 per cent. and Germany, including consignments from the Netherlands and Belgium which are also of German origin, 9 per cent. as compared with 51, 29, and 11 per cent. respectively in 1933-34. The improvement in the British proportion in the reduced imports in 1934-35 is noteworthy.

The trade in electrical porcelain, although it recorded an improvement, is small in comparison with that of other kinds of porcelain. Imports of electrical porcelain were valued at Rs. 1,23,000 as compared with Rs. 60,000 in 1933-34 and Rs. 1,35,000 in 1932-33. The share of the United Kingdom was 37 per cent. (25 per cent.), Japan 29 per cent. (39 per cent.) and Germany 32 per cent (36 per cent.), the percentages for the preceding year being given in brackets. Other kinds of porcelain were imported to the value of Rs. 25 lakhs in 1934-35 as against Rs. 24 lakhs in 1933-34, and Rs. 28½ lakhs in 1932-33. The bulk of the imports, consisting of cheap table ware and common crockery, was drawn from Japan which accounted for 91 per cent. as in the preceding year. The share of the United Kingdom was only 6 per cent. in 1934-35 as against 4 per cent. in the preceding year.

FURNITURE AND CABINETWARE.

Preference is granted to all items included under this head with the exception of mouldings. Total imports excluding mouldings rose from Rs. 13 lakhs in 1933-34 to Rs. 16 lakhs in 1934-35 or an increase of 23 per cent. The United Kingdom imports also advanced from Rs. 9 lakhs to Rs. 11 lakhs but her percentage share remained steady at 69 per cent. The United Kingdom has thus been able to maintain the position already secured.

GLUE.

There was a decline in the imports of glue (including the share of clarified liquid glue not enjoying preference and of relatively small importance) which amounted to 16,000 cwts. valued at Rs. 3,82,000 in 1934-35 as compared with 20,000 cwts. valued at Rs. 5,35,000 in 1933-34. The supplies from the United Kingdom, however, stood almost at the same level as in the preceding year and amounted to a little over 4,000 cwts., but her percentage share in relation to the total trade rose from 22 to 28.

HARDWARE EXCLUDING CUTLERY AND ELECTROPLATED WARE.

The preference extends to all items under this comprehensive head with the exception of agricultural implements, buckets of tinned and galvanised iron and glass lamps. Omitting these three classes, the aggregate imports were as follows:—

V	alue	in	lakhs	of	rupees.
---	------	----	-------	----	---------

Hardware (excluding agricultural implements, buckets of tinned or galvanised iron and glass lamps).	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1984-35.
Imports from United Kingdom	178	122	91	85	92	96
Total all countries	5,00	3,50	2,54	2,92	2,81	3,01
Percentage of U.K. to total	36	35	36	29	33	32

With the increase in the total imports from Rs. 2,81 lakhs to Rs. 3,01 lakhs, the supplies from the United Kingdom rose in value from Rs. 92 lakhs to Rs. 96 lakhs but her percentage share in the total imports showed a drop from 33 per cent. in 1933-34 to 32 per cent. in 1934-35. The share of Germany which had fallen from 37 per cent. in 1932-33 to 31 per cent. in 1933-34 recovered to 32 per cent. in 1934-35. The participation of the United States of America also showed an increase from 8 to 10 per cent., while the share of Japan declined from 12 to 10 per cent. The improvement in the share of Germany was chiefly due to larger imports of metal lamps wherein the British manufacturers have been practically excluded from the market for a number of years. In most of the other lines the United Kingdom has been able to hold her own against foreign competition. Analysing the details of the trade in each class, it will be noticed that in builders' hardware total imports rose from Rs. 21 lakhs in 1933-34 to Rs. 24 lakhs in 1934-35, to which the Kingdom contributed Rs. 4.5 lakhs as against Rs. 3.8 lakhs in the preceding year with the result that her percentage share increased from 18 to 19. The remainder came chiefly from Germany and Sweden. which supplied 55 and 19 per cent. as compared with 56 and 20 per cent. respectively in 1933-34. Imports of domestic hardware also increased from Rs. 8 lakhs to Rs. 8-2/3 lakhs but the share of the United Kingdom fell from 30 to 28 per cent. Imports of enamelled ironware steadily declined from Rs. 23 lakhs in 1932-33 to Rs. 22 lakhs in 1933-34 and sharply to Rs. 17½ lakhs in 1934-35 chiefly as a result of the heavy minimum specific duties imposed under

the Indian Tariff Amendment Act, 1934. The bulk of the imports came as usual from Japan but as was expected her percentage share dropped from 70 to 55 per cent. On the other hand the shares of the United Kingdom and Czechoslovakia advanced from 6 and 12 per cent. to 7 and 20 per cent. respectively. The British proportion in gas mantles increased from 14 per cent. to 17 per cent. although there was a decline in the total imports from Rs. 5 lakhs in 1933-34 to Rs. 31 lakhs in 1934-35. Germany continued to supply the bulk of the trade and accounted for 72 per cent, as against 75 per cent, in 1933-34. The total imports of implements and tools (other than agricultural) and machine tools rose from Rs. 38! lakhs in 1933-34 to Rs. 473 lakhs in 1934-35 to which the United Kingdom contributed Rs. 25 lakhs or 53 per cent. as compared with Rs. 19 lakhs or 49 per cent. in the preceding year. The remainder came chiefly from the United States of America and Germany. As already stated the share of the United Kingdom in the imports of metal lamps which rose from Rs. 40 lakhs in 1933-34 to Rs. 53 lakhs in 1934-35, was insignificant, being approximately 2 per cent. of the value of the total imports. The trade is largely controlled by Germany which however reduced her participation from 70 per cent. to 67 per cent., while the share of the United States of America advanced from 16 to 20 per cent. The trade in safes and strong boxes is small, being valued at Rs. 26,000, and is practically confined to the United Kingdom. Imports of stoves rose slightly from Rs. 4.42 lakhs in 1933-34 to Rs. 4.80 lakhs in 1934-35 to which the United Kingdom contributed 17 per cent. and Sweden 69 per cent, as compared with 16 and 72 per cent, respectively in the preceding year.

INSTRUMENTS APPARATUS AND APPLIANCES AND PARTS THEREOF.

The total imports of instruments, apparatus and appliances and parts thereof rose from Rs. 4,02 lakhs in 1933-34 to Rs. 4,73 lakhs in 1934-35. The United Kingdom raised her contribution from Rs. 2,06 lakhs to Rs. 2,47 lakhs with an increase in the percentage share from 51 to 52 per cent. The figures are given below:

		value in lakus of rupees.							
Total instruments, etc.—	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35.			
Imports from U.K	2,88	2,55	1,83	1,94	2,06	2,47			
Total all countries	4,92	4,77	3,69	3,85	4,02	4,73			
Percentage of U. K. to total	59	53	50	50	51	52			

An examination of the detailed trade figures under the main preferential heads of this group reveals that in electrical instruments the United Kingdom advanced her share from Rs. 1,31 lakhs or 57 per cent. of the total imports of Rs. 2,31 lakhs in 1933-34 to Rs. 1,62 lakhs or 58 per cent. of the total of Rs. 2,81 lakhs in 1934-35. Imports of raw cinematograph films continued to expand with the development of the local cinema industry and totalled 60 million ft. in length valued at Rs. 21½ lakhs in 1934-35 as compared with 37 million ft. valued at Rs. 15 lakhs in the preceding year. The supplies from the United

Kingdom rose from 7.8 million ft. or 21 per cent. to 19.6 million ft. or 33 per cent. in quantity and from Rs. 3 lakhs or 20 per cent. to Rs. 7 lakhs or 33 per cent. in value. There were also increased imports from Germany, and the United States of America, the former accounting for 46 per cent. of the total quantity imported as in the preceding year and the latter reducing her share from 16 to 11 per cent. In photographic apparatus (other than cinematograph films) the share of the United Kingdom advanced from Rs. 12 lakhs out of the total value of Rs. 29 lakhs in 1933-34 to Rs. 13 lakhs out of the total of Rs. 32 lakhs in 1934-35, but her relative share showed a decline from 43 to 41 per cent. As regards musical instruments the United Kingdom share in both pianos and pianofortes and talking machines and accessories increased from 56 and 58 per cent. in 1933-34 to 67 and 61 per cent. respectively in 1934-35. Imports of wireless apparatus rose from Rs. 11 lakhs in 1933-34 to Rs. 16 lakhs in 1934-35 but the share of the United Kingdom receded from Rs. 6 lakhs or 56 per cent, to Rs. 5 lakhs or 29 per cent. The United States of America considerably improved her position and supplied to the value of Rs. 8 lakhs or 52 per cent, in 1934-35 as compared with nearly Rs. 2 lakhs or 18 per cent. in 1933-34.

LEATHER.

The total imports of all the classes of goods under leather enjoying a preference of 10% advanced from Rs. 34 lakhs in 1933-34 to Rs. 39½ lakhs in 1934-35, recording a rise of about 15 per cent. Consignments from the United Kingdom rose in value from Rs. 12½ lakhs to Rs. 13½ lakhs but formed a smaller proportion of the total trade in 1934-35 than in 1933-34, as will be seen from the following table:

Value	in	thousand	runees.

Leather	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35,
Imports from the U. K. Total all countries	23,04 43,05	13,13 32,53	12,83 30,63	13,15 36,03	12,50 34,28	13,62 39,53
Percentage of U. K. to total	54	40	42	36	36	34

The drop in the United Kingdom percentage share was due to keen competition from the United States of America and Germany which accounted for 24 and 15 per cent. of the total trade in 1934-35 as against 24 and 13 per cent. respectively in the preceding year.

LIQUORS.

The following three classes of articles under this head are subject to preferential treatment and may be considered seriatim:—

- (1) Ale and beer.
- (2) Spirit perfumed.
- (3) Spirit present in drugs, medicines or chemicals.

Ale and beer.—In the year under review the total imports of ale and beer showed a small increase to about 3.5 million gallons from 3.3 million gallons

in 1933-34 but the United Kingdom's contribution showed a still smaller increase. As a result her percentage share in the trade fell from 62 per cent. to 61 per cent. Of the other competing countries the share of Germany, remained stationary at 12 per cent., while Japan reduced her share from 16 per cent. to 14 per cent. On the other hand, the Netherlands made some headway and increased her share from 9 to 12 per cent.

The table below clearly sets out the position of the United Kingdom in the trade:

		Quantity in gals. (million).				Values in Rs. (lakh).						
	3 years average ending 1929-30.	1930- \ 31.	1931- 32.	1932. 33.	1933- 34.		3 years' average ending 1929-30.		1931- 32.	1932- 33.	1933 31.	1931- 35.
Ale and beer-												
Imports from U.K.	2.73	2.84	$2 \cdot 35$	2.32	2.07	2.14	56.7	57	41	45	41	42
Total all countries	4.40	4.43	3.60	$3 \cdot 59$	$3 \cdot 34$	3.48	97.3	96	71	72	65	67
Percentage of U.K. to total	62	υ4	65	65	62	61	58	59	62	63	63	63

Spirit perfumed.—Imports under this head increased from 6,900 gallons in 1933-34 to 7,400 gallons in 1934-35, of which the United Kingdom supplied 3,300 gallons as against 3,000 gallons in 1933-34, recording an increase also in her relative share from 43 per cent. to 45 per cent. German participation also showed an increase from 33 to 39 per cent. while France reduced her share from 17 to 14 per cent.

Spirit present in drugs, medicines or chemicals.—In this item the preference is granted on the imports of British origin at the following rates:

Judging from the figures obtained from the Custom Houses it appears that the imports, under the former, measured in terms of spirit content, are comparatively small and amounted to 3,300 gallons in 1934-35 as compared with 1,900 gallons in 1933-34. In regard to the latter sub-class the total imports amounted to 108,000 gallons in 1934-35 as against 98,000 gallons in 1933-34. In both these classes the share of the United Kingdom dropped from 52 and 44 per cent. to 34 and 41 per cent. respectively in 1934-35.

MACHINERY AND MILLWORK.

The statistical head machinery and millwork covers a variety of items most of which are not liable to preferential duty. The only items of importance that enjoy preference are sewing and knitting machines and parts, typewriters and parts, and domestic refrigerators. Imports of sewing and knitting machines (complete) rose from 55,000 in 1933-34 to 83,000 in 1934-35 of which the United Kingdom supplied 62,900 or 76 per cent, as compared with 39,800 or 72 per cent, in 1933-34. The bulk of the imports of typewriters continued to be drawn from the United States of America which sent MCIDGCLES

14,500 or 95 per cent. out of a total numbering 15,200 in 1934-35 as compared with 5.500 or 83 per cent. of the total of 6,600 in 1933-34. Arrivals from the United Kingdom fell from 732 to 219 in 1934-35. Domestic refrigerators were chiefly obtained from the United States of America, the United Kingdom accounting for 5.7 per cent. of the total value of Rs. 6 lakhs in 1934-35 as against 5.1 per cent. of the total value of Rs. 5 lakhs in the preceding year.

ALUMINIUM, WROUGHT.

Imports of wrought aluminium rose by 33 per cent. from 39,000 ewts. in 1933-34 to 52,000 cwts. in 1934-35 in quantity and by 17 per cent. in value from Rs. 32·5 lakhs to Rs. 38·2 lakhs. Consignments from the United Kingdom increased from 21,000 cwts. to 25,000 cwts. with a decrease in value from Rs. 17·4 lakhs to Rs. 17·0 lakhs, and her relative share dropped from 54 to 48 per cent. in quantity and from 54 to 45 per cent. in value. The percentages were however higher than the corresponding figures for the years prior to 1933-34. The figures are given below:

	8 1	3 years' werage ending 1929-30.	1930-31.	1931-32.	1932-38. `	1933-34.	1934-39-

0000					_	77	a industry

Wrought circles required for the Indian aluminium hollow-ware industry formed the bulk of these imports. These were imported to the extent of 41,000 cwts. valued at Rs. 28 lakhs as compared with 31,000 cwts. valued at Rs. 28 lakhs in 1933-34. The United Kingdom supplied 20,000 cwts. (Rs. 13 lakhs) and Japan 8,000 cwts. (Rs. 5 lakhs) as compared with 17,000 cwts. (Rs. 14 lakhs) and 5,000 cwts. (Rs. 4 lakhs) in 1933-34. Sheets and other manufactures record ed smaller increases in which the United Kingdom participated.

BRASS, BRONZE AND SIMILAR ALLOYS, WROUGHT.

The aggregate imports increased considerably from 471,000 cwts. in 1933, 34 to 636,000 cwts. in 1934-35 in quantity and from Rs. 1,38 lakhs to Rs. 1,8 lakhs in value. The United Kingdom consignments also rose from 171,000

cwts. to 225,000 cwts. but her relative share dropped slightly from 36 to 35 per cent. as will be seen from the following figures:

cent. as will be seen in	one re	110 11 22-5	.0

total	. 32 Hargely	of yellow	metal for	sheathi	ng in which	h the per- ner cent.

Imports consisted largely of yellow metal for sheathing in which the percentage share of the United Kingdom remained fairly steady at 37 per cent. although the actual quantities imported showed an increase of 33 per cent. Other competing countries, viz., Germany and Japan also increased their supplies with small variations in the respective percentage shares.

COPPER, WROUGHT.

Imports of wrought copper consisting largely of sheets, rods, etc, were as follows:

Importa -						
follows:	3 years' average l	1930-31. 193	31-32. 19	982-33. I	1933-34. 1	934-35.

Total all countries .		27 ed Kingdom	34 showed	25 l increase	46 as both in	quantity

The imports from the United Kingdom showed increases both in quantity and value, concurrently with the rise in the total imports. But she was faced with intensified competition from Germany and Japan which resulted in a slight set-back in her relative position in the trade during 1934-35, as will be seen from the above table. There were also larger supplies from the United States of America, which totalled 93,700 cwts. or 20 per cent. in 1931-35 as compared with 10,500 cwts. or 4 per cent. in the preceding year.

GERMAN SILVER, INCLUDING NICKEL SILVER.

Imports of German silver including nickel silver are shown below:

	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35,

With the decrease in the total trade there was a decline, both absolute and relative, in the imports from the United Kingdom.

LEAD, WROUGHT (EXCLUDING SHEETS FOR TEA-CHESTS.)

This heading includes pipes and tubes, sheets other than those for teachests and other manufactures of lead. Total imports recorded an increase in quantity from 23,000 cwts. in 1933-34 to 24,000 cwts. in 1934-35, with a decrease in value from Rs. 4.95 lakhs to Rs. 4.35 lakhs. Likewise the arrivals from the United Kingdom increased from 20,000 cwts. or 87 per cent. of the total quantity imported in 1933-34 to 22,000 cwts. or 92 per cent. in 1934-35 but declined in value from Rs. 4.13 lakhs or 83 per cent. to Rs. 3.45 lakhs or 79 per.cent. The figures are given below:

ZINC, WROUGHT.

Total imports of wrought zinc declined from 34,000 cwts. valued at Rs. 6 lakhs in 1933-34 to 31,000 cwts. valued at Rs. 5 lakhs in 1934-35. There was also a decrease in the imports from the United Kingdom from 5,000 cwts. or 15 per cent. to 4,000 cwts. or 13 per cent. in quantity and from Rs. 1½ lakhs or 21 per cent. to Rs. 1 lakh or 19 per cent. in value. The bulk of the imports came as usual from Belgium which accounted for 69 per cent. of the total quantity imported in 1934-35 as compared with 67 per cent. in 1933-34. The relevant figures are given below:

OILS.

The imports under this head may be examined under four sub-divisions, namely, mineral oils, essential oils—natural and synthetic, vegetable non-essential oils and fish oil.

Mineral oils.—The chief item under this head enjoying preference under the Ottawa Trade Agreement is lubricating oil other than batching oils, the total imports of which declined from 10.8 million gallons in 1933-34 to 10.3 million gallons in 1934-35, recording a fall of 5 per cent. Correspondingly the value of the total imports declined from Rs. 1,02 lakhs to Rs. 95 lakhs or by 7 per cent. The United Kingdom also reduced her share from 2.3 million gallons valued at Rs. 25½ lakhs in 1933-34 to 2.1 million gallons valued at Rs. 23 lakhs, i.e., quantitively her relative share fell from 22 per cent. to 20 per cent. and on the basis of value from 25 per cent. to 24 per cent. It may be noted that by an inadvertent alteration in the Ottawa Trade Agreement Rules, the preference granted to the United Kingdom which takes the form of specific duties was withdrawn by a Notification, dated the 3rd March 1934, but on a representation made by the Board of Trade the status quo was restored on the 13th October 1934. The United States of America is the leading supplier, but her share in the total imports slightly receded from 74 per

cent. in 1933-34 to 73 per cent. in 1934-35 and in value from 71 to 70 per cent. There was a marked improvement in the total imports of paints, solutions and compositions, dangerous, flashing below 76°F which amounted to 106,000 gallons valued at Rs. 6·4 lakhs in 1934-35 as against 80,000 gallons valued at Rs. 4·8 lakhs in 1933-34. Supplies from the United Kingdom rose from 30,000 gallons valued at Rs. 2·3 lakhs in 1933-34 to 37,000 gallons valued at Rs. 2·9 lakhs in 1934-35. Here again the competition is largely from the United States of America which increased her supplies from 45,000 gallons valued at Rs. 2·1 lakhs to 63,000 gallons valued at Rs. 3·0 lakhs in 1934-35.

Essential oils.—Imports of synthetic essential oils showed an increase in quantity from 11,000 gallons in 1933-34 to 14,000 gallons in 1934-35 and from Rs. 4·4 lakhs to Rs. 5·8 lakhs in value. But the share of the United Kingdom receded from 13 per cent. to 12 per cent. in quantity and from 8 per cent. to 7 per cent. in value, though the actual imports advanced from 1,500 gallons valued at Rs. 36,000 in 1933-34 to 1,600 gallons valued at Rs. 43,000 in 1934-35. Imports of natural essential oils rose from 16,000 gallons in 1933-34 to 26,000 gallons in 1934-35, to which the United Kingdom contributed 4,000 gallons as against 3,000 gallons in 1933-34, her relative share showing a decline from 19 per cent. to 17 per cent.

Vegetable non-essential oils.—Under this head coconut, linseed and groundnut oils are not subject to preferential treatment. Imports of the other items, mostly unspecified descriptions, enjoying preference amounted to 668,000 gallons valued at Rs. 6 lakhs in 1934-35 as compared with 198,000 gallons valued at Rs. 2½ lakhs in 1933-34. There was thus an appreciable improvement in this line of trade but the United Kingdom could not maintain her position in the market. Her consignments fell from 26,000 gallons valued at Rs. 36,000 in 1938-34 to 8,000 gallons valued at Rs. 16,000 in 1934-35. The advantage of the increased trade was mostly shared by Sumatra and the Straits Settlements.

Fish Oil.—Fish oil other than hardened or hydrogenated fish oil only receives preferential treatment, imports of which amounted to 165,000 gallons in 1934-35, the United Kingdom supplying 75,000 gallons or 45 per cent. The corresponding figures for 1933-34 are not available, as the item has been separately recorded in the Indian trade returns only from April 1934.

OIL CLOTH AND FLOOR CLOTH.

Total imports of oil cloth and floor cloth which had receded from 944,000 square yards in 1932-33 to 855,000 square yards in 1933-34 improved to 1,046,000 square yards in 1934-35. The United Kingdom steadily increased her supplies from 414,000 square yards in 1932-33 to 434,000 square yards in 1933-34 and to 534,000 square yards in 1934-35, but her percentage share which had risen from 44 per cent. in 1932-33 to 51 per cent. in 1933-34 remained steady at the latter level in 1934-35. The United Kingdom was thus able to maintain the improvement in her relative position in the trade.

PACKING—ENGINE AND BOILER—OF ALL KINDS (EXCLUDING ASBESTOS).

Total imports from all sources rose from Rs. 2.86 lakhs in 1933-34 to Rs. 3.64 lakhs in 1934-35 or by 27 per cent. The United Kingdom also increased her supplies from Rs. 2.65 lakhs to Rs. 3.21 lakhs or by 21 per cent., but her share in relation to the total trade dropped from 93 per cent. to 88 per cent. On the whole, the United Kingdom continues to hold her predominant position in this trade.

PAINTS AND COLOURS.

Preference granted to the United Kingdom cover a wide range, the only exceptions being barytes, graphite, reduced dry red lead and white lead, moist white lead, reduced dry zinc white and moist zinc white. Imports of those classes which are liable to preferential duty—and they represent the bulk of the trade in paints and colours—were as follows:

	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35.
			Quantity in	thousand	cwts.

Percentage of U. K. to total.	66	63	64	63	68	68

With the increase in value of the total imports from Rs. 60 lakhs to Rs. 63 lakhs the United Kingdom contribution rose from Rs. 41 lakhs in 1933-34 to Rs. 43 lakhs in 1934-35, the percentage share in the total trade remaining fairly steady at 68 per cent. Notwithstanding German competition in most of the items in this group and the increasing imports of dry red lead from Japan, the United Kingdom was able to maintain the improvement already secured.

PAPER AND PASTEBOARD.

(1) Paper.

The main items under this head subject to preferential duties are packing paper, other kinds of paper (except note and letter paper and envelopes

and old newspapers in bales and bags) and paper manufactures. The figures for packing paper are given below:—

	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-3 f.	1934-35.	
			Quantity in	thousand	cwts.

Percentage of United King dom to total imports.	- 10	11	14	8	9	10	

Total imports of packing paper rose from 159,000 cwts. in 1933-34 to 199,000 cwts. in 1934-35 in quantity and from Rs. 32 lakhs to Rs. 38 lakhs in value. The increase was largely shared by Scandanavia which supplies the bulk of India's requirements. The United Kingdom has only a limited interest in this trade and accounted for 6 per cent. of the total quantity imported in 1934-35 as in the preceding year. As regards other kinds of paper, the total imports advanced from 97,000 cwts. to 107,000 cwts. Of this the United Kingdom supplied 24,000 cwts. or 22 per cent. as against 21,000 cwts. or 22 per cent. in 1933-34. In paper manufactures, the United Kingdom increased her supplies from 12,000 cwts. out of the total imports of 31,000 cwts. in 1933-34 to 18,000 cwts. out of the total of 47,000 cwts. in 1934-35, and her percentage share in the total trade recorded an advance from 38 to 39 per cent. No statistics are available for chrome, marble, flint, poster and stereo-printing paper which are also eligible for preference.

(2) Pasteboard, Millboard and Cardboard of all kinds (other than Strawboard).

Total imports advanced from 113,000 cwts. in 1933-34 to 135,000 cwts. in 1934-35. The United Kingdom which increased her share from 14 per cent. in 1932-33 to 22 per cent. in 1933-34 was not able to maintain her position and her share dropped to 11 per cent. in 1934-35. As usual, Germany, Sweden and Norway were the principal suppliers of which the two former increased their supplies while the share of the last showed a fall. In pasteboard manufactures the United Kingdom secured 40 per cent. of the total imports of 18,100 cwts. in 1934-35 as compared with 68 per cent. out of a total of 9,300 cwts. in 1933-34.

PROVISIÔNS.

Preference of 10 per cent. is granted to the United Kingdom on canned or bottled fruits, tinned or canned fish, canned or bottled provisions other than vegetable product, cocoa and chocolate, confectionery and milk condensed or preserved including milk cream. The aggregate imports of all these classes showed an improvement and were valued at Rs. 1,28 lakhs in 1934-35 as compared with Rs. 1,20 lakhs in the preceding year. To the imports in 1934-35 the United Kingdom contributed Rs. 67 lakhs or 52 per cent. as against Rs. 58 lakhs or 49 per cent. in 1933-31, as will be seen from the following figures:

lakhs or 49 per cent	U. III 1000 -

Demonstrum of the Timited	33 29	31	40 ports of r	62 ubber ma	68 nufacture

There was a marked improvement in the imports of rubber manufactures which were valued at Rs. 2,06 lakhs in 1934-35 as compared with Rs. 1,87 lakhs in the preceding year. Imports from the United Kingdom advanced from Rs. 1,16 lakhs to Rs. 1,40 lakhs with a sharp rise in her percentage share from 62 to 68. It may, however, be noted that many American companies supply the Indian market from their subsidiary works in the United Kingdom in order to secure the advantages of the preference. In pneumatic motor covers—the most important item under this classification—the share of the United Kingdom rose from 197,000 (63 per cent.) out of the total number of 311,000 in 1933-34 to 229,000 (70 per cent.) out of a total of 327,000 in 1934-1935. Imports of pneumatic cycle covers recorded a decline from 1,772,000 in 1933-34 to 1,585,000 in 1934-35 but the participation of the United King dom rose from 1,117,000 or 63 per cent. to 1,325.000 or 84 per cent. The shar of Germany also showed an advance but Japan reduced her supplies from 436,000 to 153,000. In other descriptions of rubber manufactures the Unite Kingdom has maintained her relative position.

SMOKERS' REQUISITIES (EXCLUDING TOBACCO).

In contrast with the decline in the total imports of smokers' requisite from Rs. 4·19 lakhs in 1933-34 to Rs. 3·91 lakhs in 1931-35, the United King dom advanced her share from Rs. 1·25 lakhs or 30 per cent. to 1·27 lakhs or 32 per cent. of the total trade. The relevant figures are given below:

				Value in	thousand	rupees.

While the total imports declined from 52,000 cwts. valued at Rs. 32 lakh in 1933-34 to 45,000 cwts. valued at Rs. 31 lakhs in 1934-35, those from the United Kingdom showed little variation and amounted to 34,000 cwts. valued at nearly Rs. 25 lakhs. As a result, the percentage share of the United Kingdom rose from 67 to 75 per cent. in quantity and from 74 to 78 per cent. in value. The remainder came chiefly from the United States of America and Continental countries. A feature of the trade is the importations of Japanese soap in recent years but these received a set-back after the imposition of the alternative minimum specific duty of Rs. 20 per cwt. on all foreign soaps since

December 1933. Imports of toilet soap from Japan amounted to 3,600 cwts. valued at Rs. 1 lakh as against 10,000 cwts. valued at Rs. 3 lakhs in 1933-34.

STATIONERY, EXCLUDING PAPER.

Under this head pencils other than slate pencils and other kinds of stationery (excluding paper) are liable to 10 per cent. preferential duty. position of the trade in these classes of articles has been set out in the following

osition of the trace ha	3 years' average ending 1929 30.	1300-02.	1931-32. .ntity in tb	1932-33. ousand doze	1000 0-	934-35.

Kingdom to total	59	,	that the	moh the to	otal number	of pencil

From the above table it will be seen that though the total number of pencils imported showed a fall from 4.3 million dozens in 1933-34 to 3.7 million dozens in 1934-35, the corresponding value increased from Rs. 7.0 lakhs to Rs. 9.4 lakhs due mainly to the larger imports of high-priced pencils from Germany to the high-priced pencils from Germany to many totalling 2.6 million dozens valued at about Rs. 7 lakhs as against 1.4 million dozens valued at about Rs. 7 lakhs at abou lion dozens valued at Rs. 4.1 lakhs in 1933-34. The United Kingdom almost doubled her consignments from 110,000 dozens in 1933-34 to 207,000 dozens in 1934-37 in 1934-35 and correspondingly the value rose from Rs. 59,000 to Rs. 95,000. Though her share in the trade is very small, it increased from 1 per cent in value 1932-33 to 6 per cent. in 1934-35 in quantity and from 5 to 10 per cent. in value. Japan lost a considerable portion of her trade, her supplies in 1934-35 amounting to 20 million dozons ing to ·8 million dozens valued at Rs. 74,000 as against 2·5 million dozens valued at Rs. 74,000 as against 2·5 million dozens valued at Rs. 1.5 lakhs in 1933-34. This represented 21 per cent. in quantity and 2 nor and 2 no and 8 per cent. in value of the total trade, the corresponding figures for 1933-34 being co being 60 per cent. and 24 per cent. In other sorts of stationery the total trade received and 24 per cent. trade remained almost stationary at Rs. 59 lakhs. But the United Kingdom's share come ? share came down from 59 per cent. to 58 per cent., the actual consignments being relative to 1933-34. being volved at De 24 labba as compared with Rs. 35 lakhs in 1933-34.

HABERDASHERY AND MILLINERY.

Imports of haberdashery and millinery which had declined in value from Rs. 57 lakhs in 1932-33 to Rs. 45 lakhs in 1933-34 rose to Rs. 60 lakhs in 1934-1935, but those from the United Kingdom which had fallen from Rs. 14 lakhs in 1932-33 to Rs. 12 lakhs in 1933-34, remained steady at the latter level during the year under review. As a result the percentage share of the United Kingdom declined from 27 per cent. in 1933-34 to 20 per cent. In 1931-32 she had accounted for 25 per cent. of the total trade. There was keener competition from Japan which accounted for 40 per cent. of the total trade in 1934-35 as compared with only 18 per cent. in 1933-34.

The following table sets out the position of the United Kingdom in the trade:

trade:			Value I	Rs. (lakhs).		
	3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35.

Percentage of United Kingdom to total	24.7	28 · 1	27.1	24.6	26.7	20.0

WOOLLEN MANUFACTURES.

With the exception of blankets and rugs (other than floor rugs) all woollen yarns and manufactures are subject to preferential duties. The chief item is woollen piecegoods, imports of which amounted to 10½ million yards valued at Rs. 1,40 lakhs in 1934-35, of which the United Kingdom supplied 2 million yards (20 per cent.) valued at Rs. 46½ lakhs and Japan nearly 7 million yards (65 per cent.) worth Rs. 73 lakhs. In the preceding year imports totalled 1½ million yards valued at Rs. 1,30 lakhs, the United Kingdom supplying 3 million yards (28 per cent.) valued at Rs. 57 lakhs and Japan 2 million yards (18 per cent.) valued at Rs. 15 lakhs. These figures are not strictly comparable in as much as the figures for 1933-34 include to an appreciable extent goods of wool mixed with other materials which have been recorded separately from April 1934. Taking the two classes together the United Kingdom had 31 per cent. and Japan 53 per cent. of the total yardage imported in 1934-35, which compares with 28 and 18 per cent. respectively in 1933-34.

As regards other items, the United Kingdom share in carpets and floor rugs improved from 56 per cent. in 1933-34 to 65 per cent. in 1934-35. In woollen hosiery the United Kingdom reduced her contribution from 39 per cent. to 33 per cent. as the competition from Japan was very severe. In shawls the United Kingdom has a limited interest which is on the decline, the bulk of the imports being consigned from Germany, and in recent years

from Japan. Imports of worsted yarn for weaving and knitting wool were as follows:

as follows:	1929-30.	1930-31.	1931-32. Quantity in	1002 001	1933-34.	1934-35.

There was a noticeable expansion in the imports of these goods, the total value of which rose from Rs. 56.6 lakhs in 1933-34 to Rs. 64.1 lakhs in 1934-35

or by 13 per cent. Supplies from the United Kingdom increased from Rs. 22.2 lakhs in 1933-34 to Rs. 24.8 lakhs in 1934-35 but her relative share remained at 39 per cent. as in 1933-34. The principal competitors in this trade are the United States of America and in recent years Japan. The former increased her participation from 23 to 26 per cent. while the share of the latter stood at 18 per cent. as in 1933-34. Among the other supplying countries Germany and France accounted for 7 per cent. and 5 per cent. in 1934-35 as compared with 6 and 7 per cent. respectively in the preceding year.

TOYS AND REQUISITES FOR GAMES AND SPORTS.

The position of the trade is illustrated in the following table:

Value in thousand runees

		Value in thousand rupees.				
3 years' average ending 1929-30.	1930-31.	1931-32.	1932-33.	1933-34.	1934-35.	
15,71	12,20	10,65	10,46	11,62	11,96 50,55

Although the total imports fell from Rs. 53·35 lakhs in 1933-34 to Rs. 50·55 lakhs in 1934-35, the value of the consignments from the United Kingdom rose from Rs. 11.62 lakhs in 1933-34 to Rs. 11.96 lakhs in 1934-35 with a corresponding increase in the percentage share from 22 per cent. to 24 per cent. The bulk of the trade was absorbed by Japan whose supplies, however, valued at Rs. 31 lakhs, were Rs. 3 lakhs below those in 1933-34. Examined in greater detail it is found that total imports of toys were valued at Rs. 32 lakhs in 1934-35 as compared with Rs. 38 lakhs in 1933-34. Consignments from the United Kingdom remained stationary at Rs. 4 lakhs but her percentage share in the total trade advanced from 10 to 12 per cent. Japan supplied to the value of Rs. 25 lakhs as compared with Rs. 301 lakhs in the preceding year and her percentage share fell from 81 to 79, while the share of Germany remained steady at 7 per cent.

There was a marked improvement in the imports of playing cards which were valued at Rs. 10 lakhs in 1934-35 as compared with Rs. 7 lakhs in 1933-To this the United Kingdom contributed Rs. 1.9 lakhs or 19 per cent. as against Rs. 1½ lakhs or 22 per cent. in 1933-34. Japan increased her participation from 22 per cent. in 1932-33 to 39 per cent. in 1933-34 and further to 48 per cent. in 1934-35 while the United States of America and Belgium reduced their shares from 25 and 13 per cent. in 1933-34 to 20 and 11 per cent. respectively in 1934-35. Imports of other requisites for games and sports remained almost stationary at Rs. 8.6 lakhs. Supplies were mostly obtained from the United Kingdom which accounted for 72 per cent. of the trade as against 71 per cent. in 1933-34.

UMBRELLA AND UMBRELLA FITTINGS.

In 1933-34 imports of complete umbrellas consisting mostly of low priced goods from Japan were very heavy and numbered 739,000 valued at Rs. 4-1/4 lakhs. But after the imposition of alternative minimum specific duties of 8 annas each on all foreign umbrellas in December 1933, there was a considerable decline in these imports which numbered 281,000 valued at Rs. 1½ lakhs in 1934-35. Consignments from the United Kingdom are small in number but command a higher price in the market. Judged by number the United Kingdom had only 7 per cent. of the total trade in 1934-35 as compared with 4 per cent. in the preceding year, while in value her share was as high as 41 per cent. as against 16 per cent. in 1933-34. In umbrella fittings imports of which advanced from Rs. 22 lakhs in 1933-34 to Rs. 26 lakhs in 1934-35, the United Kingdom share declined from Rs. 2.89 lakhs or 13 per cent. to Rs. 2.58 lakhs or 10 per cent.

The relevant figures are given below :-

MOTOR CARS.

The course of the trade in motor cars in recent years was as follows:-

3 years' average 1930-31. 1931-32. 1932-33. 1933-34. 1934-35. ending 1929-30.

Imports from the United Kingdom steadily increased during the last four years. But with the fall in the exchange value of the dollar in 1933 there were much larger arrivals of American cars and the situation is now regarded as less encouraging to the United Kingdom, although she enjoys a preference of $7\frac{1}{2}$ per cent. The number of motor cars imported from all countries rose from 9,759 in 1933-34 to 14,434 in 1934-35 and their value from Rs. 1,77 lakhs to Rs. 2,59 lakhs. Imports from the United Kingdom numbered 6,311 valued at Rs. 1,24 lakhs as compared with 5,348 valued at Rs. 1,06 lakhs in 1933-34. The number of cars imported from the United States of America and Canada also advanced from 2,227 and 1,715 to 5,552 and 2,057 and their values from Rs. 36 and Rs. 25½ lakhs to Rs. 93 and Rs. 33 lakhs respectively in 1934-35. Owing to this increased American activity consequent largely upon the depreciation of the dollar the percentage shares of the United Kingdom as regards numbers dropped from 55 in 1933-34 to 44 per cent, in 1934-35 and from 60 to 48 per cent, in value.

MOTOR OMNIBUSES, ETC.

Imports of motor omnibuses, mostly chassis, rose in numbers from 5,496 in 1933-34 to 9,974 in 1934-35 and from Rs. 66 lakhs to Rs. 1,21 lakhs in value. Arrivals from the United Kingdom more than doubled and numbered 1,172 valued at Rs. 26 lakhs as compared with 528 valued at Rs. 12 lakhs in 1933-34. The reduced horse-power tax in the United Kingdom encouraged production of the lighter type of vehicles at prices which are not too high for the Indian market. The relative share of the United Kingdom rose from 10 to 12 per cent. in number and from 19 to 22 per cent. in value. Imports, however, continued to be drawn chiefly from the United States of America and Canada. The relevant figures are given below:—

3 years' average 1930-31. 1931-32. 1932-33. 1933-34. 1934-35. ending 1929-30.

CYCLES (OTHER THAN MOTOR CYCLES) AND PARTS THEREOF AND ACCESSORIES.

The trade in cycles and parts in which the United Kingdom has a very large interest, shows signs of a steady recovery. Imports of complete cycles rose from 70,000 valued at Rs. 20 lakhs in 1932-33 to 89,000 valued at Rs. 25 lakhs in 1933-34 and to 106,000 valued at Rs. 30 lakhs in 1934-35. Parts of cycles and accessories also showed an advance from Rs. 60 lakhs in 1932-33

to Rs. 64 lakhs in 1933-34 and further to Rs. 69 lakhs in 1934-35. The figures are shown in the following table:-

average 1930-31. 1931-32. 1932-33. 1933-34. 1934-35. ending 1929-30.

e 10 per cent. preference, among other factors, materially helped the United ngdom to secure more than the increase in the total trade in cycles, with e result that her percentage share which had risen from 77 of the total number ported in 1932-33 to 81 per cent. in 1933-34 advanced further to 85 per cent. 1934-35. The corresponding percentages in value were 91 per cent. in 332-33, 92 per cent. in 1933-34 and 95 per cent. in 1934-35. It appears that ne influx of Japanese machines at abnormally low prices in the Indian market as been definitely checked but the importation of parts and accessories from apan still continues. There was a slight set-back in the share of the United Kingdom in the latter class, although the value of the imports therefrom showed distinct advance.

PROPELLED MECHANICALLY TOM(EXCLUDING RAILWAY CARRIAGES, TRUCKS, ETC.). CARRIAGES

Imports under this head declined in number from 1,926 in 1933-34 to 1,775 in 1934-35 and in value from Rs. 1½ lakhs to Rs. 1¼ lakhs. The United Kingdom's contribution, however, rose from 417. valued at Rs. 47,000 to 618 valued at Rs. 68,000. Japan was also able to increase her share from 691 in number valued at Rs. 53,000 to 1,086 valued at Rs. 44,000 in 1934-35. A noticeable feature of the trade in the year under review is the practical disappearance of Germany from the market, imports from that country numbering only 2 valued at Rs. 1,200 as against 179 valued at Rs. 15,000 in the preceding year. 3

MC1DGCI&S

ľ

PARTS OF CARRIAGES AND CARTS, INCLUDING RUBBER TYRES.

Total value of articles under this head imported in 1934-35 amounted to Rs. $5\frac{3}{4}$ lakhs, as against Rs. 3 lakhs in 1933-34 and Rs. 2 lakhs in 1932-33. The United Kingdom's share in the trade rose from Rs. $1\frac{1}{4}$ lakhs in 1932-32 to a little above Rs. $1\frac{3}{4}$ lakhs in 1933-34 and further to Rs. 4 lakhs in 1934-35 and her relative share in the trade which had fallen from 65 per cent. in 1932-32 to 61 per cent. in 1933-34, rose to 73 per cent. in the year under review.

PREFERENCES GRANTED BY INDIA TO NON-SELF-GOVERNING COLONIES.

In regard to preferences granted by India to non-self-governing colonies the position of these colonies in the import trade in each commodity liable to such preference during the past three years is set out in Appendix VI. Leaving out those items in which there is a practical monopoly, viz., cutch an gambier, coconuts, coconut oil, betelnuts, etc., the share of these colonies in the total trade during 1934-35 in comparison with 1933-34 showed an improve ment in the case of Arabic gum, copra, canned and bottled fruits, oilseed (other than essential) and vegetable oils (other than essential and coconut while there was a set-back in the case of Benjamin gum, coir, fish dry unsalted fresh fruits other than coconuts and toa.

The course of Indian Import Trade in the Articles enjoying preference: IMPORTS.

Value Rs. (000).

head. The price of this article declined up to March 1934 as compared with December 1932, but there was an abrupt rise Settlements are imported into Burma but as the consignments were not supported by acceptable documents they were excluded from the benefits of preference. Only one quotation for fresh oranges from Palestine is available under this in September 1934 due perhaps to seasonal causes. The price came down again in March 1935 and stood at case of 40 lbs. which meant a fall of 28 per cent. as compared with the pre-preferential period.

that the bulk of the imports under this head are from the United Kingdom which sent in 1934-35 goods valued to the Kingdom prices in 1934-35 showed little variations, whereas those of foreign cocoa declined. It must be noted, however, in most cases in 1933 declined to the extent of 8 to 11 per cent. since then. On the whole, it appears that the United up to September 1934, but in March 1935 there was some rise. The price of non-preferential imports which had gone up extent of Rs. 2,69,000 or nearly three-fourths of the total imports of cocoa.

No. 9 (1) [164].—Coffee, canned or bottled.

was even greater. At the same port, the price of the U.S. A. coffee fell to a much larger extent in 1934-35, the fall in March 1935 amounting to over 16 per cent. as compared with December 1933. At Rangoon, however, the only quotation available for foreign coffee showed a rise in 1934-35 as compared with the preceding year. As compared with Quotations from Karachifand Rangoon only are available for coffee powder. Prices of the United Kingdom product in Karachi were slightly less in 1934-35 as compared with March 1934. As compared with December 1933 the fall 1932, however, the price quoted during the year under review is much less. It is difficult to understand why prices in

Rangoon should show any rise over the preceding year when for similar articles the price paid at Karachi showed a distinct fall. Taking the Karachi quotations only into consideration it appears that prices fell to a much larger extent in the fall. Taking the Karachi quotations only into consideration it appears that prices fell to a much larger extent in the case of American coffee than of the United Kingdom product.

Wholesale quotations for this article are available from all the ports except Calcutta which gives retail prices. Foreign canned fish were generally cheaper in 1934-35 than in the two preceding years at Bombay, Calcutta and Karachi. There was little or no variation in Madras where there were no imports of foreign fish in March 1935. The rates for the United Kingdom products, on the other hand, varied widely from port to port. In Bombay the price of the United Kingdom product fell progressively from Rs. 1-2-0 in December 1932 to Rs. 0-13-0 in September 1934, whereas in Rangoon it rose considerably in price in 1934-35 as compared with the earlier years. In Karachi, on the other hand, the price of the U. K. product showed a slight increase in September 1934 as compared with March of that year but fell by nearly a rupee in March 1935. Imports of fish from the United Kingdom amounted in 1934-35 to Rs. 2,55,000 or 23 per cent. and those from foreign countries Rs. 8,36,000 or 77 per cent.				Description. change, the fall in the case being 2 annas only. In the case of Cassia oil at Rangoon the price fell in December 1933 by 3 cent. as compared with December 1932 at Karachi. The price of Chinese aniseed oil in Bombay in 1931-35 was almost the same as in the pre-Ottawa period, whereas orange oil from Italy at Madras and Cassia oil from Japan at Rangoon showed a Quotations have been received from all the chief ports except Calcutta. Three of them are for U.K. products, the rest referring to supplies from foreign countries. At Karachi, orange oil from the United Kingdom reliefored a large drop both in 1933-34 and 1934-35 as compared with the pre-Ottawa period. The same oil in Madrus however showed little annas to Rs. 1-3 per lb., but since then it has ceased to be quoted. On the whole therefore except in the case of orange sources rose in value or maintained their prices except in the ease of lavender oil from Germany which fell by mearly 50 per slight increase in 1934-35 as compared with the pre-Ottawa period. On the whole, therefore, it appears that apart from the oil in Karachi there have been little or no variations in the prices of the United Kingdom products. Oils from foreign special features pertaining to each of these oils the general tendency has been for the foreign oil to rise in value or at least not to register any fall. The price of the U. K. product generally maintained itself or showed a slight decline.

variety. The price of the British oil declined after December 1933 and is lower than in the pre-Ottawa period. No quotation is available for March 1935.

No. 12(2) [176].—Oilseeds, non-essential, all sorts, not otherwise specified, including copra or coconut kernel. No. 12(2) [176].—Oilseeds, non-essential, all sorts, not otherwise specified, including copra or coconut kernel. Pro- Pro- Pro- Ottawa Description. Description. Description. September March 1932. Description.	Copra kernel Ceylon Cwt 15 12 8 12 8 0 6 8 10 0 Bombay. Bombay alone has furnished a quotation for copra kernel under this head which is the only important item under it and comes almost exclusively from Ceylon. Prices fell continually till September 1934 when the fall amounted to nearly and comes almost exclusively from Ceylon. Prices fell continually till September 1934 when the fall amounted to nearly so per cent. as compared with December 1932. In March 1935, however, the quotation rose to Rs. 10 per cwt., a rise of 54 per cent. as compared with December 1932. In March 1935, however, the quotation rose to Rs. 10 per cwt., a rise of 54 per cent. over the September price. Even then the price was still considerably below that in the pre-Ottawa period. No. 5 (2) [179].—Ivory, unmanufactured. Doct-Ottawa.	1934-3 ember 34.	Centres and Hollows Foreign "Foreign " Foreign " import.
---	--	------------------------	--

Unmanufactured ivory is mainly imported from British African Colonies and Belgian Congo which in 1933 showed a general decline in prices, the fall in the case of the former being considerably larger than in the latter. In 1934-35, the decrease in the price of the Empire product continued still further and in March 1935 the quotation was less than half of that in the pre-Ottawa period. The foreign product disappeared from the market throughout 1934 but was again quoted in

No. 52, 55 [180].—Apparel including hats, caps, bonnets, hatters' ware, second-hand clothing, etc. March 1935 at a price which was higher than that for the Empire product.

1935. Only the prices of German genaspirin (proprietary article) remained unaffected at that port. On the whole, prices Septembér 1934, in the prices of hydros at Madras was, however, due to trade fluctuations. The price of the U. K. products at Rangoon hardened slightly in the first half of the year but came down in products at Calcutta and German products at Rangoon hardened slightly in the first half of the year but came down in March 1935. Due to severe competition with Imperial Chemicals the prices of German muriate of ammonia at the former product. Prices in Karachi which had not fallen considerably till September 1934, registered a large decrease in March port fell to Rs. 11-4-0 a cwt. in the first half of 1934-35, but in the following March they rose to the level of the U. K. This is a very large class containing numerous chemicals, drugs and medicines. Market quotations are available from all the chief ports but the largest number of them have been reported from Madras and Bombay and only two from all the chief ports but the largest number of them have been reported from Madras and Bombay and only two petition. Even in respect of those item's such as hypo, etc., the prices of which are controlled by syndicates or by Agreement the decline in prices was still noticeable. The sudden fall of 27 per cent. in March 1935, as compared with quotations each are available from Calcutta and Rangoon. Prices in 1934-35, in general tended to decline except in a few cases of proprietary articles. The fall in prices especially at Madras was due to a certain extent to keen Japanese com-

have been generally declining.

During the first half of the year under review British made cutlery was generally dearer than in the previous year except at Rangoon. In Bombay the prices remained unchanged as compared with 1933-34. In the latter half of the year the rising tendency of prices continued in certain cases in Calcutta and Madras, while the position in other ports remained easier. The prices of German and Japanese makes also moved more or less in sympathy with the United Kingdom products.

As compared with 1932, prices have been generally on a lower level. The share of the United Kingdom in this trade

amounted in 1934-35 to Rs. 6.8 lakhs or 26 per cent. as against Rs. 19.2 lakhs or 74 per cent. from other countries.

Calcutta and Rangoon, on the other hand, recorded a distinct advance in prices in the year under review. The shares of of the articles have been missing in Karachi and Madras. In the latter part, the prices of the United Kingdom manufactures of the united practically unchanged since December 1932, while Japanese prices declined only in March 1935 by have remained practically unchanged since December 1932, while Japanese prices declined only in March 1935 by many remarks a rise in September 1934 the prices of all the items reported from Bombay have been declining. The two chief competitors under this head appear to be the United Kingdom and Japan. Recent quotations in some the United Kingdom and Japan in this trade were Rs. 14.4 lakhs and Rs. 25.5 lakhs or 33 and 58 per cent. respectively.

Glaco kid skins	American patent

Bombay has supplied one quotation each for the United Kingdom and U.S. A. products. No other quotations are available. The price of glace kid skins imported from the United Kingdom declined in 1934-35 as compared with the previous year as well as the pre-Ottawa period. In the case of American patent leather, although the price in 1934-35 was slightly higher than in 1933-34, it never exceeded the level of December 1932.

in the year under review as compared with the preceding year, but in Madras the prices of sewing machines remained constant changes. Quotations for British hand-pumps and sewing machines at Calcutta and Karachi respectively are not available for March 1935 owing presumably to the cessation of imports of those items. Prices in those ports were on a lower level The articles quoted under this head are mostly proprietary and their prices are more or less in in one case and in the other showed a slight increase.

No. 63 (28) [1971.—All sorts of Iron and Steel and manufactures there of not otherwise specified.

Rangoon, the variations in prices as compared with December 1932 ranged from nil to a fall of 17 per cent. Among the articles of foreign origin there was, in the same period, one case of an increase of 14 per cent. while in nine others there was a fall This is a comprehensive head covering a variety of articles. There had been a second in March 1935 the market seems articles both preferential and non-preferential under this head up to September 1934. But in March 1935 the market seems to have been somewhat erratic. In the five quotations for the U. K. goods reported from Calcutta, Karachi, Madras and varying from 7 to 25 per cent. On the whole, however, prices were generally on the decline.

March 1933-35. September Post-Ottawa. Market Prices. Quotations during the year from Madras and Rangoon are incomplete. Those of knitting or worsted wool from Calcutta and Bombay showed an advance in price since March 1934 which may partly be ascribed to an increase in the price of raw wool. As compared with December 1932 the increase in March 1935 ranged from 6 to 14 per cent. in the case of the United Kingdom goods and 3 to 15 per cent. in the case of foreign goods.

Most of the quotations during the year under review are missing in Karachi, Madras and Rangoon. In Calcutta the prices of both British and Belgian asbestos sheets in March 1935 were at the same level as in December 1932 after a slight fall during the intervening period. In Bombay the prices of U. K. products in March 1935 were higher than in previous years although still lower than in the pre-Ottawa period.

Description.			Glue other t		British Glue	Russian Glue	Bone Glue Bone Glue (cased)

On the whole due to competition of foreign glue, prices at Calcutta declined in 1934-35. In Bombay the decline was very considerable in March 1935 in the case of the United Kingdom products. The Russian products, on the other hand, showed an increase in the year under review as compared with 1933-34. Bone glue also, at Karachi, registered some showed an increase in the year under review as increase. The share of the United Kingdom in the trade was Rs. 90,000 or 24 per cent., whereas that of other countries

Rs. 2,92,000 or 76 per cent.

Description.	Asbestos and metallic packing Jute packing Do. Do.	

The three ports, namely, Calcutta, Madras and Rangoon, supply a pair of quotations each. At Bombay, on the other hand, there is no import of foreign packing comparable in quality to that from the United Kingdom. In all the three reporting ports prices of British packing have declined by 3 to 21 per cent. in 1934-35 as compared with the previous year while prices of the foreign articles during the same period fell by nearly 13 per cent. At Rangoon, the imports of German proprices of the foreign articles during the same period fell by nearly 13 per cent. At Rangoon, the imports of German products appeared to have been sporadic. The share of the U. K. in trade was Rs. 3,21,000 or 88 per cent., whereas that of ducts appeared to have been sporadic. other countries Rs. 43,000 or 12 per cent.

The prices of most of the articles coming under this class are controlled by "rings" and as such it is impossible to judge the effects of preference on prices. At Bombay, for instance, rubber tyres and tubes which form the principal items under this head are sold according to a listed price, uniform for all makes. The presence of these rings and agreements

makes it difficult to judge the effects of preference. The share of the United Kingdom under this head was Rs. 1,39.4	to not cello, allo ottos

The varieties of articles which are included in this head are numerous. Besides these are proprietary articles for which the demand is of a specialised nature. A small factor like preference is not likely to affect materially the prices of these products. In the case of preferential supplies, prices as compared with 1933-34 fell in six cases, remained stationary in one and rose in two cases in the year under review. The variations ranged between plus 33 per cent. and minus 19 per cent. On the non-preferential side prices in the same period rose in three cases, remained almost constant in one and fell in six other cases. The range of variations lay between plus 9 per cent. and minus 14 per cent. On the whole, it may be said that prices were on the decline, the extent of the fall in the case of the United Kingdom products being slightly greater. It is difficult, however, to say how far preference has affected the prices of some of these articles.

The principal suppliers to India of articles in this class are the United Kingdom and Japan. At Calcutta the prices of British umbrella ribs rose by 15 per cent. whilst those of Japanese ribs fell by 4 per cent. in 1934-35. At Bombay the price of British umbrellas appreciated by 8 per cent. in the year under review but even then it stood at a level lower than that of the prepreferential period. The price of Japanese umbrellas on the other hand, which had declined by 26 per cent. in 1933 rose to Rs. 12 in 1934, an increase of 4 per cent. over 1932 but there was no import of the article in 1935. From Madras, only one quotation for the Japanese variety is available till September 1934, prices of which in 1934 were on a lower level than in December 1933 or December 1932. Prices at Rangoon registered a fall on the preferential side but remained unchanged in the case of the non-preferential items. On the whole, prices were lower in March 1935 than in December 1932.

The share of the United Kingdom under this item amounts to Rs. 3.2 lakhs or 12 per cent. as against Rs. 24.0 lakhs or 88 per cent. from foreign countries.

have remained either stationary or have generally recorded some rise, the increase being as large as 14 per cent. in one have remained either stationary or have generally recorded some rise, the increase of have remained either stationary or have generally recorded some rise, the preceding year. As prices of case. Prices of foreign supplies also registered increases in March 1935 as compared with the preceding year. As prices of case. both preferential and non-preferential items show a general increase this appears to be due to a better demand during 1934-35 as compared with the earlier years. The effect of the preference cannot be separated from this general tendency. The imports from the United Kingdom under this item amounted to Rs. 15.0 lakhs or 84 per cent. as compared with fourths relate to the United Kingdom and the remainder to foreign countries. Prices of the United Kingdom products In this case preference was given to the United Kingdom by lowering the old rate of duty by 10 per cent. in her favour while the standard rate remained at the old level. Out of a dozen quotations received from four principal ports threeimports from other countries which amounted to 2.9 lakhs or 16 per cent.

- (1) Bitters.—Preference in this article extends only to the Colonies which as been secured to them by lowering the old duty of Rs. 37/8 per proof allon by Rs. 3/12 in their favour. Between March 1934 and March 1935 the price of one preferential variety remained stationary, whereas in the other case a rise was registered. The price of the Trinidad variety however after having remained steady between December 1932 and September 1934 rose by having remained steady between December 1932 and September 1934 rose by about 3½ per cent. in March 1935. On the whole, however, prices tended to remain stationary.
 - (2) Drugs and medicines containing spirit.—The specific duty on these articles which was Rs. 27/5½ to Rs. 37/8 per Imperial gallon was revised to Rs. 26 to Rs. 36 for the United Kingdom and Colonial imports, and to Rs. 29 to Rs. 40 for other imports. The medicines that come under this head are mostly Rs. 40 for other imports. The medicines that come under this head are mostly proprietary. Between March 1934 and March 1935 prices of preferential imports rose in four cases, fell in two and remained steady in six others. On the non-preferential side, prices rose only in two cases, fell in five and remained non-preferential side, prices rose only in two cases, fell in five and remained stationary in two cases. The two Parke Davis products quoted have gone up stationary in two cases. It is difficult to arrive at any conclusion as regards in price by 50 per cent. It is difficult to arrive at any conclusion as regards these goods most of which are non-competitive proprietary products varying in their qualities.
 - (3) Perfumed spirits.—The duty on the United Kingdom imports has been reduced by Rs. 7/8 per gallon, while that on imports from other sources remains at the old level. Prices of both preferential and non-preferential articles under this head showed a somewhat rising tendency in 1934-35 as compared with the earlier year. The number of articles which rose in value was larger in the case of non-preferential rather than of preferential imports. In spite of the rise in prices during 1934-35 the prices of preferential imports were spite of the rise in prices during 1932.
 - (4) Rums.—The produce of the Colonies enjoys a preference of Rs. 3/12 per gallon over other imports which pay the same rate of duty as before (Rs. 37-8-0). Of the two preferential varieties quoted, one has almost continuously fallen in value up to March 1935, the extent of the fall being 4 per cent. The price of the other during 1934-35 as compared with the previous year. The price of the other preferential variety has been practically steady throughout the period. The price of the only foreign variety quoted has risen in 1934-35 as compared with the previous year.

raising the same against other countries by 7½ per cent. Out of four sets of quotations received from three ports, three relate to cloves and the other to nutmegs. Bombay alone gives prices of competitive grades of Zanzibar and Madagascar showed a decline of about 2 as. per lb. in September 1934 but in March 1935 prices rose again to 73 as. per lb. or a rise of 3 p.c. over the previous year. As regards nutmegs, the quotation available is from Rangoon which shows a slight increase . The British Colonies have been allowed preference by maintaining the old rate of duty unchanged in their favour and cloves both of which have declined in value to some extent in 1934-35 as compared with the previous year and December 1932. In March 1935, there were no stocks of Madagascar cloves in Bombay. The other quotations for cloves from Madras Prices, on the whole, in in 1934-35 as compared with 1933-34. The price, however, was still lower than December 1932. 1934-35 appear to be below the level in the pre-Ottawa period. Rs. AS.

Hammerless	Gun Belgian 12 Bore,—D. B. B. L. Hammer	Do	* Retail price. The specific duty of Rs. 18-12-0 has remained unchanged but the additional ad ralorem duty of 12½ per cent. has been taken away in the case of the United Kingdom and reduced to 10 per cent. in the other cases. The alternative ad valorem duty of 50 per cent. has also been reduced by 10 per cent. in favour of the United Kingdom, the old rate being maintained against other countries. Prices of the U. K. products in 1934-35 at all the ports have registered a decline ranging from 2 to 15 per cent. as compared with 1933-34. In Karachi and Rangoon, however, prices of U. K. products stand at a slightly higher level than those in December 1932. Prices of foreign products too generally showed a fall ranging from 3 to 6 per cent. At Calcutta the price of Belgian pistols has remained constant throughout except in September 1934 when it was lowered by 25 per cent. to dispose of old stock. On the whole, prices seem to have fallen generally and were lower in most cases than in December 1932. The share of the United Kingdom under this item amounts to Rs. 6.6 lakhs or 78% as against Rs. 1.9 lakhs or 22 per cent. from foreign countries.

The United Kingdom received a preference of 7½ per cent. by a reduction in the old rate of duty by that amount while that on the imports from other countries remained unchanged at 37½ per cent. Only certain makes of cars have at the same port declined by about Rs. 25 in September 1934 as compared with the previous year. The quotations available at Bombay during 1934-35 showed that the price of British cars declined by 11 to 20 per cent, as compared with the previous been quoted and they are not necessarily all competitive. At Calcutta the price of Hillman cars dropped by about 3 per cent. between March 1934 and September 1934 but rose again by the same amount in March 1935. The price of Chrysler Plymouth year, while those of the foreign cars declined by about 15 per cent. At Madras, the value of British cars declined by 6 per cent. between September 1934 and March 1935. No quotations for foreign cars are, however, available after March 1934 0,100 0 5,100 0 5,850 0 from this port Rs. As.

1932. The reduction in price is partly due to the reduced duty and partly to lower c.i.f. price. The price of the Canadian truck, however, rose in December 1933 as compared with December 1932. It dropped by nearly Rs. 160 in March 1934 truck, however, rose in December 1933 as compared with December 1932. available. The price of the British truck quoted fell consistently since December 1932, and in the year under review the extent of the fall amounted to 5 per cent. as compared with the preceding year and 17 per cent. as compared with December The preference of 7½ per cent. was secured to the United Kingdom by a reduction in the old rate of duty in her favour by that amount and by maintaining the same unaltered at 25 per cent. against others. Quotations from Calcutta only are but again rose by Rs. 70 in 1934-35. The price in the year under review is only Rs. 5 less than in December 1932.

No. 61 (9) [231].—Cutlery, plated.

tions are not available. The principal article from the United Kingdom that enters Bombay is Mappin and Webb's plated The non-preferential duty remained unchanged at the old level while the imports from the United Kingdom were admitted at a rate which was lower by 10 per cent. The imports of this item are comparatively small and suitable quotaknives for which there is no comparable quality from other sources.

This is an omnibus head which includes a large variety of manufactures of iron or steel mostly dissimilar to each other in character. The rate of duty in December 1932 was 15-5/8 per cent. The rate was reduced to 10 per cent. in the case of the United Kingdom imports but was raised to 20 per cent. in the case of imports from other countries. An anlysis of the movements of prices of some of the items for which market quotations are available is given below:—

- (a) Anchors and cables.—Only Calcutta reports prices of steel rail anchors of British and German origin. The price of the British product continued to decline in 1934-35 and was on a lower level than in the previous year. The quotation for September 1934 was, however, for a different quality. There were no imports of the German variety after December 1933 as the British article ousted the Continental rival.
- (b) Hoops and strips.—Prices of British hoops and strips in 1934-35 at Calcutta and Bombay were on a higher level than in the pre-Ottawa period. At Karachi there has not been any import of British hoops and strips since March 1934. Except German goods at Calcutta which appreciated in value by about 1 per cent. prices of all foreign products declined from 2 to 7 per cent. in 1934-35 as compared with the previous year but were still higher than in the pre-preferential period. Bombay had however no quotation for 1932 as the article had not been imported in December that year. In Madras, prices rose considerably in 1934 on account of the depletion of stocks in the market but came down to Rs. 130 per ton in March 1935.
- (c) Nails and washers, not otherwise specified.—Prices of both British and foreign products fell below the pre-Ottawa level in March 1935. The fall in the case of preferential articles was continual while the prices of the foreign goods had generally tightened in the period in between.
- (d) Pipes and tubes, etc.—Normally, British pipes because of their established quality fetch a price higher than that of Continental pipes by 3 to 5 per cent. There is apparently an understanding between English and Continental manufactures to send out goods on a quota basis and adjust the trade discounts in the invoices in such a manner that a difference of 10 per cent. in the preference is absorbed, and the Indian seller has ultimately to sell with a difference of 3 to 5 per cent. between the two. The trend of business in 1934-35 was in keeping with this arrangement. Prices of foreign pipes declined at all the ports whereas the price of the U. K. product has not moved in the same direction.
- (e) Barbed or stranded fencing wire and wire rope.—The price of the U. K. product at Calcutta declined by 3 per cent. in 1934-35 as compared with the previous year. There was no import of any German product since March 1934 as the British variety completely ousted the Continental rival. At Madras, where there was no import of the British variety since March 1934, the price of the foreign supplies went down by 11 per cent. in 1934-35. On the whole, prices have been on the decline.

٠.:

- (f) Expanded metal.—At Calcutta the price of the British product declined further by 16 per cent. in 1934-35 and the German variety was completely ousted from the market since the launching of the preference. At Karachi also the price of the British variety declined substantially. At Bombay the imports of Belgium and other Continental products in this class have ceased since September 1934.
- (g) Steel cut tucks.—Quotations from Karachi only are available. The price of the U. K. supplies declined between December 1933 and March 1934 and remained unchanged since then. The price, however, was slightly higher than in December 1932. The price of the Belgian variety on the other hand considerably declined but for a rise in March 1934.

This is another omnibus head in which a number of steel manufactures have been put together. Preference has been granted to the United Kingdom by reducing the rate of duty from 15-5/8 per cent. in December, 1932, to 10 per cent. whereas it has been raised to 20 per cent. in the case of supplies from other countries. The customs duty on the articles for which quotations are available has, however, been changed from preferential to protective since available has, however, been changed from preferential to protective since available has, some of the main items for which market rates have been quoted are considered below:—

- (a) Stainless steel sheets.—Quotations are available from Calcutta only. In 1934-35 there were no imports under this head.
- (b) Steel angle or tees.—Quotations from Rangoon only are available. Prices of both British and Belgian supplies were on a much higher level than in the preceding year. It is difficult, however, to judge whether the rise in price had any connection with preference.
 - (c) Steel bar and rod.—Quotations relating to foreign varieties only are available from Madras. No quotations are available for March 1935. In September 1934 the price quoted was higher than in March 1934, the increase being much larger when compared with the pre-Ottawa period. As the quotations only refer to foreign varieties it is difficult to judge the effects of preference on prices of this article.
 - (d) Steel bar and rod of alloy.—Quotations from Calcutta only are available. The price of the British supplies as well as foreign supplies have remained unchanged in 1934-35 as compared with the previous year.
 - (e) Steel bar and rod of tub steel.—A single quotation of the U. K. product is available from Karachi only. In 1934-35 the price rose by 4 per cent. and stood at the same level as in the pre-Ottawa period.
 - (f) Steel bar and rod of bright steel shafting.—The price in March 1935 at Calcutta of the U. K. bars rose by 7 per cent. whereas that of Belgian bars declined by 3 per cent.
 - (g) Steel bar and rod not over 7/16" diameter.—Prices of all varieties, British as well as non-British, rose in 1934-35.

This item is subject to a specific duty which remained unchanged in the case of the United Kingdom but was increased by Rs. 4-8 to Rs. 18-4 per ton in the case of other countries. The chief competitors in this line are Japan and the United Kingdom. At Calcutta, the price of British cement as compared with the previous year went up by 1 per cent. in 1934-35, whereas the price of Japanese cement fell by about 4 per cent. during the same period. to be noted, however, that very little Japanese cement is imported into Calcutta. At Bombay, the price of British cement remained almost constant in the case of one brand but fell in the other case by 7 per cent. in the year under review. On the other hand, quotations for Japanese cement registered a rise of 4 per cent. at that port. At Karachi, the price of British cement declined by 2 per cent., whereas Japanese cement went up in value by nearly 14 per cent. Madras, the price of British cement was almost on the same level as in the previous year but there was a fall in the price of foreign cement by 8 per cent. due to a reduction in the c. i. f. price. At Rangoon, British cement remained steady but the price of Japanese rose to some extent. On the whole, prices of British cement tended to decline in the year under review, whereas those of foreign amounted to Rs. 17,02,000 or 79 per cent., whereas those from other countries amounted to Rs. 4,49,000 or 21 per cent.

		ption.			moking pipes—	Peterson's	French and Italian
		Description.	,		Smokin	Pet	Ä

Preference was granted to the United Kingdom by reducing the rate of duty from 50 per cent. to 40 per cent. in her case. Only quotations for smoking pipes from Bombay are available. This item represents an article of luxury for which the demand is specialised. The share of the United Kingdom in this trade was Rs. 1,27,000 or 32 per cent., whereas the share of the other countries was Rs. 2,64,000 or 68 per cent.

Market Prices.

No. 84 [244].—Toys, games, playing cards, etc.

playing-cards as compared with the previous year rose by 5 per cent. at Calcutta and 2 per cent. at Madras, whereas in Karachi the price remained almost constant. The price of foreign playing-cards in the same period fell by 5 per cent. in Calcutta, 8 per cent. in Karachi, but rose by 7 per cent. in Madras. Prices of British tennis gear quoted at Bombay ent down appreciably. On the whole, for several items prices were rather on the decline. In 1934-35 the price of British among the various imported makes but also with the growing Indian manufactures.

		Description.			Beteinuts	Split and sliced

Preference was granted to the Colonies by increasing the standard rate of duty by 7½ per cent. to 45 per cent. are mostly from imports from foreign countries, the preferential rate remaining at 37½ per cent. The imports, however, are mostly from the Straits Settlements and Ceylon. The quotation of betelnuts from Madras does not give the country of origin. Prices the Straits Settlements and Ceylon. The quotation of betelnuts from Madras does not give the country of origin. There at that port in September 1934 showed a considerable increase over the preceding year as well as in December 1932. There at that port in September 1934 showed a considerable increase over the preceding year as well as in December 1932. was, however, a large drop in March 1935 which brought the price down to a lower level than in the pre-Ottawa period. Prices at Rangoon of the betelnuts from Ceylon were on a higher level in the year under review as compared with the previous year. Prices of betelnuts from Straits Settlements were, on the other hand, on a lower level in 1934-35 as against 1933-34 as well as December 1932.

Exports from India to the United Kingdom

(a) Preferential duties—Scheduled.

This mothod has been ado ted because the United Kingdom, detailed accounts are for the calendar year and not for the fiscal. The various exports from India to the United Kingdom have been taken. As the preference is however granted in the United Kingdom on the c. i. f. values in the United Kingdom, the advantage from the preference is somewhat underestimated by the method followed. defect however is not important because specific preferences have been granted on tea, tobacco and rice, which are the three most impor-[Note 1:-In calculating the advantage on landed cost in the case of exports from India to the United Kingdom the declared values (f. o. b.) of the tant items and between them account for an a Ivantage of Rs. 614 lakhs out of a total of Rs. 817 lakhs.

however a certain amount regarding which final information has not yet been received and the figures are therefore provisional. Note 2:- The advantage is calculated on the export figures as recorded in the Indian Accounts with the corrections so far received. There is

		Total of ir		Cotton Tv (a) of c	(b) of c	Cotton Pie	(a) Plain Grey	(b) Others				*

Owing to the changes in the classification of Iron and Steel consequent upon the passing of the Iron and Steel Duties Act, 1934, the figures shown against this head are not strictly comparable in as much they represent those items which were dutiable at differential rates in the respective years.

† Advantage on landed cost has been calculated on those items which can readily be worked out.

‡ Cotton Twist and Yarn has been subjected to differential duty since May 1934. Figures for 1934.35 are for eleven months only.
